**Biochemistry, Molecular Biology and Mechanisms of Action**

**The importance of [alpha][subscript 1]-adrenergic mechanisms in regulating nocturnal pineal melatonin synthesis**  p. 3

**Intrapineal circadian oscillator(s), cyclic nucleotides and melatonin production in pike pineal photoreceptor cells**  p. 11

**Light-induced regulation of hydroxyindole-O-methyltransferase messenger RNA levels in the chicken pineal gland**  p. 19

**Adrenergic regulation of N-acetyltransferase activity in the pineal gland of young rats**  p. 25

**Pineal melatonin production and pituitary-adrenal axis**  p. 29

**The melatonin pathway in blood platelets**  p. 35

**Melatonin antagonism to calmodulin may modulate multiple cellular functions**  p. 41

**Phase-shifting the chick pineal rhythm in thymidine incorporation**  p. 47

**Microdialysis in the rat pineal gland: In vivo monitoring of melatonin, its precursors and norepinephrine**  p. 51

**Thyroxine metabolism in the mammalian pineal gland**  p. 55

**Melatonin Receptors**

**Melatonin: Hormonal signal to cellular response**  p. 61

**The rabbit parietal cortex: A model for studying the melatonin signal transduction and mechanism of action in the central nervous system**  p. 69

**Characterization of binding sites for 2-[(superscript 125)I]-iodomelatonin in murine mammary tissue**  p. 75

**Melatonin binding sites in rat thymus during development**  p. 79

**Binding sites for [(superscript 3)H] pinoline**  p. 83

**Melatonin and 5-methoxytryptophol binding sites in the retina**  p. 87

**Interactions of GABA, benzodiazepines and melatonin in the photosensory pineal organ of salmonid fish**  p. 95

**Melatonin regulation of melatonin receptor density in rat pars tuberalis and suprachiasmatic nuclei**  p. 99

**Seasonal changes in melatonin binding sites in the pars tuberalis of the European hamster**  p. 105

**Effects of oxazepam on the diurnal variations of brain iodomelatonin binding sites and serum testosterone levels in pinealectomized and sham operated rats**  p. 109

**Melatonin Analogs**

**A potent naphthalenic melatonin receptor agonist**  p. 117

**Characterization of S-20098, a new melatonin analog**  p. 123

**The melatonin agonist, S20098: Effects on the rat circadian system**  p. 127

**Synthesis and characterization of 2-bromomelatonin, a potent melatonin agonist**  p. 131

**Intracellular sodium regulates agonist-melatonin receptor interactions in the chick retina**  p. 137

**Rhythm Entrainment and Response to Light**

**Circadian effects of melatonin in rats: An update**  p. 143
Melatonin: A durational signal regulating steroid-dependent and -independent aspects of limbic and hypophyseal function p. 151
Efferent projections of the suprachiasmatic nucleus and the transmission of photoperiodic information to the pineal gland p. 159
Melatonin secretion on quail provides a seasonal calendar but not one used for photoperiodic time-measurement p. 163
Does melatonin rhythm control circadian rhythm in body temperature and locomotor activity of desynchronized rats? p. 169
Entraining effects of melatonin on locomotor activity, temperature, and 6-sulphatoxymelatonin rhythms p. 173
Rat serum melatonin rise and fall: Influence of morning light p. 179
Circadian rhythms of indoleamines in a dinoflagellate, Gonyaulax polyedra: Persistence of melatonin rhythm in constant darkness and relationship to 5-methoxytryptamine p. 183
Rhythms in melatonin biosynthesis under constant light and darkness: Comparative in vivo studies on chicken retina and pineal gland p. 187
Inverse relationship between dopamine and melatonin concentration in the intact chicken eye p. 191
Inhibition of nocturnal melatonin by artificial light in pinealectomized pigeons p. 195
Effect of photoperiod on the daily rhythm of pineal and/or circulating melatonin and 5-Methoxytrytophol (ML) concentrations in the European hamster, Cricetus cricetus p. 199
Use of melatonin to assess and treat circadian phase disorders p. 205
Can light augment melatonin? p. 211
Early bright light exposure: Effect on plasma melatonin patterns measured in subjects held in 24-h constant conditions p. 215
Phase delay of rhythm of 6-sulfatoxy-melatonin excretion by bright light improves sleep and performance p. 219
Comparison of the effects of exposure to bright light during five days vs. one single day on the sleep propensity function p. 225
Simulation of circadian rhythm disturbance associated with jet-lag and shift work using moderately bright light p. 229
Use of white and red light treatment to adapt to phase-shift in Antarctica (Halley Base, 75 degree South) p. 233
A single afternoon or evening melatonin infusion advances the endogenous melatonin secretion in humans p. 235
Melatonin Effects and Pharmacology
Sites of action of melatonin involved in the seasonal control of reproduction in the ewe p. 243
Re-initiation of ovulatory activity by melatonin given as a constant-release implant in long-day treated Ile-de-France ewes, depends on endogenous secretion of melatonin p. 247
Oestrous cyclicity and coat growth in goats: Effect of melatonin or bromocriptine p. 251
Benzodiazepine antagonism abolishes melatonin effects on rodent behavior p. 255
Melatonin actions in mouse mammary gland p. 261
Melatonin and other indolic substances: Their influence on thyroid growth and secretion  p. 265

Effects of melatonin injections on the circadian rhythm of local cerebral glucose utilization in the Syrian hamster brain: A quantitative study with [Superscript 14]C-2-deoxyglucose  p. 269

Melatonin potentiates cyclic AMP production stimulated by vasoactive intestinal peptide in human lymphocytes  p. 273

Effects of pineal and intracranial surgery on the adrenal medulla: Quantitative morphological and immunohistochemical studies  p. 277

Roles of melatonin and light in the mechanisms of action promoting melanosome movements in Xenopus laevis melanophores  p. 281

Melatonin inhibits forskolin stimulated testosterone secretion by hamster Leydig cells in primary culture  p. 285

Insulin-like growth factor-I in the Syrian hamster: Circadian rhythm and effects of melatonin  p. 289

Immune System and Cancer

Melatonin and the immune system  p. 295

Neurohormonal modulation of cancer growth by pineal melatonin  p. 303

Depleted pineal melatonin production in patients with primary breast and prostate cancer is connected with circadian disturbances of central hormones: Possible role of melatonin for maintenance and synchronization of circadian rhythmicity  p. 311

The hepatic metabolism of melatonin in the rat: Phenobarbital and polyaromatic hydrocarbons are inducers of the hydroxylation of melatonin  p. 317

Clinical Perspectives

A brief overview of new areas of pineal research and some old ones revisited  p. 323

The physiological secretion pattern of melatonin in man  p. 331

Melatonin/norethisterone contraception  p. 339

Plasma melatonin (M) and sulfatoxymelatonin (aMT6s) kinetics after transmucosal administration to humans  p. 347

The effects of melatonin on the timing of sleep in patients with delayed sleep phase syndrome  p. 351

Sex-related effects of exogenous melatonin on the pulsatile secretion of prolactin, TSH and LH in healthy human subjects  p. 355

The effects of morning or evening administration of pipotiazine on the circadian rhythms of plasma melatonin and prolactin in schizophrenic patients  p. 359

Circadian melatonin rhythm in patients with paranoid schizophrenia and obsessive-compulsive disorder  p. 363

Melatonin excretion is decreased in menstrual migraine  p. 367

Plasma melatonin and cortisol circadian rhythms in epileptic patients  p. 371

Melatonin circadian rhythm and hormonal phases interaction in human pregnancy  p. 375

Circadian pattern of melatonin and cortisol secretion in physiological and pathological cerebral aging  p. 379

Night-shift work affects circadian rhythms of melatonin, prolactin and LH  p. 383
Posture: A possible masking factor of the melatonin circadian rhythm - p. 387
Comparison of plasma and salivary melatonin levels in high frequency sampling
Index of Authors p. 391
