Serotonin-Dopamine Interactions in the Central Nervous System
Serotonin-Dopamine Interaction: an overview
Serotonin control of central dopaminergic function: focus on in vivo microdialysis studies
Serotonin-Dopamine Interaction: electrophysiological evidence
Functional genetic polymorphisms in serotonin and dopamine gene systems and their significance in behavioural disorders
Serotonin-Dopamine Interactions in Schizophrenia
Distribution of 5-HT and DA receptors in primate prefrontal cortex: implications for pathophysiology and treatment
Alterations of dopamine and serotonin transmission in schizophrenia
Serotonin and dopamine interactions in psychosis prevention
Role of serotonin and dopamine receptor binding in antipsychotic efficacy
In vivo actions of atypical antipsychotic drug on serotonergic and dopaminergic systems
Neuropharmacology of second-generation antipsychotic drugs: a validity of the serotonin-dopamine hypothesis
Serotonin-dopamine interactions: implications for the design of novel therapeutic agents for psychiatric disorders
Serotonin-Dopamine Interactions in Depression
The dorsal raphe nucleus and serotonin -implications for neuroplasticity linked to major depression and Alzheimer's disease
Dynamics of the dopaminergic system as a key component to the understanding of depression
Physiological and therapeutic relevance of constitutive activity of 5-HT2A and 5-HT2C receptors for the treatment of depression
The role of dopamine and serotonin in suicidal behaviour and aggression
Serotonin-Dopamine Interactions In Drug Addiction
Prospects for serotonin 5-HT2R pharmacotherapy in psychostimulant abuse
Pharmacological inhibition of dopamine- and serotonin activity blocks spontaneous and cocaine-activated behaviour
Serotonin receptors as potential targets for modulation of nicotine use and dependence
Dopamine/Serotonin releasers as medications for stimulant addictions
PTEN-5-HT2C coupling: A new target for treating drug addiction
Serotonin-Dopamine Interactions in Motor Disorders
Serotonin modulation of the basal ganglia circuitry: therapeutic implication for Parkinson's disease and other motor disorders
Serotonin-Dopamine interaction in the induction and maintenance of LDOPA-induced dyskinesias
Parkinson's disease - opportunities for novel therapeutics to reduce the problems of levodopa therapy
Neurobiological basis of serotonin-dopamine antagonists in the treatment of Gilles de la Tourette syndrome
Serotonin-Dopamine Interactions in Attentional Processes, Learning and Memory
Serotonergic and dopaminergic modulation of attentional processes
Dopamine-serotonin interactions in attention-deficit/hyperactivity disorder (ADHD)
Serotonin/dopamine interaction in learning
Serotonin-dopamine interaction in memory formation
The roles of dopamine and serotonin, and of their receptors, in regulating sleep and waking
