

About the author	p. ix
Preface	p. xi
Acknowledgments	p. xiii
Introduction to the student	p. xv
Microbiological media and cultural techniques	p. 1
Preparation of media and sterilization techniques	p. 3
Theoretical information	p. 3
Techniques in the preparation of media	p. 12
Microorganisms in environment	p. 19
Theoretical information	p. 19
Microbial detection techniques from environment	p. 19
Aseptic techniques	p. 25
Theoretical information	p. 25
Types of disinfectants and antiseptics	p. 29
Aseptic transfer techniques in microbiological researches	p. 31
Pure culture techniques	p. 41
Theoretical information	p. 41
Plate culture techniques	p. 42
Culture preservation techniques	p. 51
Theoretical information	p. 51
Preservation techniques	p. 52
Techniques on morphological examination of bacteria	p. 59
Microscope for study of microorganisms	p. 61
Light microscope	p. 61
Uses of microscope	p. 67
Microbial cell measurement technique	p. 71
Theoretical information	p. 71
Cell measurement technique	p. 75
Wet-mount and hanging-drop techniques	p. 83
Theoretical information	p. 83
Microscopic techniques	p. 84
Smear preparation and simple staining techniques	p. 91
Theoretical information	p. 91
Staining techniques	p. 92
Gram staining technique	p. 99
Theoretical information	p. 99
Gram staining	p. 101
Bacterial endospore staining techniques	p. 107
Theoretical information	p. 107
Endospore staining techniques	p. 108
Bacterial capsule staining techniques	p. 115

Theoretical information	p. 115
Capsule staining techniques	p. 116
Motility tests	p. 123
Theoretical information	p. 123
Motility indication techniques	p. 124
Biochemical and cultural characteristics of microorganisms	p. 133
Cultural characteristics of bacteria	p. 135
Theoretical information	p. 135
Techniques used in the indication of cultural characteristics	p. 135
Oxidation and fermentation	p. 143
Theoretical information	p. 143
Fermentation and oxidation tests	p. 145
Hydrolytic reactions	p. 155
Theoretical information	p. 155
Hydrolytic reactions on different substrates	p. 155
Hydrolytic reaction tests	p. 157
Chemical and physical effects on microorganisms	p. 163
Antiseptic and disinfectant effects on microorganisms	p. 165
Theoretical information	p. 165
Antiseptics and disinfectants antimicrobial sensitivity test techniques	p. 166
Antibiotic sensitivity test technique	p. 181
Theoretical information	p. 181
Kirby-Bauer antibiotic sensitivity test technique	p. 182
Effect of hand scrubbing on removal of microorganisms	p. 187
Theoretical information	p. 187
Hand scrubbing	p. 187
Temperature effects on microorganisms	p. 193
Theoretical information	p. 193
Indication of temperature effects on microorganisms	p. 194
Osmotic pressure and pH effects on microorganisms	p. 199
Theoretical information	p. 199
Effects of osmotic pressure and pH on microorganisms	p. 201
Ultraviolet light effects on microorganisms	p. 205
Theoretical information	p. 205
Ultraviolet light application	p. 206
Oxygen effects on microorganisms	p. 211
Theoretical information	p. 211
Determination of oxygen effects on microorganisms	p. 212
Fungi and bacteriophages	p. 219
Morphological characteristics of yeasts and molds	p. 221
Theoretical information	p. 221

Morphological characteristics fungi	p. 225
Isolation, enumeration, and uses of bacteriophages	p. 231
Theoretical information	p. 231
Uses of bacteriophages	p. 232
Life cycle of bacteriophages	p. 234
Bacteriophage culturing techniques	p. 236
Appendix	p. 243
Bibliography	p. 263
Index	p. 267
