The history of drugs for the treatment of Parkinson's disease  p. 1
In vitro and in vivo experiments - what is more informative?  p. 7
Trichloroharmanes as potential endogenously formed inducers of Morbus Parkinson: synthesis, analytics, and first in vivo-investigations  p. 15
Neurotoxicity and neuroprotection in Parkinson's disease  p. 27
Therapy of Morbus Parkinson and radical-induced neurotoxicity in the rat: in vivo voltammetric studies  p. 45
Synergism of NBQX with dopamine agonists in the 6-OHDA rat model of Parkinson's disease  p. 55
Behavioural pharmacology of glutamate in the basal ganglia  p. 65
Dystonia - a clinical, neuropathological and therapeutic review  p. 91
Early diagnosis in Parkinson's disease  p. 105
Mental disorders in Parkinson's disease  p. 115
Modern therapy of Parkinson's disease  p. 129
