Introduction to the Scientific Writings	ix
A Theory of the Foundations of Thermodynamics (1903)	1
On a Heuristic Point of View Concerning the Production and Transformation of Light (1905)	18
On the Motion of Small Particles Suspended in Liquids at Rest Required by the Molecular-Kinetic Theory of Heat (1905)	33
On the Electrodynamics of Moving Bodies (1905)	43
Does the Inertia of a Body Depend upon Its Energy Content? (1905)	72
On the Theory of Light Production and Light Absorption (1906)	75
Planck's Theory of Radiation and the Theory of Specific Heat (1907)	82
On the Relativity Principle and the Conclusions Drawn from It (1907)	93
On the Present Status of the Radiation Problem (1909)	147
On the Development of Our Views Concerning the Nature and Constitution of Radiation (1909)	165
On the Influence of Gravitation on the Propagation of Light (1911)	181
Thermodynamic Proof of the Law of Photochemical Equivalence (1912)	191
Experimental Proof of Ampère's Molecular Currents (1915) with W. de Haas	198
Explanation of the Perihelion Motion of Mercury from the General Theory of Relativity (1915)	202
The Foundation of the General Theory of Relativity (1916)	212
Approximative Integration of the Field Equations of Gravitation (1916)	265
On the Quantum Theory of Radiation (1916)	275
Hamilton's Principle and the General Theory of Relativity (1916)	289
Cosmological Considerations in the General Theory of Relativity (1917)	296
On Gravitational Waves (1918)	307
On the Foundations of the General Theory of Relativity (1918)	323
The Law of Energy Conservation in the General Theory of Relativity (1918)	326
Does Field Theory Provide Possibilities for the Solution of the Quantum Problem? (1923)	339
Quantum Theory of the Monatomic Ideal Gas (1924)	346
Quantum Theory of the Monatomic Ideal Gas. Second Paper (1925)	354
Unified Field Theory of Gravitation and Electricity (1925)	369
Patent of Refrigerator (1927) with L. Szilard	376
Unified Field Theory Based on Riemannian Metric and Distant Parallelism (1930)	384
On the Cosmological Problem of the General Theory of Relativity (1931)	398
On the Relation between the Expansion and the Mean Density of the Universe (1932) with W. de Sitter	402
Elementary Derivation of the Equivalence of Mass and Energy (1935)	404
Can Quantum-Mechanical Description of Physical Reality Be Considered Complete? (1935) with B. Podolsky and N. Rosen	412
The Particle Problem in the General Theory of Relativity (1935) with N. Rosen	420

Lens-like Action of a Star by the Deflection of Light in a Gravitational Field (1936) 431
On a Generalization of Kaluza's Theory of Electricity (1938) with P. Bergmann 433
The Gravitational Equations and the Problem of Motion [Excerpt] (1937) with L. Infeld and B. Hoffmann 455
On the Non-Existence of Regular Stationary Solutions of Relativistic Field Equations (1943) with W. Pauli 486
Relativistic Theory of the Non-symmetric Field (1955) 494
Bibliography 521
Index 527
