Introduction
Biography of Claude Elwood Shannon.
Profile of Claude Shannon _ Interview by Anthony Liversidge
Bibliography of Claude Elwood Shannon
Communication Theory, Information Theory, Cryptography
Preface to Part A
Papers
A Mathematical Theory of Communication
Communication Theory of Secrecy Systems
Analogue of the Vernam System for Continuous Time Series
The Best Detection of Pulses (With
The Philosophy of PCM
Communication in the Presence of Noise
Communication Theory _ Exposition of Fundamentals
General Treatment of the Problem of Coding
The Lattice Theory of Information
Discussion of Preceding Three Papers
Recent Developments in Communication Theory
Prediction and Entropy of Printed English
Efficient Coding of a Binary Source With One Very Infrequent Symbol
Information Theory
The Zero Error Capacity of a Noisy Channel
Certain Results in Coding Theory for Noisy Channels
Some Geometrical Results in Channel Capacity
A Note on a Partial Ordering for Communication Channels
Channels With Side Information at the Transmitter
Probability of Error for Optimal Codes in a Gaussian Channel
Coding Theorems for a Discrete Source With a Fidelity Criterion
Two-Way Communication Channels (With
Lower Bounds to Error Probability for Coding on Discrete Memoryless Channels I (With
Lower Bounds to Error Probability for Coding on Discrete Memoryless Channels II
Letter to Vannevar Bush.(With
Circuits for a P.C.M
Transmitter and Receiver
Some Topics on Information Theory
Concavity of Transmission Rate as a Function of Input Probabilities
The Rate of Approach to Ideal Coding
The Bandwagon
Notes to Part A
Computers, Circuits, Games
Preface to Part B

Papers

A Symbolic Analysis of Relay and Switching Circuits
Mathematical Theory of the Differential Analyzer
The Theory and Design of Linear Differential Equation Machines (With
The Number of Two-Terminal Switching Series-Parallel Networks
Network Rings
A Theorem on Coloring the Lines of a Network
The Synthesis of Two-Terminal Switching Circuits (With
A Simplified Derivation of Linear Least Square Smoothing and Prediction Theory
Programming a Computer for Playing Chess
A Chess-Playing Machine
Memory Requirements in a Telephone Exchange
A Symmetrical Notation for Numbers
A Method of Power or Signal Transmission to a Moving Vehicle
Presentation of a Maze Solving Machine
A Mind-Reading (?) Machine
The Potentialities of Computers
Throbac I.(With
Computers and Automata
Realization of all 16 Switching Functions of Two Variables Requires 18 Contacts.(With D.W. Hagelbarger) A Relay Laboratory Outfit for Colleges (Edited Jointly with John McCarthy) Automata Studies (Preface, etc.)
A Universal Turing Machine With Two Internal States (With Karel de Leeuw, Edward F. Moore and N. Shapiro) Computability by Probabilistic Machines
Some Results on Ideal Rectifier Circuits
The Simultaneous Synthesis of S Switching Functions of N Variables (With D. W. Hagelbarger) Concavity of Resistance Functions
Game Playing Machines (With Peter Elias and Amiel Feinstein) A Note on the Maximum Flow Through a Network (With Edward F. Moore) Reliable Circuits Using Less Reliable Relays I (With Edward F. Moore) Reliable Circuits Using Less Reliable Relays II
Von Neumann"s Contributions to Automata Theory Computers and Automation_Progress and Promise in the Twentieth Century Claude Shannon"s No-Drop Juggling Diorama Scientific Aspects of Juggling Abstracts, Etc
The Use of the Lakatos-Hickman Relay in a Subscriber Sender
A Study of the Deflection Mechanism and Some Results on Rate Finders
Backlash in Overdamped Systems
Some Experimental Results on the Deflection Mechanism
(With C.L. Dolph) The Transient Behavior of a Large Number of Four-Terminal Unilateral Linear Networks Connected in Tandem
Review of Transformations on Lattices and Structu

Table of Contents provided by Blackwell's Book Services and R.R. Bowker. Used with permission.
