Introduction
Thematic Cartography and Geovisualization
What is a Thematic Map?
How are Thematic Maps Used?
Basic Steps for Communicating Map Information
Consequences of Technological Change in Cartography
Geovisualization
Related Techniques
Cognitive Issues in Cartography
Social and Ethical Issues in Cartography
A Historical Perspective on Thematic Cartography
A Brief History of Cartography
History of Thematic Cartography
History of U.S. Academic Cartography
The Paradigms of American Cartography
Statistical and Graphical Foundation
Population and Sample
Descriptive Versus Inferential Statistics
Methods for Analyzing Spatial Data, Ignoring Location
Numerical Summaries in Which Location Is an Integral Component
Principles of Cartography
Data Classification
Common Methods of Data Classification
Using Spatial Context to Simplify Choropleth Maps
Using Multiple Criteria to Determine Class Intervals
Principles of Symbolization
Nature of Geographic Phenomena
Levels of Measurement
Visual Variables
Comparison of Choropleth, Proportional Symbol, Isopleth, and Dot Mapping
Selecting Visual Variables for Choropleth Maps
Scale and Generalization
Geographic and Cartographic Scale
Definitions of Generalization
Models of Generalization
The Fundamental Operations of Generalization
An Example of Generalization
MapShaper: A Free Web-Based Generalization Service
The Earth and Its Coordinate System
Basic Characteristics of the Earth's Graticule
A Brief History of Latitude and Longitude
Determining the Earth's Size and Shape
Elements of Map Projections
The Map Projection Concept
The Reference Globe and Developable Surfaces
The Mathematics of Map Projections
Map Projection Characteristics
Distortion on Map Projections
Projection Properties
Selecting an Appropriate Map Projection
Potential Selection Guidelines
Examples of Selecting Projections
Principles of Color
How Color Is Processed by the Human Visual System
Hardware Considerations in Producing Color Maps for Graphics Displays
Models for Specifying Color
Map Elements and Typography
Alignment and Centering
Map Elements
Typography
Cartographic Design
Cartographic Design
Case Study: Real Estate Site Suitability Map
Map Reproduction
Reproduction Versus Dissemination
Planning Ahead
Map Editing
Raster Image Processing for Print Reproduction
Screening for Print Reproduction
Aspects of Color Printing
High-Volume Print Reproduction
Nonprint Reproduction and Dissemination
Mapping Techniques
Choropleth Mapping
Selecting Appropriate Data
Data Classification
Factors for Selecting a Color Scheme
Details of Color Specification
Legend Design
Classed Versus Unclassed Mapping
Dasymetric Mapping
Selecting Appropriate Data and Ancillary Information
Eicher and Brewer's Work
Mennis and Hultgren's Intelligent Dasymetric Mapping (IDM)
LandScan
Langford and Unwin's Generalized Dasymetric Approach
Isarithmic Mapping
Selecting Appropriate Data
Manual Interpolation
Automated Interpolation for True Point Data
Criteria for Selecting an Interpolation Method for True Point Data
Limitations of Automated Interpolation Approaches
Tobler's Pycnophylactic Approach: An Interpolation Method for Conceptual
Point Data
Symbolization
Proportional Symbol and Dot Mapping
Selecting Appropriate Data For Proportional Symbol Maps
Kinds of Proportional Symbols
Scaling Proportional Symbols
Legend Design for Proportional Symbol Maps
Handling Overlap on Proportional Symbol Maps
Redundant Symbols
Selecting Appropriate Data for Dot Maps
Creating a Dot Map
Multivariate Mapping
Bivariate Mapping
Multivariate Mapping Involving Three or More Attributes
Cluster Analysis
Cartograms and Flow Maps
Cartograms
Flow Mapping
Geovisualization
Visualizing Terrain
Nature of the Data
Vertical Views
Oblique Views
Physical Models
Map Animation
Early Developments
Visual Variables and Categories of Animation
Examples of Animations
Using 3-D Space to Display Temporal Data
Does Animation Work?
Data Exploration
Goals of Data Exploration
Methods of Data Exploration
Examples of Data Exploration Software
Visualizing Uncertainty
Basic Elements of Uncertainty
General Methods for Depicting Uncertainty
Visual Variables for Depicting Uncertainty
Applications of Visualizing Uncertainty
Studies of the Effectiveness of Methods for Visualizing Uncertainty
Web Mapping
A Brief History of Web Mapping
Cartographic Web Sites: A Classification
Tying Together the Five Continua
Virtual Environments
Defining Virtual and Mixed Environments
Technologies for Creating Virtual Environments
The Four "I" Factors of Virtual Environments
Applications of Geospatial Virtual Environments
Research Issues in Geospatial Virtual Environments
Developments in Mixed Environments
Health, Safety, and Social Issues
Trends in Research and Development
Linked Micromap Plots and Conditioned Choropleth Maps
Using Senses Other Than Vision to Interpret Spatial Patterns
Collaborative Geovisualization
Multimodal Interfaces
Information Visualization and Spatialization
Spatial Data Mining
Visual Analytics
Mobile Mapping and Location-Based Services
Keeping Pace with Recent Developments
Appendix: Lengths of One Degree Latitude and Longitude
