

## Physiology

Fetal extracellular fluids and lymphatic function

Fetal swallowing: contributing to fetal and amniotic fluid homeostasis

Amniotic fluid volume regulation

Developmental and function of the fetal kidney

Changes in renal function at birth

## Pathophysiology

Renal function in fetal growth retardation

Renal agenesis and congenital urine flow

## Clinical Applications

Hydrops fetalis

Potential for correction of fetal obstructive uropathy

Correction of polyhydramnios and oligohydramnios

Management of postnatal disorders of fluid balance
