Preface to the first edition
Preface to the second edition
Materials: structure, properties and performance
Elasticity and viscoelasticity
Plasticity
Imperfections: point and line defects
Imperfections: interfacial and Volumetric defects
Geometry of deformation and work-hardening
Fracture: macroscopic aspects
Fracture: microscopic aspects
Fracture testing
Solid solution, precipitation and dispersion strengthening
Martensitic transformation
Speciality materials: intermetallics and foams
Creep and superplasticity
Fatigue
Composite materials
Environmental effects
