Preface: Learning Cognitive Science

Foundations of Cognitive Science

The Goals of Cognitive Science

The Principal Contributing Disciplines

The Architecture of Intelligent Systems

Two Approaches: Reasoning and Search

Methods of Cognitive Research

Invariance of the Laws of Cognition<sup>2</sup>

Conclusion

Notes

References

Foundations

Computing in Cognitive Science

What is Computing?

Computational Methodologies in Cognitive Science: The High Road and the Low Road

Methodologies for Assessing Strong Equivalence

Conclusion: The Domain of Cognitive Science

Notes

References

Symbolic Architectures for Cognition

The Role of the Architecture in Cognitive Science

Requirements on the Cognitive Architecture

The Nature of the Architecture

Example Architectures: Act\* and Soar

The Uses of the Architecture

Conclusions

Notes

References

The Architecture of Mind: A Connectionist Approach

Why Brain-Style Computation?

The State of the Art

References

Grammatical Theory

Relevant Aspects of Formal Language Theory

Transformational Grammar

Major Schools of Generative Grammar

Conclusion

Notes

References

Model-Theoretic Semantics

The Challenge of Semantics

Dimensions of Semantic Analysis

Designed Languages

Extensional Model-Theoretic Semantics

Other Approaches

Notes

References

Further Reading

Experimental Methods in Cognitive Science

General Introduction

Experimental Methods I: Learning and Memory

Experimental Methods II: Language Processing

Concluding Comments

References

Brain and Cognition

Levels of Investigation

Anatomical and Physiological Techniques

General Neurobiological Constraints on Cognitive Mechanisms

Models

Conclusions

Notes

Selected Annotated Readings

References

Domains

Language Acquisition

The Importance of Understanding Language Acquisition

Language Acquisition and Cognitive Science

Input to Language Acquisition

Bootstrapping into Language

The Course of Language Acquisition

Causes of Developmental Changes

Conclusion

References

Reading

Visual Word Identification

Visual Processing in Reading Text

Word Identification in Context

Simulations of the Reading Process

Summary

Notes

References

Discourse

Early Approaches to Discourse Processing

Discourse Structure

Linguistic Indicators of Discourse Structure

Phrase-Level Phenomena

Plan Recognition

Notes

References

Mental Models

Perception as a Source of Mental Models

Mental Models of Discourse

Reasoning and Mental Models

Models as the Representation of Knowledge

A Critique of Mental Models

Conclusion

Note

References

Concepts and Induction

The Basic Picture of Concepts and Categorization

Categorization and Induction

Summary

Notes

References

Problem Solving and Cognitive Skill Acquisition

Knowledge-Lean Problem Solving

Schema-Driven Problem Solving

Major Empirical Findings

Summary

Notes

References

The Computational Study of Vision

Introduction

Low-Level Vision

High-Level Vision

Notes

References

Visual Attention

What Is Attention? What Is Attention For?

Attention and Limited Capacity

Neuropsychology of Spatial Attention

Toward a Computational Theory of Attention

Review

Concluding Remarks

Notes

References

Memory

Approaches to Understanding Memory: Contrasting Viewpoints

Concluding Comments

Notes

References

Action

The Degrees-of-Freedom Problem

Serial Order

Learning

Toward an Integration

Conclusions

Notes

References

Geometrical and Mechanical Issues in Movement Planning and Control

Hand versus Joint Coordinates in the Planning of Movements

The Problem of Dynamics in Natural and Artificial Systems

Muscle Mechanical Properties

Implications of the Virtual Trajectory and Generalization to Multijoint Posture and Movements

Analysis of Multijoint Posture and Movement

Concluding Remarks

Notes

References

Assessment

Cultural Cognition

The Problem of Definition

Polysemy

Paradigmatic Classes

Taxonomy

More on Features

Cultural Models

Color

Emotion

Reasoning and Cultural Models

Final Remarks

References

Some Philosophical Issues in Cognitive Science: Qualia, Intentionality, and the Mind-Body Problem

Mind-Body

Intentionality

Qualia

Subjective-Objective

Some Other Philosophical Issues

Notes
