

Preface	p. xiii
Acknowledgment	p. xvii
Author	p. xix
Nanoscale Ceramics	p. 1
Introduction	p. 1
Confinement and Functional Change in Nanoscale	p. 2
Density of States	p. 2
Confinement and Band Gap	p. 3
Surface Area to Volume	p. 6
Surface Atom Density	p. 8
Surface Energy and Dangling Bonds	p. 9
Gibbs Free Energy and Critical Radius	p. 10
Cohesive Energy	p. 11
Lattice Parameters and Strains	p. 13
Frequency	p. 15
Velocity and Motion in Fluid	p. 16
Classification of Ceramics	p. 17
Traditional Ceramics	p. 19
Advanced Ceramics	p. 20
Rationale of Energy, Environment, and Health Materials	p. 22
Handling and Ethical Issues	p. 23
Concluding Remarks	p. 24
References	p. 25
Material Characterizations	p. 27
Introduction	p. 27
Thermal Analysis	p. 27
Differential Scanning Calorimetry and TG Patterns	p. 28
Specific Heat Capacity	p. 30
Enthalpy Change	p. 31
Kinetics and Activation Energy of Crystallization	p. 31
X-Ray Diffraction Analysis	p. 33
Indexing and d-Spacing	p. 34
Theoretical Density	p. 36
Phase Identification and Quantification	p. 38
Crystallite Size and Microstrain	p. 39
Transmission Electron Microscopic Analysis	p. 41
Indexing of Polycrystal	p. 44
Indexing of Single Crystal	p. 44
Morphology, d-Spacing, and Indexing of WO ₃	p. 45
Particle Size and Surface Area	p. 46
Statistical Analysis of Particle Size	p. 46

Surface Area and Particle Pore Size	p. 48
Spectroscopy Analysis	p. 50
Photoluminescence Spectra	p. 51
Raman Spectroscopy	p. 54
X-Ray Photoelectron Spectroscopy	p. 55
Ultraviolet Visible and Diffuse Reflection Spectroscopy	p. 58
Fourier Transformation Infrared	p. 61
Concluding Remarks	p. 63
References	p. 63
Surface and Suspension Phenomena	p. 67
Introduction	p. 67
Surface Wetting	p. 68
Contact Angle and Hysteresis	p. 68
Critical Parameters for Superhydrophobic Surface	p. 71
Critical Parameters for Superhydrophilic Surface	p. 72
Critical Boundary in Hydrophilic and Hydrophobic Surface	p. 72
Surface Tension	p. 74
Surface Tension Estimation Protocols	p. 74
Critical Surface Tension	p. 76
Influence of Foreign Elements in Surface Tension	p. 76
Colloidal Suspension	p. 79
Electrical Double Layer	p. 80
Electrostatic Stabilization	p. 81
Steric Stabilization	p. 82
Electrosteric Stabilization	p. 84
Zeta Potential and Isoelectric Point of SiO ₂ and MgO: Influence of pH	p. 85
Zeta Potential and Isoelectric Point of ZrO ₂ : Influence of pH and Particle Size	p. 86
Packing Fraction and Sedimentation	p. 86
Viscosity of Suspension	p. 88
Rheology of Suspensions	p. 89
Particle Size and Volume Fraction on Viscosity	p. 90
Concluding Remarks	p. 92
References	p. 93
Photocatalytic Phenomena	p. 95
Introduction	p. 95
Photocatalyst for Photo-Degradation	p. 95
Band Gap and Valence Band-Conduction Band Position	p. 96
Electron-Hole Charge Transportation Phenomena	p. 98
Role of Scavenger	p. 100
Surface Modifications	p. 100
Influence of Particle Size	p. 102

Photocatalyst for Photo-Electrochemical Cell	p. 103
Regenerative Photo-Electrochemical Cell (Solar Cells)	p. 103
Photo-Synthetic Solar Cells	p. 105
Electrochemical Photo-Electrolytic Cells	p. 105
Electrochemical Photocatalytic Cells	p. 106
Semiconductor-Electrolyte Interaction and Band Bending	p. 106
Conventional Materials for Photo-Electrochemical Cells	p. 107
Output and Governing Parameters for Photo-Electrochemical Cells	p. 107
Concluding Remarks	p. 113
References	p. 113
Magnetics and Piezoelectrics	p. 117
Introduction	p. 117
Magnetic Phenomena	p. 119
Magnetic Moment	p. 119
Ferrimagnetic Behavior of Soft and Hard Ferrites	p. 120
Superparamagnetic Behavior	p. 121
Magnetization and Hysteresis	p. 123
Magnetocrystalline Anisotropic Constant (K)	p. 124
Specific Loss Powers	p. 125
Magneto-resistance Change	p. 126
Exchange-Spring Magnet	p. 127
Particle Size Effect on Magnetic Saturation	p. 128
Piezoelectric Phenomena	p. 129
Ferroelectric Behaviors	p. 130
Dielectric Permittivity and Loss	p. 132
Piezoelectric Constants	p. 133
Role of Grain Size on Dielectrics and Piezoelectrics	p. 138
Concluding Remarks	p. 141
References	p. 142
Mechanical Properties	p. 145
Introduction	p. 145
Elastic Moduli	p. 145
Single Phase Nanocrystalline Ceramics	p. 146
Multi-Phase Nanocrystalline Ceramics	p. 148
Relation in Elastic Modulus and Porosity	p. 149
Effect of Grain Size and Porosity	p. 150
Strength	p. 151
Compressive Strength	p. 151
Flexural Strength	p. 153
Effect of Grain Size on Strength	p. 154
Effect of Porosity on Strength	p. 155

Weibull Modulus	p. 156
Fracture Toughness	p. 158
Competitive Single Edge "V" Notch Beam and Indentation Toughness	p. 159
Effect of Grain Size on Toughness	p. 161
Hardness	p. 163
Vickers Indentation	p. 164
Hardness by Penetration Depth	p. 164
Effect of Grain Size	p. 166
Effect of Load	p. 167
Fatigue of Ceramics	p. 168
Superplasticity	p. 169
Friction and Wear	p. 170
Concluding Remarks	p. 172
References	p. 172
Nanostructured Ceramics for Renewable Energy	p. 175
Introduction	p. 175
Nanostructured TiO ₂ for Solar to Electrical Energy, Dye-Sensitized Solar Cell	p. 176
Background	p. 176
Importance of Nanostructured TiO ₂ , Anatase	p. 177
Materials and Methods	p. 178
Working Principle of Dye-Sensitized Solar Cell	p. 178
Characterization and Analysis	p. 179
Research and Development Scope	p. 181
Nanostructured WO ₃ /TiO ₂ for H ₂ Gas through H ₂ O Splitting, Tandem	p. 182
Background	p. 181
Importance of Dual Semiconductors	p. 182
Materials and Methods	p. 183
Working Principle	p. 183
Characterization and Analysis	p. 184
Research and Development Scope	p. 185
Nanostructured WO ₃ /TiO ₂ for Solar to Electrical Energy and Harvesting, Photovoltaically Self-Charging	p. 186
Background	p. 186
Materials and Methods	p. 187
Working Principle	p. 188
Characterization and Analysis	p. 189
Research and Development Scope	p. 190
Nanostructured ZrO ₂ for Gaseous Fuel to Electric Energy	p. 190
Background	p. 190
Importance of Nanostructured YSZ	p. 191
Materials and Method	p. 192
Working Principle	p. 192

Characterization and Analysis	p. 194
Research and Development Scope	p. 195
Nanostructured BaTiO ₃ for Mechanical to Electrical Energy	p. 195
Background	p. 195
Importance of Nanostructured BaTiO ₃	p. 196
Materials and Method	p. 196
Working Principle	p. 197
Characterization and Analysis	p. 198
Research and Development Scope	p. 199
Concluding Remarks	p. 199
References	p. 200
Nanostructured Ceramics for Environment	p. 201
Introduction	p. 201
Nanostructured WO ₃ for Electrochromic Smart Glass	p. 202
Background	p. 202
Materials and Method	p. 203
Working Principle	p. 203
Characterization and Analysis	p. 204
Research and Development Scope	p. 206
Nanostructured WC ₃ -ZnO for Pollutant Dye Degradation	p. 206
Background	p. 206
Materials and Method	p. 207
Working Principle	p. 207
Characterization and Analysis	p. 209
Research and Development Scope	p. 211
Mechanically Induced Waste Water Treatment	p. 211
Background	p. 211
Materials and Method	p. 213
Working Principle	p. 213
Characterization and Analysis	p. 214
Research and Development Scope	p. 215
Purification of High Salinity Waste Water	p. 216
Background	p. 216
Materials and Methods	p. 217
Working Principle	p. 217
Characterization and Analysis	p. 218
Research and Development Scope	p. 219
Self-Cleaning Coating	p. 219
Background	p. 219
Importance of Nanostructured TiO ₂ for Self-Cleaning	p. 220
Materials and Methods	p. 220

Working Principle	p. 220
Characterization and Analysis	p. 222
Research and Future Scope	p. 222
Concluding Remarks	p. 223
References	p. 223
Nanostructured Ceramics for Health	p. 225
Introduction	p. 225
Nanostructured ZrO ₂ for Dental Ceramic Blank	p. 226
Background	p. 226
Advantages of Nanostructured Zirconia	p. 227
Materials and Method	p. 227
Characterization and Analysis	p. 227
Research and Development Scope	p. 229
Nanostructured Zirconia Toughened Alumina Femoral Ball Head	p. 230
Background	p. 230
Advantage of Nanostructured Zirconia Toughened Alumina	p. 230
Materials and Method	p. 231
Characterization and Analysis	p. 231
Research and Development Scope	p. 233
Nano Hydroxyapatite-Gelatin Porous Bone Scaffold	p. 234
Background	p. 234
Advantage of Nano Hydroxyapatite in Scaffold	p. 235
Materials and Method	p. 235
Characterization and Analysis	p. 235
Research and Development Scope	p. 237
Nanostructured ZnO for Cancer Therapy	p. 238
Background	p. 238
Advantages of Nanostructured Hollow ZnO	p. 238
Materials and Method	p. 239
Working Principle	p. 239
Characterization and Analysis	p. 241
Research and Development Scope	p. 242
Nanoscale Core-Shell Ferrite for Hyperthermia	p. 242
Background	p. 242
Advantages of Core-Shell Nanoparticles	p. 243
Materials and Method	p. 243
Working Principle	p. 244
Characterization and Analysis	p. 244
Research and Development Scope	p. 246
Concluding Remarks	p. 246
References	p. 247

Problems and Answers

p. 251
