Glucose Transport

Developmental Expression of Glucose Transporters, GLUT1 and GLUT3, in Postnatal Rat Brain p. 3

Alterations in Brain Glucose Transporter Proteins, GLUT1 and GLUT3, in Streptozotocin Diabetic Rats p. 9

Glucose Transporter (GLUT1) Expression by Canine Brain Microvessel Endothelial Cells in Culture: An Immunocytochemical Study p. 13

Application of Novel PCR Strategies to Amplify and Sequence Glucose Transporters in Canine Brain p. 19

Estimation of Unidirectional Clearances of FDG and Glucose across the Blood-Brain Barrier in Man p. 25

Rat Brain Glucose Concentration and Transport Kinetics Determined With \(^{13}\)C Nuclear Magnetic Resonance Spectroscopy p. 29

Non-Invasive Measurements of the Cerebral Steady-State Glucose Concentration and Transport in Humans by \(^{13}\)C Nuclear Magnetic Resonance p. 35

Electrolyte Transport

Potassium Transport at the Blood-Brain and Blood-CSF Barriers p. 43

Expression of Na,K-ATPase at the Blood-Brain Interface p. 55

Effects of Protein Kinase C Agonists on Na,K-ATPase Activity in Rat Brain Microvessels p. 61

Brain Volume Regulation during Development: The Role of Blood-Brain Barrier Potassium Transport p. 65

The Transendothelial DC Potential of Rat Blood-Brain Barrier Vessels in Situ p. 71

Phosphate Transport in Capillaries of the Blood-Brain Barrier p. 75

Drug and Amino Acid Transport

Drug Delivery to Brain and the Role of Carrier-Mediated Transport p. 83

Vasopressin Modulates the Blood-Brain Transfer of Amino Acids - Studies with \(^{11}\)C Methionine in Dogs p. 95

Amino Acid Transport at the Blood-Nerve Barrier of the Rat Peripheral Nerve p. 101

Effect of Intra-Uterine Growth Retardation on Cerebral Amino Acid Transport from Birth to Adulthood p. 107

Drug Transfer across the Blood-Brain Barrier: Comparison of in Vitro and in Vivo Models p. 113

Differential Brain Penetration of Cerebroprotective Drugs p. 117

P-Glycoprotein Is Strongly Expressed in Brain Capillaries p. 121

Protein Transport

Transport of Proteins Across the Blood-Brain Barrier via the Transferrin Receptor p. 129

Endothelial Cell Biology and the Enigma of Transcytosis through the Blood-Brain Barrier p. 137

Blood-Brain Transport of Vasopressin p. 143

Cerebral Pericytes - a Second Line of Defense in Controlling Blood-Brain Barrier Peptide Metabolism p. 149

Receptors and Intracellular Messengers
The Role of Second Messenger Molecules in the Regulation of Permeability in the Cerebral Endothelial Cells  
Peptidergic Induction of Endothelin 1 and Prostanoid Secretion in Human Cerebromicrovascular Endothelium  
Endothelin-1 Binding to Human Brain Microvascular and Capillary Endothelium: Membranes vs. Intact Cells  
Possible Involvement of C-Kinase in Occurrence of Chronic Cerebral Vasospasm after Subarachnoid Hemorrhage  
A Novel Gene Family May Encode Endothelial Cell Specific Adhesion-Like Molecules: An Extracellular Loop-Repeat-Loop (LRL) Motif and Cytoplasmic Tyrosine Kinase Domains  
Interaction of Brain Endothelial Cells With Other Cells  
Plasminogen Activation and Astroglial-Induced Neural Microvessel Morphogenesis  
Immortalized Rat Brain Microvessel Endothelial Cells: I - Expression of Blood-Brain Barrier Markers during Angiogenesis  
Immortalized Rat Brain Microvessel Endothelial Cells: II - Pharmacological Characterization  
Expression of the HT7 Gene in Blood-Brain Barrier  
Astrocytes Secrete a Factor Inducing the Expression of HT7-Protein and Neurothelin in Endothelial Cells of Chorioallantoic Vessels  
Chorioallantoic Membrane (CAM) Vessels Do Not Respond to Blood-Brain Barrier (BBB) Induction  
Cerebral Endothelium and Astrocytes Cooperate in Supplying Docosahexaenoic Acid to Neurons  
Immunologic Functions  
Effect of Cytokines on ICAM Expression and T Cell Adhesion to Cerebrovascular Endothelial Cells  
Expression of Endothelial Cell Activation Antigens in Microvessels from Patients with Multiple Sclerosis  
Generation of an Anti-Mouse Brain Endothelial Cell Monoclonal Antibody That Recognizes 84-110 kDa and 36 kDa Determinants That Are Upregulated by Cytokines  
Barrier Function and Characteristics  
The Use of Intracerebral Microdialysis to Study Blood-Brain Barrier Transport in Health, after Modification and in Disease  
Cerebral Endothelial Mechanisms in Increased Permeability in Chronic Hypertension  
Altered Fatty Acid Composition of Ethanolamine Phosphoglyceride in Brain Microvessels from Senescent Mouse  
Preirradiation Osmotic Blood-Brain Barrier Disruption Plus Combination Chemotherapy in Gliomas: Quantitation of Tumor Response to Assess Chemosensitivity  
The Uptake of Thyroxine by the Isolated Perfused Choroid Plexus of the Sheep
