| List of Illustrations | p. xiii |
| Acknowledgements | p. xiv |
| Foreword | p. xvi |
| Preface | p. xix |
| Abbreviations | p. xxii |
| Introduction: sustainability - a utopian ideal? | p. 1 |
| Sustainability - an "exhausted" concept? | p. 1 |
| Abandon the concept of sustainability? | p. 4 |
| Abandon liberal democracy? | p. 5 |
| Fierce claims versus frank denial | p. 6 |
| Phase transition towards sustainability | p. 9 |
| Understanding the barriers to sustainability | p. 12 |
| Developing action principles for sustainability | p. 13 |
| Concept of sustainability | p. 16 |
| Heated debate | p. 16 |
| Working definition | p. 19 |
| We do not know how to reach sustainability - three reasons | p. 19 |
| Do not charge policies with the pretension of ultimacy | p. 21 |
| Sustainability as a Utopian ideal which can marginally be reached | p. 22 |
| Planetary boundaries and social injustice | p. 23 |
| Structure of the book | p. 23 |
| Methodological approach | p. 25 |
| Summary | p. 27 |
| Barriers | p. 35 |
| Barriers related to physical reality | p. 39 |
| The problem of EROEI, resources and pollution | p. 39 |
| Complexity | p. 44 |
| Barriers related to the human condition | p. 51 |
| Cognitive limitations: linear and unconnected thinking | p. 51 |
| Moral limitations: greed, selfishness and ignorance | p. 58 |
| Value-action gap | p. 61 |
| Trade-offs | p. 65 |
| Barriers related to social reality | p. 74 |
| System inertness and path dependencies | p. 74 |
| "Meeting the needs of the present" | p. 77 |
| Demand for sustainability starts with the present needs | p. 77 |
| Poverty as multi-dimensional phenomenon | p. 78 |
| The poor suffer most - environmental injustice | p. 79 |
| High ecological footprint or high development - is there no alternative? | p. 80 |
| Populism and fundamentalism | p. 85 |
| Inequalities | p. 91 |

| | |
|--|--------|
| Conflicting interests | p. 97 |
| No framework for resolving conflicting interests on international level | p. 98 |
| Conflicting interests are not always visible | p. 99 |
| Inequalities imply uneven negotiation powers and impede settlements | p. 101 |
| Leadership and power structures | p. 102 |
| Institutional deficiencies | p. 111 |
| Economy: faulty market system | p. 113 |
| Market failure | p. 113 |
| Public goods and the tragedy of the commons | p. 114 |
| Free-riding | p. 117 |
| Externalization societies: shift costs to the weak, to nature, and to the future | p. 120 |
| The pervasiveness of economic thinking | p. 125 |
| Politics: lack of effective governance for global issues | p. 134 |
| Challenges of IGOs and multilateral international treaties | p. 135 |
| Geopolitics and the struggle of establishing a world order | p. 146 |
| Law: Insufficient institutions and the challenge of the common good | p. 159 |
| Sustainability concerns not institutionalized | p. 160 |
| Limiting of individual liberties for the sake of the common good? | p. 163 |
| Betterment of individual rights compared to public goods | p. 163 |
| Challenges to the concept of the common good | p. 164 |
| Technology: mismatch between impact and governance | p. 172 |
| Structural silos: fragmentation of knowledge, administration and responsibility | p. 180 |
| Fragmentation of knowledge | p. 180 |
| Fragmentation of administration | p. 182 |
| Fragmentation of responsibility | p. 183 |
| Zeitgeist-dependent Barriers | p. 191 |
| Short-term orientation and acceleration | p. 193 |
| Consumerism | p. 198 |
| Action principles | p. 205 |
| Why action principles? | p. 207 |
| A change in perspective - take the actor's view | p. 207 |
| Why principles for sustainable action? | p. 208 |
| Types of principles | p. 210 |
| Nature-related principles | p. 212 |
| Decarbonize | p. 212 |
| Reduce environmental impact by efficiency, sufficiency and consistency | p. 214 |
| Efficiency and sufficiency | p. 215 |
| Consistency | p. 217 |
| Be "net-positive" - build up environmental and societal capital! | p. 218 |
| Prefer local, seasonal, plant-based and labour-intensive | p. 220 |
| Polluter-pays principle | p. 223 |

| | |
|---|--------|
| Precautionary principle | p. 226 |
| Appreciate and celebrate the beauty of nature | p. 228 |
| Personal principles | p. 236 |
| Why personal principles matter | p. 236 |
| Practice praxis and contemplation | p. 238 |
| Be not too certain - and apply policies cautiously | p. 241 |
| Celebrate frugality | p. 243 |
| Society-related principles | p. 247 |
| Grant the least privileged the greatest support | p. 247 |
| Seek mutual understanding, trust and multiple wins | p. 248 |
| Strengthen social cohesion and collaboration | p. 250 |
| Engage the stakeholders | p. 252 |
| Foster education - share knowledge and collaborate | p. 254 |
| Systems-related principles | p. 258 |
| Apply systems thinking | p. 258 |
| Think holistically | p. 260 |
| Think long-term and decelerate | p. 260 |
| Think global - promote local | p. 262 |
| Foster diversity | p. 263 |
| Increase transparency of the publicly relevant | p. 265 |
| Maintain or increase option diversity | p. 268 |
| Conclusion: sustainable action principles trigger phase transition | p. 273 |
| Summary: overcoming the barriers | p. 273 |
| The goal: future of terra and humanity - Futeranity | p. 276 |
| Three challenges to the SDG process | p. 276 |
| The Utopian ideal of sustainability is Futeranity | p. 278 |
| Sustainable action principles facilitate Futeranity | p. 281 |
| The critical role of the actors for a transition towards sustainability | p. 283 |
| Outlook: change is coming | p. 284 |
| Index | p. 286 |
