B-Cell Development
Progenitor and Precursor B Lymphocytes of Mice. Proliferation and Differentiation In Vitro and Population, Differentiation and Turnover in SCID Mice In Vivo of Normal and Abnormal Cells
Isolation and Characterization of a Stromal Cell Line
Growth and Differentiation of a Bipotent Precursor of B Cells and Macrophages
Control of Intramarrow B-Cell Genesis by Stromal Cell-Derived Molecules
Establishment of a Reproducible Culture Technique for the Selective Growth of B-Cell Progenitors
Multiple Steps in the Regulation and Dysregulation of B-Cell Precursors in the Bone Marrow: c-myc Expression, In Vivo Effects of Interleukins 1 and 7, and Stromal Cell Interactions
The Purification of B-Cell Precursors From Mouse Fetal Liver
BCR/ABL Enhances Growth of Multipotent Progenitor Cells But Does Not Block Their Differentiation Potential In Vitro
Repopulation of SCID Mice with Fetal-Derived B-Lineage Cells
Early B-Cell Repertoires
In Vitro Growth and Maturation of Human B-Cell Precursors
Modulation of Signal Transduction in Phosphocholine-Specific B cells from [mu][kappa] Transgenic Mice
Immunoglobulin Gene Rearrangement
Activities Involved in V(D)J Recombination
Double-Strand Breaks Associated with V(D)J Recombination at the TCR[delta] Locus in Murine Thymocytes
Replication, Transcription, CpG Methylation and DNA Topology in V(D)J Recombination
Rearrangement and Expression of Immunoglobulin Genes in Transgenic Mice
Regulation of Switch Recombination to the Murine [gamma] 1 Gene
Protein Recognition Motifs of S[gamma]3 DNA Are Statistically Correlated with Switch Recombination Breakpoints
Regulation of Transcription of the Germline Immunoglobulin [alpha] Constant Region Gene
S[alpha]BP/BSAP/NF-S[alpha] B[subscript 1], a Murine and Human B-Cell Stage Specific Nuclear Factor with DNA Binding Specificity Implying Roles in Switch-Recombination and Transcription
Multiple Myeloma, Plasmacytomas
Multidrug Resistance of a Continuously Differentiating Monoclonal B Lineage in the Blood and Bone Marrow of Patients with Multiple Myeloma
Expression of Multiple Adhesion Molecules on Circulating Monoclonal B Cells in Myeloma
Circulating Peripheral Blood Plasma Cells in Multiple Myeloma
Circulating B Lymphocytes in Multiple Myeloma Patients Contain an Autocrine IL-6 Driven Pre-Myeloma Cell Population
In Which Cells Does Neoplastic Transformation Occur in Myelomatosis?
Differential Expression of c-myc-mRNA and c-MYC-Protein During Terminal Neoplastic B-Cell Differentiation

Genes Expressed Selectively in Plasmacytomas: Markers of Differentiation and Transformation

PCS, a Gene Related to the Immunoglobulin Super Family of Axonal Glycoproteins is Expressed in Murine Plasma Cell Tumors

Inhibiting IL-6 in Human Multiple Myeloma

Pathophysiology of Human Multiple Myeloma - Recent Advances and Future Directions

An Exceptional Mouse Plasmacytoma with a New Kappa/N-myc [T(6; 12) (C1; B)] Translocation Expresses N-myc But Not c-myc

Experimental Model of Human Light-Chain-Associated Disease

Lymphomas: B-CLL, Follicular Lymphomas BCL-2, BCL-1

On the Role of Endogenously Produced TNF-[alpha] and IL-6 as Regulators of Growth and Differentiation of B-Type Chronic Lymphocytic Leukemia Cells in Vitro

BCL-2 in B-Chronic Lymphocytic Leukemia

Subcellular Localization of BCL-2 Protein

Collaboration of PIM-1 and BCL-2 in Lymphomagenesis

The Role of bcl-2 in Lymphoid Differentiation and Neoplastic Transformation

Evolution of Leukemic Heterogeneity of Human B-CLL Lymphocytes Between and Within Patients

p53 Mutations in B-Cell Chronic Lymphocytic Leukemia

Burkitts Lymphoma Cells Frequently Carry Monoallelic DJ Rearrangements

Centrocytic Lymphoma: a B-Cell Non-Hodgkin's Lymphoma Characterized by Chromosome 11 BCL-1 and PRAD 1 Rearrangements

Two Surface Antigen Targets for Immunotoxin-Mediated Elimination of Normal and Neoplastic Murine B Cells

Generation and Differentiation Potential of Retrovirus-Immortalized Mature Murine B Cells

The Role of Growth Factors in Human Lymphomas

Production of Interleukin-6 in High Grade B Lymphomas

Lymphomas: EBV, AIDS Associated Lymphomas

Mutational Analysis of the Transforming Function of the EBV Encoded LMP-1

Integration of EBV in Burkitt's Lymphoma Cells

The Oncogenic Potential of Epstein-Barr Virus Nuclear Antigen 1 in Transgenic Mice

AIDS Associated Non-Hodgkin's Lymphomas Represent a Broad Spectrum of Monoclonal and Polyclonal Lymphoproliferative Processes

Lymphomas in Mice with Retrovirus-Induced Immunodeficiency

Does HIV Infection of B Lymphocytes Initiate AIDS Lymphoma? Detection by PCR of Viral Sequences in Lymphoma Tissue

Oncogenes and Transcriptional Factors

Lymphocyte Activation and the Family of NF-[kappa]B Transcription Factor Complexes
Transactivation of the c-myc Gene by HTLV-1 tax is Mediated by NF-κB p. 421

Cloning and Characterization of DNA Binding Factors Which Bind Sequences Required for Proper c-myc Initiation p. 425

Transcriptional Activities of the Myc and Max Proteins in Mammalian Cells p. 435

c-myc Transactivates the Ornithine Decarboxylase Gene p. 445

v-Raf/v-Myc Synergism in Abrogation of IL-3 Dependence: v-Raf Suppresses Apoptosis p. 453

Cyclins in the Cell Cycle: An Overview p. 461

The Localization of the Products of the c-cbl and v-cbl Oncogenes During Mitosis and Transformation p. 467

V-rel and C-rel Modulate the Expression of Both Bursal and Non-Bursal Antigens on Avian B-Cell Lymphomas p. 475

Why Don't Germline Mutations in RB1 Predispose to Leukemia? p. 485

Loss of p53 Expression in Myc-induced B Lineage Tumors p. 493
