

Introduction	
Introduction	p. 1
Diffusion Type Problems	
Diffusion-Type Problems (Parabolic Equations)	p. 6
Boundary Conditions for Diffusion-Type Problems	p. 11
Derivation of the Heat Equation	p. 15
Separation of Variables	p. 19
Transforming Nonhomogeneous BCs to Homogeneous Ones	p. 24
Solving More Complicated Problems by Separation of Variables	p. 31
Transforming Harder Problems into Easier Ones	p. 37
Solving Nonhomogeneous PDEs (Eigenfunction Expansions)	p. 45
Integral Transforms (Sine and Cosine Transforms)	p. 53
The Fourier Series and Transform	p. 59
The Fourier Transform and Its Applications to PDEs	p. 68
The Laplace Transform	p. 73
Duhamel's Principle	p. 78
The Convection Term in Diffusion Problems	p. 84
Hyperbolic Type Problems	
The One-Dimensional Wave Equation (Hyperbolic Equations)	p. 89
The d'Alembert Solution of the Wave Equation	p. 92
More on the d'Alembert Equation	p. 96
Boundary Conditions Associated with the Wave Equation	p. 103
The Finite Vibrating String (Standing Waves)	p. 107
The Vibrating Beam (Fourth Order PDE)	p. 117
Dimensionless Problems	p. 125
Classification of PDEs (Canonical Form of Hyperbolic Equations)	p. 132
The Wave Equation in Two and Three Dimensions (Free Space)	p. 138
The Finite Fourier Transforms (Sine and Cosine Transforms)	p. 144
Superposition (The Backbone of Linear Systems)	p. 152
First-Order Equations (Method of Characteristics)	p. 156
Nonlinear First-Order Equations (Conservation Equations)	p. 163
Systems of PDEs	p. 169
The Vibrating Drumhead (Wave Equation in Polar Coordinates)	p. 175
Elliptic Type Problems	
The Laplacian (an Intuitive Description)	p. 183
General Nature of Boundary Value Problems	p. 192
Interior Dirichlet Problem for a Circle	p. 198
The Dirichlet Problem in an Annulus	p. 210
Laplace's Equation in Spherical Coordinates (Spherical Harmonics)	p. 218
A Nonhomogeneous Dirichlet Problem (Green's Function)	p. 228
Numerical and Approximate Methods	

Numerical Solutions (Elliptic Problems)	p. 233
An Explicit Finite-Difference Method	p. 238
An Implicit Finite-Difference Method (Crank-Nicolson Method)	p. 242
Analytic versus Numerical Solutions	p. 244
Classification of PDEs (Parabolic and Elliptic Equations)	p. 248
Monte Carlo Methods	p. 254
Monte Carlo Solutions of Partial Differential Equations	p. 260
Calculus of Variations (Euler-Lagrange Equations)	p. 265
Variation Methods for Solving PDEs (Method of Ritz)	p. 270
Perturbation Methods for Solving PDEs	p. 276
Conformal Mapping Solutions of PDEs	p. 282
