The Platelet as a Ca\textsuperscript{2+}-driven Cell: Mechanisms which may Modulate Ca\textsuperscript{2+}-driven Responses p. 1

Agonist Receptors and G Proteins as Mediators of Platelet Activation p. 17

Regulation of Phosphoinositide-Specific Phospholipase C Activity in Human Platelets p. 37

RAP1B and Platelet Function p. 49

Calcium Signalling and Phosphoinositide Metabolism in Platelets: Subsecond Events Revealed by Quenched-Flow Techniques p. 57

Calcium Influx Mechanisms and Signal Organisation in Human Platelets p. 69

Ca\textsuperscript{2+} Homeostasis and Intracellular Pools in Human Platelets p. 83

The Use of Inhibitors of Protein Kinases and Protein Phosphatases to Investigate the Role of Protein Phosphorylation in Platelet Activation p. 105

Serine/Threonine Kinases in Signal Transduction in Response to Thrombin in Human Platelets: Use of 17-hydroxywortmannin to discriminate signals p. 119

Tyrosine Phosphorylation in Platelets: its Regulation and Possible Roles in Platelet Functions p. 129

Evidence that Activation of Phospholipase D can Mediate Secretion from Permeabilized Platelets p. 149

Inositol Lipid Metabolism, the Cytoskeleton, Glycoprotein IIb IIIa and platelets p. 165

Regulation of Platelet Function by the Cytoskeleton p. 175

Cytoskeletal Interactions of Rap1b in Platelets p. 187

Mechanisms Involved in Platelet Procoagulant Response p. 195

Histamine as an Intracellular Messenger in Human Platelets p. 209

Platelet Activation via Binding of Monoclonal Antibodies to the Fc\textgamma Receptor II p. 221

Functional Relationship between Cyclic AMP-Dependent Protein Phosphorylation and Platelet Inhibition p. 229

Role of Cyclic Nucleotide-Dependent Protein Kinases and their Common Substrate VASP in the Regulation of Human Platelets p. 237

The Biological and Pharmacological Role of Nitric Oxide in Platelet Function p. 351

Contributors p. 265

Index p. 267
