Introduction

The continuity equation

Density and gravity

Numerical solutions of partial differential equations

Stress and strain

The momentum equation

Viscous rheology of rocks

Numerical solutions of the momentum and continuity equations

The advection equation marker-in-cell method

The heat conservation equation

Numerical solution of the heat conservation equation

2-D thermomechanical code structure

Elasticity and plasticity

2-D implementation of visco-elastic-plastic rheology

The multi-grid method

Programming of 3-D problems

Numerical benchmarks

Design of 2-D numerical geodynamic models

Epilogue: outlook
