Preface

Conference Organisation

Fourier Transform Scanning Tunneling Spectroscopy Studies of the Electronic Structure of Superconducting Bi$_2$Sr$_2$CaCu$_2$O$_{8+\delta}$

Visualizing the Influence of Interactions on the Nanoscale: Simple Electron Systems

Energy Resolved Imaging of Fullerene Molecular Orbits

Energy-Filtered Scanning Tunneling Microscopy Using a Semiconductor Tip

Theory of STM-Induced Light Emission from Na Overlayers on Cu

Manipulation and Detection of Electron Spins by Magnetic Resonance Force Microscopy

Spin Polarized Surface States of Cobalt Nanoislands on Cu(111)

Atomic Force Microscopy on Its Way to Adolescence

Three-Dimensional Force Field Spectroscopy

Ultra High-speed Scanning Probe Microscopy Capable of Over 100 Frames per Second

Functionalized One Dimensional Wires and Their Interconnections

Properties of Boron Nitride Nanotubes

Understanding the Hopping Mechanism of Molecule Cascades at Very Low Temperatures

Force, Current and Field Effects in Single Atom Manipulation

From Single Atoms to Nanoparticles--Spectroscopy on the Atomic Level

Single Molecules, Single Nanoparticles and Their Optical Interaction

Chemistry of Single Molecules at Surfaces

Supramolecular Engineering of Metal-Organic Networks at Surfaces

Scanning Probe Surface Modification: Chemical Conversion of Terminal Functional Groups on Organosilane Self-assembled Monolayers

Folding, Structure and Function of Biological Nanomachines Examined by AFM

Insulated Conductive Probes for in situ Experiments in Structural Biology

Scanning Force Microscopy Studies of the Adsorption and Desorption of DNA at Solid-Liquid Interfaces

CD-Rom Only

Radio Frequency Circuitry for Atomic Force Microscopy up to 100 MHz

Cryogenic Magnetic Force Microscope

Low-Temperature Ultrahigh-Vacuum Atomic Force Microscope

Development of a Near-Field Magneto-Optical Microscopy for Studying Ultrafast Magnetization Dynamics

SNOM Set-up to Study Surface Plasmons on Nanostructured Surfaces

Low Budget UHV STM Built by Physics Students for Use in a Laboratory Exercises Course

Nano-scale Force Feedback Manipulator

Tuning Fork AFM with Conductive Cantilever
2-Dimension PZT Cantilever Array with New Piezoelectric Readback Method for Low Power and High Speed Nano-Data-Storage Application p. 234
Cantilever Based SNOM Probes with Structured Apertures p. 242
Technology "WhiskerProbes" p. 247
Tungsten Deposited Scanning Probe Microscope Tips for Critical Dimension Measurement p. 256
Microfabrication of Silicon/Ceramic Hybrid Cantilever for Scanning Probe Microscope and Sensor Applications p. 264
Scanning Probe Microscopy Markup Language p. 271
A Batch Fabricated SECM-AFM Probe p. 279
Oxide-sharpened Silicon Nitride Cantilever Probe p. 285
Fabrication of Metal Coated Carbon-Nanotube Probe for Highly Conductive Tip p. 292
Fabrication of Magnetic Probes for Spin-Polarized STM Studies of the Fe[\textsubscript{3}O[\textsubscript{4}](001) and (111) Surfaces p. 298
Microfabrication of Gallium Arsenide Cantilever for Scanning Probe Microscope Application p. 306
Resolution of Magnetic Force Microscope with Metal-Capped Carbon Nanotube Tips p. 313
High Resolution Magnetic Tips and Integrated Multi-Wire Probes for Scanning Probe Microscopy p. 320
Development and Applications for the Remote Controllable Atomic Force Microscope p. 328
Nanofabrication of Al-coated Oxide Aperture for NSOM Using Isotropic Etching Technique p. 336
Nanometer-Scale Properties of Electrochromic Films Investigated by Current-Sensing Scanning Near-Field Optical Microscopy p. 343
In-situ Measurement of In-Plane and Out-of-Plane Force Gradient with a Torsional Resonance Mode AFM p. 349
Torsional Resonance Mode Imaging for High-Speed Atomic Force Microscopy p. 357
STM in a Gel Environment p. 365
A High Resolution Multiple Analysis Approach Using Near-Field Thermal Probes p. 369
Tuning the Tip-Sample Forces in Dynamic Atomic Force Microscopy p. 377
Marking the Difference: Interferometric Detection vs Optical Beam Deflection in AFM p. 385
Effect of Probe Quality Factor on the Sensitivity of Variable Temperature Magnetic Force Microscopy p. 392
Detecting Fluorescence of Protein Molecules Picked up at the Tip of AFM Probe p. 396
Investigation of Enzyme Activities of the Enzyme Immobilized on an AFM Tip p. 401
Atomic Force Microscopy as a Tool for Applied Virology and Microbiology p. 405
Conductive AFM as Nano Tester for DNA Molecules p. 411
Temperature Dependent AFM of Single Lipid and Mixed Lipid-Peptide Bilayers p. 416
Different Membrane Modifications Revealed by AFM/LFM after Doping of Pancreatic Cells with Cd, Zn or Pb

Atomic Force Microscopy for Investigation of Ribosome-inactivating Proteins' Type II Tetramerization

In-Situ Observation of Freeze Fractured and Deep Etched Red Blood Cells with a High-Vacuum Low-Temperature Atomic Force Microscope

Force Analyses of the Interaction between the Surface of a Living Cell and Modified AFM Probes

Development of a Gene Transfer Technique Using AFM

Tip-Induced Artifacts Associated with the AFM Imaging of Lipid Vesicles

Scanning Probe Microscopy of DNA on Mica and Graphite

Self-Assembly of Epicuticular Waxes on Living Plant Surfaces by Atomic Force Microscopy

Importance of Substrate for Biological Imaging by AFM at Low Temperature

Low Roughness Values of RBCs Membrane in Cells with Cytoskeleton Alterations

Measurement of the Physical and Chemical Properties of Hybrid Lipid Membranes with the Atomic Force Microscope

DNA and Other Thread-like Objects SPM Image Recognition and Automatic Length Calculation by Means of Stochastic Geometry

Scanning Tunnelling Microscopy and Spectroscopy on Alkali Doped Copper Phthalocyanine

A Study of Alkanedithiol Films on Au(111) by STM-induced Luminescence

In situ EC-AFM Observation on Pb Electrodes in Sulfuric Acid Solution with or without Lignin

STM Studies on Nanosized Porphyrin Wheels at the Solid-Liquid Interface

Structure and Ordering of a Molecule Layer with Adsorbate-Induced Reconstruction: C(subscript 60)/Ag(100)

Growth of Organic Molecules on Ferromagnetic Metallic Substrates--A Combined STM/AFM Study

The AFM Observation of Single Polyethylene Molecules in Coiled State on Mica

Stability of the Self-Organized Two-Dimensional Structures of Porphyrin and Phthalocyanine Derivatives on Graphite for the Directed Arrangement of Rotaxanes

Theoretical Predictions of Transport Properties of Oligoporphyrin Molecular Bridges

Nano-patterning on Flat Surfaces by AFM Tip

Tunneling Currents through a Single Molecule Isolated in a New Matrix

Atomic Scale Simulations of Silicon Nanotubes under Axial Compression: AFM Application

Measurements of Electrical Conductivity of a Nanometer-Scale Water Meniscus by Atomic Force Microscopy

SPM Probing of Interfacial Strengths of Individual Carbon Nanotubes in a Polymer Matrix

A Study of Nanocontact Printing Using Adhesive Force Mapping
The Factors Influence Investigation on a Tip-Induced Oxidation Process and Its Applications for Nanoscale Image Creation p. 594
STM at the Liquid/Solid and Air/Solid Interface: Exploring 2D Phase-Behavior, Templating, and Tip-Induced Reactivity p. 602
Data Evaluation for Spin-Polarized Scanning Tunneling Spectroscopy Measurements p. 608
Noise Spectroscopy of a Single Spin with Spin Polarized STM p. 615
MFM Study of Locally Modified Interlayer Exchange Coupling in Fe/Cr/Fe Trilayers p. 623
Surface Morphology and Magnetic Anisotropy p. 629
The Computer Analysis of MFM Images of Separate Ferromagnetic Nanoparticles p. 634
Enhancement of Superconductivity in a Nanosized Bridge Formed by an STM Tip p. 642
Imaging of the (Mn$^{2+}$) Complex in GaAs by Cross-Sectional Scanning Tunneling Microscopy p. 650
STM-BH Imaging of Subsurface Dopant Atoms on Hydrogen-Terminated Si(111) p. 656
Novel C Induced Structures on Si(111) p. 663
Scanning Probe Microsystems for the Electrical Characterization of GaAs pn Junctions p. 669
Digital Alloy InGaAs/InAlAs Laser Structures Studied by Cross-Sectional Scanning Tunneling Microscopy p. 677
Carriers in 2D-Semiconductor Structures: A Scanning Capacitance Microscopy Study p. 685
Determination of Electron Transport Parameters in Al[subscript 0.3]Ga[subscript 0.7]As by Scanning-Tunneling-Microscope Light-Emission Spectroscopy p. 691
Room-Temperature Observation of Standing Electron Waves on GaAs(110) at Surface Steps p. 699
Simulation of XSTS Imaging of Self-Assembled Quantum Dot Electronic States p. 707
New Structural Model of the Si(112)6x1 Ga Interface p. 715
Electronic States Origin of Electrochemical Capacitances of Nanostructures p. 728
The Hidden Properties of the Au(100) Surface p. 734
The Origin of the Structural Phase Transition in the Growth of Ultra-thin Bi Films on Si(111) p. 738
Surface Localization of Alloy Phases Using Electrostatic Force Microscopy p. 745
Theoretical Analysis of the Bias Voltage Dependence of Apparent Barrier Height p. 752
Scanning Tunneling Microscope Study of Structural Transformations on One Monolayer Pb/Si(111) p. 760
Forces and Currents between Two Metal Surfaces p. 768
STM Studies of Self-Organization of Ge Nanoislands and Nanostrips before Formation Wetting Layer on Si(111) Surfaces p. 775
Studies of the Facetting of the Polished (100) Face of CaF$_2$ p. 783
A Study of Polycrystalline W Surface with STM/STS p. 791
Energy-Level Splitting of Ligand-Stabilized Au$_{55}$ Clusters Observed by Low-Temperature Scanning Tunneling Spectroscopy p. 795
Correlation between Photoactivity and STM Topographic Parameters of TiO$_2$ Polycrystalline Film p. 802
In Situ-STM of Growth, Atomic and Electronic Structure of Thin NiO Films on Ag(001) at Elevated Temperatures (350-475 K) p. 810
The Influences of Tip Scan and Tunneling Current by Adsorbing Kr on a Si (111)-7x7 Surface at Low Temperature p. 818
Gold Nanoparticles on Al$_2$O$_3$/Nb(110): An STM Study of Dynamic Charging Effects at Room Temperature p. 823
Ballistic Electron Emission Spectroscopy Used as a Tool for Determining Accurate Hot-Electron Lifetimes in Metals p. 829
An STM Study of the 2x7 Dysprosium-Silicide Nanowire Superstructure on Si(001) p. 837
Co Growth on Ag/Cu Striped Nanostructures p. 845
VT STM Investigations of Ag Film Growth on Bi$_2$Te$_3$: An STM Study of Dynamic Charging Effects at Room Temperature p. 853
Identification of Individual Iron Atoms within a Permalloy Surface: Surface State Dispersion p. 859
Polaronic Superlattice Formed on Oxidised Magnetite (111) Surface p. 865
Charge Ordering on the ([radical]2 x [radical]2)R45$^0$ Reconstructed Fe$_3$O$_4$ (001) Surface p. 873
Contaminants Induced Onset of Nanostripes and Nanotrenches on the Fe$_3$O$_4$(001) Surface p. 879
STM/STS Observations of Atomic Impurities in High-T$_c$ Superconductor Bi$_2$Sr$_2$CaCu$_2$O$_{y}$ Single Crystals p. 888
Inhomogeneity of Tunneling Spectroscopy on Bi$_2$Sr$_2$CaCu$_2$O$_{8+delta}$ Single Crystals p. 894
Damping Contribution in the Interaction between Probe and Ligand-Stabilized Clusters in NC-AFM p. 899
Polarization Properties of Fully Metal Coated Scanning Near-Field Optical Microscopy Probes p. 906
Light Emission Intensity Imaging of Individual InAs/AlGaAs Quantum Dots Using Scanning Tunneling Microscope p. 911
Electroluminescence Spectra of an STM-Tip-Induced Quantum Dot p. 919
STM-Induced Luminescence Spectra from Au(111) with STM Tips of Pt-Ir Alloys p. 927
First-Principles Theory for Quantum Transport and Field Emission of Nanostructures p. 934
First-Principles Calculation of Electron Emission from Adsorbed Atoms on Metallic Electrode p. 942
A Theoretical Analysis of Scanning Capacitance Microscopy p. 947
Nonlinear Analysis of Electrostatic Force Microscopy p. 955
Dynamic Image Forces near Semiconductor-Vacuum Interfaces: Role of Quantum-Mechanical Corrections p. 963
Selective Resonance-Tunneling Microscopy  p. 971
Symmetry-Break-Induced Variation of Energy-Level Degeneracy Observed on Individual Molecules by Low-Temperature STM  p. 979
Author Index  p. A1
