Insulin secretion in NIDDM

The role of insulin resistance in Korean patients with metabolic and cardiovascular diseases

Glucokinase gene in NIDDM

Glucose transporter expression in diabetes

Insulin resistance and obesity

Insulin resistance and hypertension-relationship between insulin secretion and resistance elucidated by double clamp study

The present status of diabetes education in Japan

The present status of diabetes education in Korea

The present status of diabetes camp in Japan

Prevalence of diabetes mellitus in Funagata, Japan, population based-study using an OGTT as a primary test

Body weight changes of non-insulin dependent diabetic patients in Korea

Screening method for diabetes mellitus in the aged group

Characteristics of diabetes mellitus in elderly urban residents

An ELISA for islet cell autoantibodies (ICA) in IDDM and non-obese NIDDM

The clinical characteristics of Korean adult-onset diabetes with ICSA and the effect of ICSA on insulin secretion in isolated rat islets

The heterogeneity of islet cell cytoplasmic antibodies evidenced by absorption test with rat brain glutamic acid decarboxylase

Autoantibodies to glutamic acid decarboxylase in long-term insulin-dependent diabetic patients

Prevention of diabetes mellitus with [beta]-1,6;1,3 D-glucan in NOD mice

Effect of antiadhesion molecule antibody on pancreatic islets transplantation

Effect of insulin on function and PDGF production of human umbilical vein endothelial cell

Lp(a) and coagulation - Fibronolysis system in diabetics

Carotid atherosclerosis in NIDDM, IDDM, patients with impaired glucose tolerance (IGT)

Fibrinolytic activity and plasma lipoprotein (a) levels in patients with type 2 diabetes mellitus

Acute cholecystitis in patients with diabetes mellitus

Mononuclear cell manganese superoxide dismutase (Mn-SOD) activity in patients with diabetes mellitus

Red cell Na\(^{+}\)Li\(^{+}\) countertransport in NIDDM patients with nephropathy

Relationship between platelet function and diabetic retinopathy

Pulse wave velocity (PWV) and diabetic complications

Prevalence of micro- and macroabuminuria in relation to hypertension and chronic diabetic vascular complications among NIDDM patients

Detection of delayed micropotential in NIDDM patients using signal averaged electrocardiography

Clinical role of hypoxia in NIDDM patients with end-stage renal failure
Arterial oxygen saturation during sleep in patients with non-insulin dependent diabetes mellitus

Follow-up study for diabetic autonomic neuropathy

Histopathological findings of muscles and nerves in the cases of diabetes mellitus with diabetic amyotrophy

Follow-up study of diabetic retinopathy by fundus photography according to the mode of treatment

Plasma ANP level in patients with NIDDM

Molecular variations of Korean insulin genes

Analysis of insulin gene region in Japanese IDDM patients

Evaluation of glucokinase gene in Japanese NIDDM

Mutations of glucokinase gene in patients with Japanese late-onset non-insulin-dependent diabetes mellitus

Genetic factors associated with insulin resistance in hypertensive patients

Low frequency of human cytomegalovirus genome in Korean diabetic patients

Some features of nonobese insulin resistant NIDDM patients

Early metabolic defects in the offspring of non-insulin dependent diabetes mellitus patients

"Obese" NIDDM in normal body weight subjects

The effect of phlorizin and acipimox on insulin resistance in STZ diabetic rats

Longitudinal studies of glucose intolerance in spontaneously diabetic NSY mice

The reversibility of insulin secretion after exposure to exogenous insulin and interleukin-1[beta] in isolated rat islets

Lack of feedback inhibition of insulin secretion in patients with insulinoma

The influence of feedback inhibition of insulin secretion by insulin itself in isolated rat islets

The [alpha] anomer of a sweet taste inhibitor inhibits glucose-induced insulin release in normal islets but not in NIDD islets

The effect of furosemide on insulin secretion and content in isolated rat pancreatic islets

Aging and [beta]-cell replication in rat pancreas

Effect of insulin on the subcellular distribution of GTP-binding proteins in rat adipocytes

Improved insulin sensitivity and responsiveness after long-term physical training in aged subjects

Hepatic insulin extraction in NIDDM patients and obese non-diabetic subjects

Effects of aging on pancreatic A cell function in diabetes mellitus

The effect of CS-045 on fructose-2,6-biophosphate content in rat hepatocytes

Effects of chloroquine on glucose metabolism and insulin secretion in rats

Transplantation of pancreatic islets microencapsulated with new polymer capsule into streptozotocin-induced diabetic rats
Long term effect of pravastatin, a HMG-CoA reductase inhibitor, on blood lipids of hyperlipidemic diabetics in Hanshin diabetes pravastatin study group p. 277

Long-term clinical applications of ferrocene-mediated needle-type glucose sensor covered with newly designed biocompatible membrane p. 281

Effect of glucose on lipoprotein (a) production in Hep G2 cells p. 287

Serum Apo(a) concentrations in patients with NIDDM p. 291

Apoprotein changes in the macrovascular complication of the NIDDM patients p. 295

Hyperlipidemia in type II diabetes mellitus relationship to glycemic control p. 299

Apolipoprotein E genotypes in diabetes mellitus p. 303

A comparative study on food exchange programs between Korea and Japan p. 309

Involvement of factors on diabetics' knowledge about self-management p. 313

Age estimate of self-care independence of children and adolescents with IDDM in diabetes camp p. 317

Factors concerning with the knowledge of patients given diabetes education p. 321

Audio-visual education for the diabetic patient: Beneficial or not-beneficial? p. 325

Effect of nutrition education with food exchange cards p. 329

Clinical characteristics and possible risk factors in postrenal transplant diabetes mellitus p. 335

Doppler flow velocity wave form analysis of peripheral arteries in patients with NIDDM p. 339

Effect of oral glucose tolerance test on serum electrolytes and myocardium in the elderly p. 343

Increased urinary fibronectin excretion in patients with diabetes p. 347

Usefulness of new vibrometer SMV5 and new heart rate variation analyzer SRR5 p. 351

Insulin sensitivity in non-diabetic offspring of Korean NiDDM patients p. 359

The acute effect of fatty acids on insulin clearance in non-obese healthy young men p. 363

Tolbutamide inhibits glucagon-induced phosphorylation of the liver 6-phosphofructo-2-kinase/Fructose-2,6-bisphosphatase p. 367

Epidemiological and clinical features of diabetic ketoacidosis in Korean diabetic patients p. 373

Effect of tissue cultured ginseng on glucose utilization in the rat skeletal muscle p. 377

Effects of high-calorie diet and streptozotocin on insulin resistance in spontaneously hypertensive rats (SHR) p. 381

A new rat strain with non-insulin dependent diabetes mellitus, Otsuka Long-Evans Tokushima Fatty (OLETF) p. 385

The insulin resistance in Otsuka Long-Evans Tokushima Fatty (OLETF), a new spontaneous NIDDM model rat strain p. 389

Immunohistochemical distribution of glucose transporters in rat embryo during early organogenesis p. 393

Insulin response and perinatal outcome in women with one abnormal glucose tolerance test value p. 397
1,5-anhydroglucitol, in comparison of various parameters p. 401
Clinical application of exercise testing system on type II diabetes p. 405
Index of authors p. 409
