Molecular Organization of Cells
Cell-ECM interactions In Repair and Regeneration
Developmental Mechanisms of Regeneration
The molecular basis of pluripotency in Principles of Regenerative Medicine
How cells change their phenotype
Scarless Wound Healing
Somatic Cloning and Epigenetic Reprogramming in Mammals
Engineered Proteins for Manipulating Gene Expression and Genome Sequence
Genetic Approaches in Human Embryonic Stem Cells and Their Derivatives
Embryonic Stem Cells: Derivation and Properties
Alternate Sources of human embryonic stem cells
Stem cells derived from amniotic fluid and placenta
Induced Pluripotent stem cells
Mesenchymal Stem cells Derived from Bone Marrow
Multipotent adult progenitor cells
Mesenchymal Stem cells
Hepatic Stem Cells and Therapy
Cardiac stem cells
Skeletal muscle stem cells
Stem Cells Derived from Fat
Stem Cells Derived from Peripheral Blood
Islet Cell Therapy and Pancreatic Stem Cells
Regenerative Medicine for Diseases of the Retina
Somatic cells: Growth and expansion potential of T Lymphocytes
Mechanical Determinants of Tissue Development
Morphogenesis and Morphogenic Proteins
Physical stress as a factor in tissue growth and remodeling
Intelligent Surfaces for Cell Sheet Engineering
Applications of Nanotechnology in Regenerative Medicine
Design Principles in Biomaterials and Scaffolds
Natural Origin Materials- Processing, Modification and Performance
Synthetic Polymers
Collagen Based Scaffold Materials
Hydrogels
Surface Modification of Biomaterials
Histogenesis in Three-Dimensional Scaffolds
Biocompatibility and Bioresponse to biomaterials
Mechano-inducible systems for stem cells
Biomineralization and Bone Regeneration
Cell therapy for blood substitutes
Articular Cartilage
Implantation of Myogenic Cells in Skeletal Muscles
Clinical islet transplantation
Fetal Tissues
Engineering of Large Diameter Vessels
Engineering of Small Diameter Vessels
Cardiac Tissue
Regenerative Medicine in the Cornea
Alimentary Tract
Extracorporeal Kidney Support
Tissue Engineering of the Reproductive System
Cartilage Tissue Engineering
Functional Tissue Engineering of Ligament and Tendon Injuries
Central Nervous System
Peripheral Nervous System
Tissue Engineering of Skin
Tissue Engineering of the Respiratory Tree
Ethical Considerations
US Stem Cell Research Policy
Overview of FDA Regulatory Process
