INDEPENDENT INNOVATION IN CHINA
Theory and Cases

Zhong Huibo
Beijing Institute of Technology, China

Lei Jiasu
Tsinghua University, China
### Contents

**Preface**

**Chapter 1  Introduction**

1.1 The definition of the concepts related to independent innovation
   - 1.1.1 The basic concept of independent innovation 3
   - 1.1.2 The subjects of independent innovation 6
   - 1.1.3 The dispute over the definition of independent innovation 10

1.2 Classification of the models and types of innovation
   - 1.2.1 Foreign classification of innovation models based on different paths 14
   - 1.2.2 Domestic classification of innovation models seen from different angles 16

1.3 Classification of independent innovation
   - 1.3.1 Original innovation, integrated innovation, and re-innovation based on introduction, implementation, and adoption 20
   - 1.3.2 Conventional and unconventional independent innovation 22
   - 1.3.3 Breakthrough innovation of dominating design, core components, and product architecture 24
   - 1.3.4 Independent innovation based on cooperation 27

1.4 The basic layout of this book

**References**

**Chapter 2  The urgency for implementation of independent innovation strategy in China**

2.1 The practical enlightenment of “market for technology” in China
   - 2.1.1 Positive effects of “market for technology” on the innovation of Chinese domestic enterprises 36
   - 2.1.2 Negative effects of “market for technology” on the innovation of Chinese
3.4 The path towards independent innovation: Innovation (original innovation) directly from high-end

3.4.1 The connotation of original innovation

3.4.2 The realization path of original innovation

3.4.3 Market-oriented innovation based on technological breakthrough (taking Suntech as an example)

References

Chapter 4 The capacity, mode, and trajectory of Chinese independent innovation

4.1 The connotations of the capacity, mode, and trajectory of innovation

4.1.1 Innovation and independent innovation capacity

4.1.2 The mode of enterprise innovation and the trajectory of industry innovation

4.2 The mode and the building up of the capacity for enterprise independent innovation

4.2.1 The mode and the improvement of capacity in different stages of enterprise innovation

4.2.2 The selection of the innovation mode in different stages of enterprise growth

4.3 The construction of the trajectory of and ability for industry innovation

4.3.1 The selection of a generalized trajectory of industry innovation

4.3.2 The selection of a trajectory for industrial independent innovation: Taking the Chinese equipment manufacturing industry as an example

4.3.3 The inherent structure and construction of the industrial capacity for independent innovation

References

Chapter 5 The method and mechanism of technology integration in enterprise independent innovation

5.1 The relative concepts of technology and technology integration

5.1.1 Definition of technology

5.1.2 Two kinds of technology integration

5.1.3 The relationship between technology integration and independent innovation
## 5.2 The content and process of technology integration

- **5.2.1 The content of technology integration**
- **5.2.2 The process of technology integration**
- **5.2.3 The problems enterprises face in the process of technology integration**

## 5.3 Technology integration from two perspectives

- **5.3.1 Technology integration from the perspective of the construction of enterprise knowledge**
- **5.3.2 Technology integration from the perspectives of internal and external resources**

## 5.4 The feasible mechanism of enterprise technology integration

- **5.4.1 The participants in and the task boundary of enterprise technology integration**
- **5.4.2 The mechanism of the three aspects of enterprise technology integration**

## Chapter 6 The institutional guarantee of Chinese independent innovation: The construction of an innovation system

- **6.1 Innovation system, the institutional guarantee of independent innovation**
- **6.1.1 The connotations of innovation system**
- **6.1.2 The practices of building up a national innovation system (NIS)**

- **6.2 The establishment of an NIS oriented towards independent innovation**
- **6.2.1 The historical evolution of the Chinese NIS**
- **6.2.2 The construction of the Chinese NIS oriented towards independent innovation**

- **6.3 The establishment of a sectoral innovation system (SIS) oriented towards independent innovation**
- **6.3.1 The connotations of an SIS**
- **6.3.2 The framework of an SIS oriented towards independent innovation**

- **6.4 The construction of an enterprise innovation system (EIS) oriented towards independent innovation**
- **6.4.1 The connotations of an EIS**
- **6.4.2 The framework of an EIS oriented towards independent innovation**

## References
Appendix

Enterprise Case 1  Huawei—Independent innovation as the challenger's passport 299
1. The progress of Huawei’s independent innovation 299
2. The four magic keys to Huawei’s independent innovation 305
3. The trajectory analysis of Huawei’s independent innovation strategy 309

Enterprise Case 2  CIMC—Independent innovation forging a world-class enterprise 313
1. Rapid development of CIMC 313
2. The characteristics of CIMC’s independent innovation mode 318
3. Summary 320

Enterprise Case 3  BYD—From a battery king to an auto manufacturer 322
1. The miracle from 2 million yuan to 80 billion yuan 322
2. The experience of BYD’s fast growth—Independent innovation 326
3. Learning from BYD’s independent innovation 329

Enterprise Case 4  Tencent—Winning by “Q” 331
1. The history of QQ’s development 332
2. The innovation path of QQ 336
3. The characteristics of Tencent’s independent innovation 339
4. Summary 342

Enterprise Case 5  Xunlei—A dominator and pioneer in the downloading engine industry 343
1. The history of Xunlei’s development 344
2. The enlightenment of Xunlei’s innovation 346
3. Summary 348

Enterprise Case 6  Mindray—The leader of the Chinese medical equipment industry 350
1. Mindray’s growth 350
2. Mindray’s all-around independent innovation 355
Independent Innovation in China
Theory and Cases

3. The enlightenment from Mindray’s innovation 357
4. Summary 359

Enterprise Case 7  CHINT—From a Wenzhou manufacturer to a world-class brand 360
1. The history of CHINT’s development 360
2. The developmental trajectory from independent innovation to independent brand 364
3. Selecting the trajectory for CHINT’s independent innovation 367
4. Summary 371

Enterprise Case 8  Nuctech—The clairvoyance of China 372
1. Company profile 372
2. The analysis of Nuctech’s trajectory towards independent innovation 374
3. Summary 379

Enterprise Case 9  Chery—Creating the independent brand of the Chinese auto industry 381
1. Introduction 381
2. Chery’s independent innovation 382
3. Chery’s trajectory towards independent innovation: From introduction, integration, original innovation, then to full innovation 387
4. The features and implications of Chery’s independent innovation 391
5. Summary 395

Industry Case  The bottleneck and trajectory of the localization of the Chinese equipment manufacturing industry 396
1. The equipment manufacturing industry and its characteristics 397
2. The situation and problems of the localization of the Chinese equipment manufacturing industry 398
3. The analysis of the cause of low-level localization of the Chinese equipment manufacturing industry 402
4. The analysis of the trajectory of the localization of the Chinese equipment manufacturing industry 408
