

General aspects of beer and constituents Beer making, hops and yeast  
Overview of beers, hops, yeast and brewing: from field to flavour  
Starch degradation during mashing  
Larger beers  
Sorghum beers  
Beer types in the far east  
Traditional and modern Japanese beers: methods of production and composition  
Production of alcohol-free beer  
Brewer's yeasts strains and effects on beer composition  
Pitching yeast and beer flavour  
Yeast alcohol acetyl transferase and its relationship to flavours of beers  
Flocculation in *Saccharomyces cerevisiae*  
Use of mutant stains of yeast in the brewing industry  
The yeast proteome: what does it tell us  
Bioflavouring and beer refermentation  
Pathways for the synthesis of xanthohumol in hop cones (*Humulus lupulus*)  
Microbiological control in the brewing industry  
Beer drinking  
Beer advertising in magazines  
Personality profiles of beer and non-beer drinkers  
Beer drinking patterns in general populations  
Trends in beer drinking habits in comparison with non-beer beverages from 1985 to 2002

Beer consumption and a single USA state, Louisiana  
Beer drinking: a European perspective  
Beer drinking patterns in France  
Beer consumption patterns in Northern Ireland  
Beer drinking in Hong Kong  
Beer consumption in teenagers in Brazzaville (Congo)  
Beer composition  
Ethanol content of beer in individual states of the US  
Ethanol content of beer: is it increasing ?  
Ostrogens and congeners from spent hops  
Essential oils in hops: a composition mixture of 1000 compounds  
The chemical nature of flavour in beer  
Flavour-active esters in beer  
Phenolic compounds in beer  
Free and bound phenolic acids in beer  
Biogenic amines in beer  
Biogenic polyamines in beer  
Thiamine in beer  
Beta-pseudouridine in beer

Terpenoids in beer  
Amino acids in beer  
Water-soluble proteins in beer  
Metals in beer  
Silicon in beer  
Deoxynivalenol in beer  
Hop derived 8-prenyl naringenin as phytoestrogens in beer  
Aarabinoxylans during malting and brewing  
Beer purines  
Organic acids in beer  
Methylglyoxal and aldehydes in beer and biological implications  
E-2-nonenal and beta-damascenone in beer  
Acylphloroglucinol-glucoopyranosides in hops and beer: stucture and function  
Oxalates in beer  
Beer carbohydrates  
Soya and non-soya phytoestrogens in beer  
Beer stability and spoilage  
The biochemistry of ageing beer  
Beer spoilage  
Photolysis of hop-derived trans-iso-a-acids and trans-tetrahydroiso- a-acids in beer  
Stability of isohumulones and derivatives  
Photooxidative degradation of beer bittering agents  
Contaminants in beer  
General effects on metabolism and body systems  
General Mood states in response to beer  
Beer and non-beer beverages and all-cause mortality  
Beer drinking and risk of injury  
Intake of beer, wine and spirits and liver disease  
Body composition and metabolism  
Caloric compensation in response to beer consumption  
Beer, alcohol and body mass index and waist-to-hip ratio  
Beer and adiposity  
The relationship between beer and obesity  
Beer and ad libitum energy intake  
The relationship between exercise and beer on the body  
Light and dark beers have different effects on metabolism  
Metabolism of xanthohumol and isoxanthohumol, prenylated flavonoids from beer  
Beer and the glycaemic index  
The effect of beer on gastric emptying of solid meals in humans  
Beer ingestion on body purine bases  
The absorption and metabolism of phenolic acids from beer in man

Antioxidant properties of lyophilized beer extracts

What contribution is beer to the intake of antioxidants in diet

Dietary pattern of beer and prevalence with type 2 diabetes

Sensitivity and anaphylaxis to wheat beer

The overactive bladder and beer

Cardiovascular

Beer and cardiovascular disease: a meta-analysis

Dealcoholized beer and effects on hemostasis: mechanisms for cardioprotection?

Beer and its effects on plasma lipids and antioxidant capacity

Beer consumption and plasma circulating fibrin
