Preface

Acknowledgements

Microenvironment of the Brain: Blood - Interstitial Fluid - CSF

A role for centrally-released vasopressin in brain ion and volume regulation: a hypothesis p. 3

Neuronal plasticity depending on a glycoprotein synthesized in goldfish leptomeningeal p. 7

Goldfish ependymins: cerebrospinal fluid proteins of meningeal origin p. 13

Effect of central administration of angiotensin II on cerebrospinal fluid formation in rabbits p. 19

Adrenalectomy aggravates ischemic brain edema in female Sprague-Dawley rats with carotid arteries ligated p. 23

Central release of vasopressin: stimuli, dynamics, consequences p. 29

Pregnancy and opioid interactions with the anterior peri-third ventricular input to magnocellular oxytocin neurones p. 41

Endogenous opioids regulate intracerebral oxytocin release during parturition in a region-specific manner p. 55

Evidence against participation of V₁ receptors in the increase of cerebral blood flow during hypoxemia in the rat p. 59

ANF-induced modulation of ADH-release in the rabbit and Pekin duck p. 63

Vasopressin involvement in central control of blood pressure p. 69

Neuropeptides within the nucleus tractus solitarii modulate the central cardiovascular control process p. 75

Disturbances of volume regulation in chronic alcoholics: a correlation with the excitability of the central nervous system p. 81

Chromatographically identified oxytocin in the human peripheral nervous system p. 85

Central effects of tricyclic compounds on the endocrine system - an in vitro study p. 89

Barriers within the Brain: Transport - Exchange

Intracerebral grafting of solid tissues and cell suspensions: the blood-brain barrier and host immune response p. 95

Blood-brain barrier: a molecular approach to its structural and functional characterization p. 103

Development of an in vitro cell culture system to mimic the blood-brain barrier p. 117

The development of ion regulation at the blood-brain barrier p. 123

An approach to study of transport of trace metals at the blood-brain barrier p. 133

Bidirectional passage of peptides across the blood-brain barrier p. 139

Localization patterns for immunoglobulins and albumins in the brain suggest diverse mechanisms for their transport across the blood-brain barrier (BBB) p. 149

Peptide receptors of the blood-brain barrier and substrate transport into the brain p. 155

The interaction of some centrally active drugs with the blood-brain barrier and circumventricular organs p. 163
Experimental models of altering the blood-brain barrier p. 171
Regulation of transendothelial transport in the cerebral microvessels: the role of second messengers-generating systems p. 177
Age-related pathophysiology of the blood-brain barrier in heat stress p. 189
Release of endogenous neurochemicals may increase vascular permeability, induce edema and influence cell changes in trauma to the spinal cord p. 197
Tracer uptake by circumventricular organs - a relative measure of blood supply to the brain p. 205
Density of perfused capillaries in living human brain during functional activation p. 209
Circumventricular Organs: Receptors and Effectors
Circumventricular organ capillaries p. 219
Signals indicative of metabolic change in circumventricular organs p. 235
Somatostatin-binding sites on structures of circumventricular organs p. 247
Atrial natriuretic factor in the subfornical organ and the organum vasculosum laminae terminalis p. 251
Neurotransmitters and receptors in the subfornical organ. Immunohistochemical and electrophysiological evidence p. 261
Steroid hormones and circumventricular organs p. 271
Choroid plexus, ependyma and arachnoidea express receptors for vitamin D: differences between "seasonal" and "non-seasonal" breeders p. 279
Receptor and effector mechanisms in the pineal organ p. 285
Cytochemistry of CSF-contacting neurons and pinealocytes p. 299
Comparative ultrastructure and opsin immunocytochemistry of the retina and pineal organ in fish p. 307
Circadian rhythm and pharmacologic regulation of the monodeiodination of 3,3', 5,5'-tetraiodothyronine in the pineal gland p. 315
Response of CFU-GM (colony forming units for granulocytes and macrophages) from intact and pinealectomized rat bone marrow to murine recombinant interleukin-3 (rIL-3), recombinant granulocyte-macrophage colony stimulating factor (rGM-CSF) and human recombinant erythropoietin (rEPO) p. 323
Immunocytochemical demonstration of serotonin-immunoreactive cerebrospinal fluid-contacting neurons in the paraventricular organ of pigeons and domestic chickens p. 327
The bovine subcommissural organ: cytochemical and immunochemical characterization of the secretory process p. 331
Developmental neuron-glia interactions: role of serotonin innervation upon the differentiation of the ependymocytes of the rat subcommissural organ p. 343
Development of the median eminence during ontogenesis (morphofunctional aspects) p. 349
Neuro-hemal and neuro-glial specificities in the neural lobe of the pituitary gland p. 357
Non-vasopressinergic, non-oxytocinergic neuropeptides in the rat hypothalamo-neurohyphophyseal tract: experimental immunohistochemical studies p. 367
Drug metabolizing enzymes in the rat pituitary gland p. 373
Circumventricular Organs and Brain Fluids: Systemic and Behavioral Aspects

Integrative mechanisms and the maintenance of cardiovascular and body fluid homeostasis: the central processing of sensory input derived from the circumventricular organs of the lamina terminalis (p. 381)

Efferent neural pathways of the lamina terminalis subserving osmoregulation (p. 395)

The role of OVLT in fever and antipyresis (p. 403)

Role of the OVLT in the febrile response to circulating pyrogens (p. 409)

Neurophysiological analysis of mechanisms for subfornical organ and area postrema involvement in autonomic control (p. 413)

Functional hypothalamic angiotensin II and catecholamine receptor systems inside and outside the blood-brain barrier (p. 423)

Progressive increases of protein synthesis in the circumventricular organs during chronic dehydration in rats (p. 435)

Aspects of normal cerebrospinal fluid circulation and circumventricular organs (p. 439)

Effects of vasoactive intestinal polypeptide on choroid plexus blood flow and cerebrospinal fluid production (p. 445)

Effect of arginine vasopressin on blood vessels of the perfused choroid plexus of the sheep (p. 451)

Neuropeptides in the cerebrospinal fluid and regulation of behavior (p. 455)

Neurohypophyseal hormone receptors: relation to behavior (p. 459)

The human hypothalamus in development, sexual differentiation, aging and Alzheimer's disease (p. 465)

Subject Index (p. 473)
