

List of Figures	p. xiii
List of Tables	p. xv
About the Authors	p. xvii
Preface	p. xix
Abbreviations	p. xxi
Abstract	p. xxiii
Introduction	
Challenges of Modern Developing Commercial Aircraft	p. 1
Evolution of Aircraft Maintenance Process	p. 3
Aircraft Composite Structures	p. 5
Reliability-Centered Maintenance	p. 7
Reliability Design	p. 7
Reliability-Centered Maintenance	p. 9
MSG-3 Structural Analysis	p. 12
A380 Maintenance Programs	p. 15
Summary	p. 17
Basic Concepts	
Accident	p. 19
Accident in Aviation	p. 19
Accident Category in Aviation	p. 20
Near Misses	p. 21
Risk	p. 21
Safety	p. 22
Reliability	p. 22
Risk Management	p. 23
Incident	p. 23
Airworthiness	p. 23
Quality	p. 23
Airworthiness	p. 24
Availability	p. 24
Aircraft Maintenance	p. 24
Sources and Types of Failure in Aircraft	p. 26
Mechanisms of Failure	p. 26
Causes of Failure	p. 27
Sources of Failure	p. 27
Maintenance System and Tasks	p. 28
Servicing	p. 28
Component Servicing	p. 29
Overhaul	p. 30
Bay Servicing	p. 30

Repair	p. 31
Modification	p. 31
Replacement/Throwaway	p. 31
Functional Testing	p. 32
Calibration	p. 32
Nondestructive Evaluation	p. 32
Avionics Maintenance	p. 32
Software Maintenance	p. 33
Interdependence of Operations and Maintenance	p. 33
Factors Affecting the Airline's Maintenance System	p. 33
Factors Affecting the Military Maintenance System	p. 36
Aircraft Reliability and Maintainability Analysis and Design	
Reliability Fundamental Mathematics	p. 39
Density Function	p. 39
Failure Probability Function	p. 39
Failure Rate	p. 40
Reliability Function	p. 40
Bathtub Curve	p. 40
MTTF	p. 41
Some Common Failure Distributions	p. 41
Exponential Distribution	p. 41
Weibull Distribution	p. 43
Normal Distribution	p. 43
Lognormal Distribution	p. 45
Summary of Often Used Distributions	p. 45
Binary System Reliability Models	p. 45
Series System	p. 45
Parallel System	p. 48
Standby Redundancy System	p. 49
Mechanical Reliability Stress-Strength Interference Model	p. 50
Introduction of Theory	p. 50
Analytical Results	p. 51
Example	p. 52
Fuzzy Reliability Theory	p. 52
Irrationality of Conventional Reliability Theory	p. 52
Fuzzy Reliability Basic Theories	p. 53
Fuzzy Reliability	p. 53
Fuzzy Failure Rate	p. 53
Fuzzy MTBF	p. 54
Hardware Reliability	p. 54

Failure Mechanisms and Damage Models	p. 55
Incorrect Mechanical Performance	p. 55
Incorrect Thermal Performance	p. 55
Incorrect Electrical Performance	p. 56
Electromagnetic Interference	p. 56
Particle Radiation	p. 56
Yield	p. 56
Buckling	p. 57
Fracture	p. 57
Interfacial Deadhesion	p. 58
Fatigue	p. 59
Creep	p. 59
Wear	p. 59
Aging Due to Interdiffusion	p. 60
Aging Due to Particle Radiation	p. 60
Other Forms of Aging	p. 61
Corrosion	p. 61
Metal Migration	p. 62
Maintainability Analysis and Design	p. 63
Definitions Used in Maintainability Engineering	p. 63
Measurements	p. 63
Maintainability Function	p. 64
Often Used Maintainability Distributions	p. 64
Availability Models	p. 64
Effectiveness Models	p. 65
Specification of Maintainability	p. 65
Quantitative Maintainability Clauses	p. 66
Qualitative Maintainability Requirements	p. 66
Choice of a Maintainability Characteristic	p. 67
Assessment and Prediction of Maintainability	p. 68
Maintainability Prediction	p. 68
Prediction Advantages	p. 68
Techniques	p. 69
Basic Assumptions and Interpretations	p. 69
Elements of Maintainability Prediction Techniques	p. 69
Maintainability Design: The Affected Factors	p. 70
Maintainability Design: Criteria	p. 70
Maintainability Design: Allocation	p. 70
Maintainability Design-Limiting Clearance	p. 71
Maintainability Design-Accessibility	p. 72

Maintainability Design-Packaging	p. 72
Maintainability Design-Standardization and Interchange Ability	p. 73
Maintainability Design -Installation-Components Arrangement	p. 73
Maintainability Design-General Criteria	p. 74
Maintainability Demonstration and Testing	p. 75
Maintainability Testing Program	p. 75
Maintainability Demonstration	p. 75
Test Conditions	p. 76
Maintenance Task Selection	p. 76
Maintainability and Reliability Program Activities During the Phases of a Project	p. 76
Definition Phase	p. 76
Design and Development (Including Initial Manufacture)	p. 76
Production	p. 77
Installation and Commissioning	p. 77
Operation-Usage and Maintenance	p. 77
Maintainability Management	p. 78
Responsibilities Interface of Maintainability and Maintenance	p. 78
Maintainability Analysis	p. 78
Maintainability Design	p. 78
Maintainability Administration	p. 78
RCM and integrated Logistic Support	
Introduction	p. 79
Maintenance Analysis Procedures	p. 80
The MSG Series Procedures	p. 80
Reliability-Centered Maintenance	p. 81
MSG-3 Logic	p. 81
Structures	p. 82
Fatigue Damage	p. 83
Environmental Deterioration	p. 83
Accidental Damage	p. 83
Systems and Power Plants	p. 84
Setting Task Frequencies/Intervals	p. 84
Statistical Reliability Assessment	p. 85
Logistic Support Analysis	p. 85
LSA Tasks	p. 86
Failure Mode Effect Analysis	p. 86
Fault Tree Analysis	p. 90
Qualitative Anal/sis of a Fault Tree	p. 93
Quantitative Analysis of a Fault Tree	p. 93
Level of Repair Analysis	p. 95

Logistic Support Analysis Record	p. 95
LSA Models	p. 95
Elements of ILS	p. 96
Support Equipment	p. 96
Facilities	p. 97
Data	p. 97
Intelligent Structural Rating System Based on Back-Propagation Network	
Introduction	p. 99
Artificial Neural Network	p. 102
Basic Theory	p. 102
Back-Propagation Network	p. 103
Design BPN for AD	p. 105
BPN Configuration	p. 105
Case Study	p. 106
Discussion	p. 110
Selection of Number of Nodes in Hidden Layers and Parameter Ratio	p. 111
Selection of Training Algorithms	p. 112
Conclusions	p. 113
Fault Tree Analysis for Composite Structural Damage	
Introduction	p. 115
Basic Principles of Fault Tree Analysis	p. 116
Elements of FTA	p. 117
Boolean Algebra Theorems	p. 117
FTA for Composite Damage	p. 117
Qualitative Analysis	p. 120
Minimal Cut Sets	p. 120
Structure Importance Analysis	p. 121
Probability Importance Analysis	p. 122
Relative Probability Importance Analysis	p. 124
Quantitative Analysis	p. 125
Discussion	p. 128
Potential Solutions	p. 129
Material Design	p. 129
Fabrication Process	p. 129
Personnel Training	p. 130
Surface Protection	p. 130
Damage Evaluation and Life Prediction	p. 130
Conclusions	p. 131
Inspection Interval Optimization for Aircraft Composite Structures Considering Dent Damage	
Introduction	p. 133

Damage Tolerance Philosophy of Composite Structures	p. 135
Properties of Aircraft Composite Structures	p. 135
Maintenance Model of Composite Structures	p. 135
Damage Characterization	p. 137
Data Statistics and Category	p. 137
Damage Size Distribution	p. 138
Probability of Detection (POD)	p. 141
Probabilistic Method	p. 143
Reliability Formulation	p. 143
Monte Carlo Simulation	p. 145
Case Study	p. 145
Average Damages Per Life Cycle (Nd)	p. 145
Load Cases	p. 146
Damage Size and Occurrence Time	p. 146
Inspection Efficiency	p. 147
Residual Strength Reduction and Recovery	p. 147
Other Assumptions and Definitions to Facilitate the Simulation	p. 148
Simulation Results and Discussion	p. 149
Conclusions	p. 151
Repair Tolerance for Composite Structures Using Probabilistic Methodologies	
Introduction	p. 153
Repair Tolerance	p. 157
Probabilistic Method	p. 158
Case Study	p. 162
Load Case	p. 162
Average Damage Per Life Cycle (Nd)	p. 162
Damage Size Distribution	p. 163
Probability of Detection (POD)	p. 163
Inspection Schedule	p. 165
Residual Strength Reduction and Recovery	p. 166
Repair Policy	p. 166
Factor of Safety	p. 166
Probability of Failure (POF)	p. 166
Maintenance Cost	p. 167
Results and Discussion	p. 168
Conclusions	p. 170
Structural Health Monitoring and Influence on Current Maintenance	
Structural Health Monitoring Technology	p. 173
SHM Applications in Aircraft	p. 174
Influence of SHM on Current Maintenance	p. 176

Integration of SHM with MSG-3 Analysis	p. 178
Scheduled Maintenance	p. 179
Scheduled SHM	p. 180
Scheduled CBM	p. 182
CBM	p. 183
Conclusions	p. 184
Maintenance Control and Management Optimization	
Introduction	p. 185
Qualifications of Aircraft Maintenance Personnel	p. 186
Educational Structure and Background	p. 186
International Requirements	p. 187
Australian Civil Aviation Requirements	p. 187
RAAF Requirements	p. 187
Specific Aircraft Type Training	p. 188
Occupational Health and Safety	p. 189
Introduction to Accident Control	p. 189
Hazard Identification	p. 190
Organization for Maintenance Control	p. 191
System of Control	p. 192
Aircraft Tail Number Maintenance Planning	p. 192
Certification of Work Done	p. 193
Maintenance Forms	p. 194
Services	p. 195
Maintenance Schedules	p. 195
Maintenance Planning	p. 195
Reference Data Definitions	p. 197
Example of Airline Maintenance System Development	p. 198
Setting	p. 198
Aircraft Checks	p. 198
Work-Hours and Staffing Assessments	p. 200
Further Development	p. 201
Direct Application	p. 203
The Methodologies of Reliability and Maintainability in the A380 Program	
Introduction	p. 207
Reliability Modeling Approach	p. 209
Reliability Enhancement Process	p. 213
Validation and Verification Process	p. 215
Advanced Maintainability Optimization	p. 219
Conclusions	p. 221
References	p. 223
