PREFACE	xxxii
PART I DEA THEORY	1
1 Radial DEA Models	3
<i>Kaoru Tone</i>	
1.1 Introduction	3
1.2 Basic Data	3
1.3 Input-Oriented CCR Model	4
1.3.1 The CRS Model	6
1.4 The Input-Oriented BCC Model	6
1.4.1 The VRS Model	7
1.5 The Output-Oriented Model	7
1.6 Assurance Region Method	8
1.7 The Assumptions Behind Radial Models	8
1.8 A Sample Radial Model	8
References	10

2	Non-Radial DEA Models	11
	<i>Kaoru Tone</i>	
2.1	Introduction	11
2.2	The SBM Model	12
2.2.1	Input-Oriented SBM	13
2.2.2	Output-Oriented SBM	14
2.2.3	Non-Oriented SBM	14
2.3	An Example of an SBM Model	15
2.4	The Dual Program of the SBM Model	17
2.5	Extensions of the SBM Model	17
2.5.1	Variable>Returns-to-Scale (VRS) Model	17
2.5.2	Weighted-SBM Model	18
2.6	Concluding Remarks	18
	References	19
3	Directional Distance DEA Models	20
	<i>Hirofumi Fukuyama and William L. Weber</i>	
3.1	Introduction	20
3.2	Directional Distance Model	20
3.3	Variable>Returns-to-Scale DD Models	23
3.4	Slacks-Based DD Model	23
3.5	Choice of Directional Vectors	25
	References	26
4	Super-Efficiency DEA Models	28
	<i>Kaoru Tone</i>	
4.1	Introduction	28
4.2	Radial Super-Efficiency Models	28
4.2.1	Input-Oriented Radial Super-Efficiency Model	28
4.2.2	Output-Oriented Radial Super-Efficiency Model	29
4.2.3	Infeasibility Issues in the VRS Model	29
4.3	Non-Radial Super-Efficiency Models	29
4.3.1	Input-Oriented Non-Radial Super-Efficiency Model	30
4.3.2	Output-Oriented Non-Radial Super-Efficiency Model	30
4.3.3	Non-Oriented Non-Radial Super-Efficiency Model	30
4.3.4	Variable>Returns-to-Scale Models	31
4.4	An Example of a Super-Efficiency Model	31
	References	32

5	Determining Returns to Scale in the VRS DEA Model	33
	<i>Biresh K. Sahoo and Kaoru Tone</i>	
5.1	Introduction	33
5.2	Technology Specification and Scale Elasticity	34
5.2.1	Technology	34
5.2.2	Measure of Scale Elasticity	35
5.2.3	Scale Elasticity in DEA Models	35
5.3	Summary	37
	References	37
6	Malmquist Productivity Index Models	40
	<i>Kaoru Tone and Miki Tsutsui</i>	
6.1	Introduction	40
6.2	Radial Malmquist Model	43
6.3	Non-Radial and Oriented Malmquist Model	45
6.4	Non-Radial and Non-Oriented Malmquist Model	47
6.5	Cumulative Malmquist Index (CMI)	48
6.6	Adjusted Malmquist Index (AMI)	49
6.7	Numerical Example	50
6.7.1	DMU A	54
6.7.2	DMU B	54
6.7.3	DMU C	55
6.7.4	DMU D	55
6.8	Concluding Remarks	55
	References	55
7	The Network DEA Model	57
	<i>Kaoru Tone and Miki Tsutsui</i>	
7.1	Introduction	57
7.2	Notation and Production Possibility Set	58
7.3	Description of Network Structure	59
7.3.1	Inputs and Outputs	59
7.3.2	Links	60
7.4	Objective Functions and Efficiencies	61
7.4.1	Input-Oriented Case	61
7.4.2	Output-Oriented Case	62
7.4.3	Non-Oriented Case	62
	Reference	63

8	The Dynamic DEA Model	64
	<i>Kaoru Tone and Miki Tsutsui</i>	
8.1	Introduction	64
8.2	Notation and Production Possibility Set	65
8.3	Description of Dynamic Structure	67
	8.3.1 Inputs and Outputs	67
	8.3.2 Carry-Overs	67
8.4	Objective Functions and Efficiencies	69
	8.4.1 Input-Oriented Case	69
	8.4.2 Output-Oriented Case	70
	8.4.3 Non-Oriented Case	71
8.5	Dynamic Malmquist Index	71
	8.5.1 Dynamic Catch-up Index	72
	8.5.2 Dynamic Frontier Shift Effect	72
	8.5.3 Dynamic Malmquist Index	72
	8.5.4 Dynamic Cumulative Malmquist Index	72
	8.5.5 Dynamic Adjusted Malmquist Index	73
	References	73
9	The Dynamic Network DEA Model	74
	<i>Kaoru Tone and Miki Tsutsui</i>	
9.1	Introduction	74
9.2	Notation and Production Possibility Set	75
	9.2.1 Notation	75
9.3	Description of Dynamic Network Structure	77
	9.3.1 Inputs and Outputs	77
	9.3.2 Links	77
	9.3.3 Carry-Overs	78
9.4	Objective Function and Efficiencies	80
	9.4.1 Overall Efficiency	80
	9.4.2 Period and Divisional Efficiencies	81
9.5	Dynamic Divisional Malmquist Index	82
	9.5.1 Dynamic Divisional Catch-up Index	82
	9.5.2 Dynamic Divisional Frontier Shift Effect	82
	9.5.3 Dynamic Divisional Malmquist Index	82
	9.5.4 Dynamic Divisional Cumulative Malmquist Index	83
	9.5.5 Dynamic Divisional Adjusted Malmquist Index	83
	9.5.6 Overall Dynamic Malmquist Index	83
	References	84

10 Stochastic DEA: The Regression-Based Approach	85
<i>Andrew L. Johnson</i>	
10.1 Introduction	85
10.2 Review of Literature on Stochastic DEA	87
10.2.1 Random Sampling	88
10.2.2 Imprecise Measurement of Data	88
10.2.3 Uncertainty in the Membership of Observations	90
10.2.4 Random Production Possibility Sets	91
10.2.5 Random Noise	93
10.3 Conclusions	96
References	96
11 A Comparative Study of AHP and DEA	100
<i>Kaoru Tone</i>	
11.1 Introduction	100
11.2 A Glimpse of Data Envelopment Analysis	100
11.3 Benefit/Cost Analysis by Analytic Hierarchy Process	102
11.3.1 Three-Level Perfect Graph Case	102
11.3.2 General Cases	103
11.4 Efficiencies in AHP and DEA	104
11.4.1 Input x and Output y	104
11.4.2 Weights	104
11.4.3 Efficiency	104
11.4.4 Several Propositions	105
11.5 Concluding Remarks	105
References	106
12 A Computational Method for Solving DEA Problems with Infinitely Many DMUs	107
<i>Abraham Charnes and Kaoru Tone</i>	
12.1 Introduction	107
12.2 Problem	108
12.3 Outline of the Method	109
12.4 Details of the Method When Z is One-Dimensional	110
12.4.1 Initial Discretization and Subdivision Parameter	110
12.4.2 Solving (D_h)	110
12.4.3 Deletion/Subdivision Rules	111
12.4.4 Solving the New LP	112
12.4.5 Convergence Check	112

12.5	General Case	113
12.5.1	Initial Discretization	113
12.5.2	Deletion and Subdivision (Bisection) Rules	113
12.5.3	Solving New LPs and Checking Convergence	115
12.6	Concluding Remarks (by Tone)	115
	Appendix 12.A Proof of Theorem 12.1	115
	Appendix 12.B Proof of Theorem 12.2	116
	Reference	116
PART II	DEA APPLICATIONS (PAST–PRESENT SCENARIO)	117
13	Examining the Productive Performance of Life Insurance Corporation of India	119
	<i>Kaoru Tone and Biresh K. Sahoo</i>	
13.1	Introduction	119
13.2	Nonparametric Approach to Measuring Scale Elasticity	121
13.2.1	Technology and Returns to Scale	122
13.2.2	Qualitative Information on Returns to Scale	123
13.2.3	Quantitative Information on Returns to Scale	124
13.2.4	An Alternative Measure of Scale Elasticity	126
13.3	The Dataset for LIC Operations	128
13.4	Results and Discussion	130
13.4.1	Production-Based Analysis	132
13.4.2	Cost-Based Analysis	133
13.4.3	Returns-to-Scale Issue	133
13.4.4	Sensitivity Analysis	135
13.5	Concluding Remarks	136
	References	136
14	An Account of DEA-Based Contributions in the Banking Sector	141
	<i>Jamal Ouenniche, Skarleth Carrales, Kaoru Tone and Hirofumi Fukuyama</i>	
14.1	Introduction	141
14.2	Performance Evaluation of Banks: A Detailed Account	142
14.3	Current State of the Art Summarized	154
14.4	Conclusion	163
