List of Contributors

Preface

The gene knockout technology for the analysis of learning and memory, and neural development p. 3

Molecular biology of transmissible spongiform encephalopathies p. 15

Molecular genetic analyses of myelin deficiency and cerebellar ataxia p. 23

Gene expression of serotonergic neurons in the central nervous system: molecular and developmental analysis p. 43

The involvement of PKC and multifunctional CaM kinase II of the post-synaptic neuron in induction and maintenance of long-term potentiation p. 55

Neuronal calcium channels encoded by the [alpha][subscript 1A] subunit and their contribution to excitatory synaptic transmission in the CNS p. 65

Synaptic vesicle proteins and regulated exocytosis p. 79

The molecular organization of voltage-dependent K[superscript +] channels in vivo p. 87

Decoding Ca[superscript 2+] signals to the nucleus by multifunctional CaM kinase p. 95

Kainate-induced changes in gene expression in the rat hippocampus p. 105

Mechanisms of neuronal plasticity as analyzed at the single cell level p. 117

Plasticity and commitment in the developing cerebral cortex p. 129

Growth factors in the CNS and their effects on oligodendroglia p. 145

Social control of cell size: males and females are different p. 171

The differentiation and function of the touch receptor neurons of Caenorhabditis elegans p. 179

Functions of the L2/HNK-1 carbohydrate in the nervous system p. 183

Neurotrophic factors and their receptors p. 189

Induction of non-catalytic TrkB neurotrophin receptors during lesion-induced synaptic rearrangement in the adult rat hippocampus p. 197

Plasticity of developing neuromuscular synapses p. 211

A RT-PCR study of gene expression in a mechanical injury model p. 219

Stimulation of phospholipase A[subscript 2] expression in rat cultured astrocytes by LPS, TNF[alpha] and IL-1[beta] p. 231

Correlation between proto-oncogene, fibroblast growth factor and adaptive response in brain infarct p. 239

Gene expression in astrocytes during and after ischemia p. 245

Gene expression of neurotropic retrovirus in the CNS p. 255

Cholecystokinin octapeptide (CCK-8): a negative feedback control mechanism for opioid analgesia p. 263

The transport of neurotransmitters into synaptic vesicles p. 273

Preliminary molecular neurobiology study on the pathogenesis of primary epilepsy p. 283

Expression of immune-related molecules in a murine genetic demyelinating disease p. 289
Expression of myelin proteolipid protein in oligodendrocytes and transfected cells
Glial fibrillary acidic protein mRNA and the development of gliosis in mice with chronic relapsing experimental allergic encephalomyelitis
Structure and function of peripheral nerve myelin proteins
The molecular basis of the neuropathies of mouse and human
Expression of the neurofibromatosis type 1 (NF1) gene during mouse embryonic development
