HOW WE MISUNDERSTAND ECONOMICS AND WHY IT MATTERS

The Psychology of Bias, Distortion and Conspiracy

David Leiser and Yhonatan Shemesh
CONTENTS

Preface xiii

1 Introduction: folk-economic beliefs 1
   How to understand what you cannot? 5

2 Why is economics so hard? 10
   Economists focus on the aggregate; non-economists think of individuals 11
   Direct and indirect effects 15
   Equilibrium as an explanation 17
   Morality 20

3 Cognitive hurdles 23
   Cognitive structure: a flashlight in the basement 26
     WM – short range 26
     LTM – narrow scope 27
   Thinking, fast and slow 30
   The intentionality bias 30
   Consequences 31
     Opportunity cost neglect 33
     Aggregate effects 34
     Ignoring the equilibrium 34
     Uni-dimensionality and the halo effect 35
     The denial of tradeoffs 37
## Contents

4 Unemployment and inflation 40
   Unemployment 41
      *Three causes for individual unemployment* 43
   Inflation 47
      *The central psychological core of “inflation”* 49

5 The “good begets good” heuristic: the relations between macroeconomic variables 52
   The “good begets good” heuristic 53
   Macroeconomic consequences of the GBG heuristic 57

6 What is the economy like? How metaphors shape our understanding of economics 60
   Metaphors as structure mapping 63
      *When are metaphors most influential?* 65
   Metaphors in problem solving and decision making 65
   Economic metaphors in the media 67
      *The economy is an organism* 68
      *The economy is a machine* 68
      *The most common economic metaphors* 70
   Intuitive theories: the source of metaphorical sources 70
      *Intuitive theories at work: folk-psychology* 72
   Concluding remarks 75

7 Ideology: lay understanding of capitalism 77
   Contrasting views of capitalism 79
   Moral-psychological roots of lay views of capitalism 83
      *Self-interest* 83
      *Fairness* 86
      *Ideology and personality* 90
   Concluding remarks 93

8 Money and wealth 96
   Supply and demand – money as tool 96
   Money supply 98
   Fiat money 101
   Emotional value of money – money as drug 102
   Emotions are extended to fiat money 103
   Fungibility 104
   Real money vs. money on paper 106
9 Financial and economic literacy 109

Financial literacy and education 109

How much financial literacy does the public possess? 110
Consequences of deficient financial knowledge 111
The promise of financial literacy training 112
Financial training is mostly disappointing 112
Correlation is not causation 114

Economic literacy to fight simplistic policies 115
Reforms and economic knowledge: Elsa Fornero 116
Literacy and public policy 118
In praise of informed skepticism: Peter Davies 119
Final words 121

10 Public policy consequences 122

The mismatch 122
Consequences 126
Recommendations 129
Personal finances 131
Governance 134
