

Preface	p. xv
Chemical thermodynamics and flame temperatures	p. 1
Introduction	p. 1
Heats of Reaction and Formation	p. 1
Free Energy and the Equilibrium Constants	p. 8
Flame Temperature Calculations	p. 16
Analysis	p. 16
Practical Considerations	p. 21
Sub and Supersonic Combustion Thermodynamics	p. 31
Comparisons	p. 31
Stagnation Pressure Considerations	p. 32
Problems	p. 34
References	p. 39
Chemical kinetics	p. 41
Introduction	p. 41
Rates of Reactions and their Temperature Dependence	p. 41
The Arrhenius Rate Expression	p. 43
Transition State and Recombination Rate Theories	p. 45
Simultaneous Interdependent Reactions	p. 50
Chain Reactions	p. 51
Pseudo-First-Order Reactions and the "Falloff" Range	p. 54
The Partial Equilibrium Assumption	p. 57
Pressure Effect in Fractional Conversion	p. 58
Chemical Kinetics of Large Reaction Mechanisms	p. 59
Sensitivity Analysis	p. 60
Rate-of-Production Analysis	p. 62
Coupled Thermal and Chemical Reacting Systems	p. 62
Mechanism Simplification	p. 64
Problems	p. 65
References	p. 69
Explosive and general oxidative characteristics of fuels	p. 71
Introduction	p. 71
Chain Branching Reactions and Criteria for Explosion	p. 71
Explosion Limits and Oxidation Characteristics of Hydrogen	p. 78
Explosion Limits and Oxidation Characteristics of Carbon Monoxide	p. 86
Explosion Limits and Oxidation Characteristics of Hydrocarbons	p. 91
Organic Nomenclature	p. 92
Explosion Limits	p. 96
"Low-Temperature" Hydrocarbon Oxidation Mechanisms	p. 99
The Oxidation of Aldehydes	p. 105

The Oxidation of Methane	p. 106
Low-Temperature Mechanism	p. 106
High-Temperature Mechanism	p. 108
The Oxidation of Higher-Order Hydrocarbons	p. 111
Aliphatic Hydrocarbons	p. 111
Alcohols	p. 120
Aromatic Hydrocarbons	p. 123
Supercritical Effects	p. 132
Biofuels	p. 135
Problems	p. 141
References	p. 143
Flame phenomena in premixed combustible gases	p. 147
Introduction	p. 147
Laminar Flame Structure	p. 151
Laminar Flame Speed	p. 153
Theory of Mallard and Le Chatelier	p. 155
Theory of Zeldovich, Frank-Kamenetskii, and Semenov	p. 160
Comprehensive Theory and Laminar Flame Structure Analysis	p. 166
Laminar Flame and Energy Equation	p. 174
Flame Speed Measurements	p. 174
Experimental Results-Physical and Chemical Effects	p. 182
Stability Limits and Design	p. 205
Flame Propagation through Stratified Combustible Mixtures	p. 208
Turbulent Reacting Flows and Turbulent Flames	p. 210
Rate of Reaction in a Turbulent Field	p. 212
Regimes of Turbulent Reacting Flows	p. 215
Turbulent Flame Speed	p. 227
Stirred Reactor Theory	p. 231
Flame Stabilization in High-Velocity Streams	p. 235
Combustion in Small Volumes	p. 245
Problems	p. 248
References	p. 251
Detonation	p. 255
Introduction	p. 255
Premixed and Diffusion Flames	p. 255
Explosion, Deflagration, and Detonation	p. 255
The Onset of Detonation	p. 256
Detonation Phenomena	p. 258
Hugoniot Relations and the Hydrodynamic Theory of Detonations	p. 259
Characterization of the Hugoniot Curve and the Uniqueness of the Chapman Jouguet Point	p. 260

Determination of the Speed of Sound in the Burned Gases for Conditions above the C-J Point	p. 269
Calculation of the Detonation Velocity	p. 273
Comparison of Detonation Velocity Calculations with Experimental Results	p. 277
The ZND Structure of Detonation Waves	p. 284
The Structure of the Cellular Detonation Front and Other Detonation Phenomena Parameters	p. 288
The Cellular Detonation Front	p. 288
The Dynamic Detonation Parameters	p. 292
Detonation Limits	p. 293
Detonations in Nongaseous Media	p. 296
Problems	p. 297
References	p. 298
Diffusion flames	p. 301
Introduction	p. 301
Gaseous Fuel Jets	p. 301
Appearance	p. 302
Structure	p. 306
Theoretical Considerations	p. 309
The Burke-Schumann Development	p. 312
Conserved Scalars and Mixture Fraction	p. 319
Turbulent Fuel Jets	p. 320
Burning of Condensed Phases	p. 322
General Mass Burning Considerations and the Evaporation Coefficient	p. 323
Single Fuel Droplets in Quiescent Atmospheres	p. 327
Burning of Droplet Clouds	p. 350
Burning in Convective Atmospheres	p. 351
The Stagnant Film Case	p. 351
The Longitudinally Burning Surface	p. 353
The Flowing Droplet Case	p. 355
Burning Rates of Plastics: The Small B Assumption and Radiation Effects	p. 357
Problems	p. 359
References	p. 361
Ignition	p. 363
Concepts	p. 363
Chain Spontaneous Ignition	p. 366
Thermal Spontaneous Ignition	p. 368
Semenov Approach of Thermal Ignition	p. 368
Frank-Kamenetskii Theory of Thermal Ignition	p. 373
Forced Ignition	p. 378
Spark Ignition and Minimum Ignition Energy	p. 379

Ignition by Adiabatic Compression and Shock Waves	p. 384
Other Ignition Concepts	p. 385
Hypergolicity and Pyrophoricity	p. 386
Catalytic Ignition	p. 389
Problems	p. 390
References	p. 391
Environmental combustion considerations	p. 393
Introduction	p. 393
The Nature of Photochemical Smog	p. 394
Primary and Secondary Pollutants	p. 395
The Effect of NO _x	p. 395
The Effect of SO _x	p. 398
Formation and Reduction of Nitrogen Oxides	p. 400
Structure of Nitrogen Oxides	p. 402
Effect of Flame Structure	p. 403
Reaction Mechanisms of Oxides of Nitrogen	p. 403
Reduction of NO _x	p. 419
SO _x Emissions	p. 424
Product Composition and Structure of Sulfur Compounds	p. 425
Oxidative Mechanisms of Sulfur Fuels	p. 426
Particulate Formation	p. 438
Characteristics of Soot	p. 439
Soot Formation Processes	p. 440
Experimental Systems and Soot Formation	p. 441
Sooting Tendencies	p. 443
Detailed Structure of Sooting Flames	p. 455
Chemical Mechanisms of Soot Formation	p. 460
Influence of Physical and Chemical Parameters on Soot Formation	p. 463
Stratospheric Ozone	p. 466
The HO _x Catalytic Cycle	p. 467
The NO _x Catalytic Cycle	p. 468
The ClO _x Catalytic Cycle	p. 470
Problems	p. 471
References	p. 472
Combustion of nonvolatile fuels	p. 477
Carbon Char, Soot, and Metal Combustion	p. 477
Metal Combustion Thermodynamics	p. 478
The Criterion for Vapor-Phase Combustion	p. 478
Thermodynamics of Metal-Oxygen Systems	p. 478
Thermodynamics of Metal-Air Systems	p. 491

Combustion Synthesis	p. 495
Diffusional Kinetics	p. 501
Diffusion-Controlled Burning Rate	p. 503
Burning of Metals in Nearly Pure Oxygen	p. 504
Burning of Small Particles-Diffusion versus Kinetic Limits	p. 506
The Burning of Boron Particles	p. 510
Carbon Particle Combustion (C. R. Shaddix)	p. 511
Practical Carbonaceous Fuels (C. R. Shaddix)	p. 514
Devolatilization	p. 514
Char Combustion	p. 519
Pulverized Coal Char Oxidation	p. 520
Gasification and Oxycombustion	p. 522
Soot Oxidation (C. R. Shaddix)	p. 527
Catalytic Combustion	p. 530
Problems	p. 534
References	p. 534
Appendixes	p. 537
Thermochemical data and conversion factors	p. 539
Adiabatic flame temperatures of hydrocarbons	p. 651
Specific reaction rate constants	p. 655
Bond dissociation energies of hydrocarbons	p. 681
Flammability limits in air	p. 689
Laminar flame speeds	p. 697
Spontaneous ignition temperature data	p. 705
Minimum spark ignition energies and quenching distances	p. 731
Programs for combustion kinetics	p. 735
Index	p. 747
