Pathophysiology of Signs and Symptoms of Coma
Altered States of Consciousness
Definitions
Consciousness
Acutely Altered States of Consciousness
Subacute or Chronic Alterations of Consciousness
Approach to the Diagnosis of the Comatose Patient
Physiology and Pathophysiology of Consciousness and Coma
The Ascending Arousal System
Behavioral State Switching
Relationship of Coma to Sleep
The Cerebral Hemispheres and Conscious Behavior
Structural Lesions That Cause Altered Consciousness in Humans
Examination of the Comatose Patient
Overview
History
General Physical Examination
Level of Consciousness
ABC: Airway, Breathing, Circulation
Circulation
Respiration
Pupillary Responses
Examine the Pupils and Their Responses
Pathophysiology of Pupillary Responses: Peripheral Anatomy of the Pupillomotor System
Pharmacology of the Peripheral Pupillomotor System
Localizing Value of Abnormal Pupillary Responses in Patients in Coma
Metabolic and Pharmacologic Causes of Abnormal Pupillary Response
Oculomotor Responses
Functional Anatomy of the Peripheral Oculomotor System
Functional Anatomy of the Central Oculomotor System
The Ocular Motor Examination
Interpretation of Abnormal Ocular Movements
Motor Responses
Motor Tone
Motor Reflexes
Motor Responses
False Localizing Signs in Patients with Metabolic Coma
Respiratory Responses
Pupillary Responses
Ocular Motor Responses
Motor Responses
Major Laboratory Diagnostic Aids p. 77
Blood and Urine Testing
Computed Tomography Imaging and Angiography
Magnetic Resonance Imaging and Angiography
Magnetic Resonance Spectroscopy
Neurosonography
Lumbar Puncture
Electroencephalography and Evoked Potentials
Structural Causes of Stupor and Coma p. 88
Compressive Lesions as a Cause of Coma p. 89
Compressive Lesions May Directly Distort the Arousal System p. 90
Compression at Different Levels of the Central Nervous System Presents in
Distinct Ways
The Role of Increased Intracranial Pressure in Coma
The Role of Vascular Factors and Cerebral Edema in Mass Lesions
Herniation Syndromes: Intracranial Shifts in the Pathogenesis of Coma p. 95
Anatomy of the Intracranial Compartments
Patterns of Brain Shifts That Contribute to Coma
Clinical Findings in Uncal Herniation Syndrome
Clinical Findings in Central Herniation Syndrome
Clinical Findings in Dorsal Midbrain Syndrome
Safety of Lumbar Puncture in Comatose Patients
False Localizing Signs in the Diagnosis of Structural Coma
Destructive Lesions as a Cause of Coma p. 114
Diffuse, Bilateral Cortical Destruction p. 114
Destructive Disease of the Diencephalon p. 114
Destructive Lesions of the Brainstem p. 115
Specific Causes of Structural Coma p. 119
Introduction p. 120
Supratentorial Compressive Lesions p. 120
Epidural, Dural, and Subdural Masses p. 120
Epidural Hematoma
Subdural Hematoma
Epidural Abscess/Empyema
Dural and Subdural Tumors
Subarachnoid Lesions p. 129
Subarachnoid Hemorrhage
Subarachnoid Tumors
Subarachnoid Infection
Intracerebral Masses p. 135
Intracerebral Hemorrhage
Intracerebral Tumors
Brain Abscess and Granuloma
Infratentorial Compressive Lesions
Epidural and Dural Masses
Epidural Hematoma
Epidural Abscess
Dural and Epidural Tumors
Subdural Posterior Fossa Compressive Lesions
Subdural Empyema
Subdural Tumors
Subarachnoid Posterior Fossa Lesions
Intraparenchymal Posterior Fossa Mass Lesions
Cerebellar Hemorrhage
Cerebellar Infarction
Cerebellar Abscess
Cerebellar Tumor
Pontine Hemorrhage
Supratentorial Destructive Lesions Causing Coma
Vascular Causes of Supratentorial Destructive Lesions
Carotid Ischemic Lesions
Distal Basilar Occlusion
Venous Sinus Thrombosis
Vasculitis
Infections and Inflammatory Causes of Supratentorial Destructive Lesions
Viral Encephalitis
Acute Disseminated Encephalomyelitis
Concussion and Other Traumatic Brain Injuries
Mechanism of Brain Injury During Closed Head Trauma
Mechanism of Loss of Consciousness in Concussion
Delayed Encephalopathy After Head Injury
Infratentorial Destructive Lesions
Brainstem Vascular Destructive Disorders
Brainstem Hemorrhage
Basilar Migraine
Posterior Reversible Leukoencephalopathy Syndrome
Infratentorial Inflammatory Disorders
Infratentorial Tumors
Central Pontine Myelinolysis
Multifocal, Diffuse, and Metabolic Brain Diseases Causing Delirium, Stupor, or Coma
Clinical Signs of Metabolic Encephalopathy  p. 181
Consciousness: Clinical Aspects  p. 181
Tests of Mental Status
Pathogenesis of the Mental Changes
Respiration  p. 187
Neurologic Respiratory Changes Accompanying Metabolic Encephalopathy
Acid-Base Changes Accompanying Hyperventilation During Metabolic Encephalopathy
Acid-Base Changes Accompanying Hypoventilation During Metabolic Encephalopathy
Pupils  p. 192
Ocular Motility  p. 193
Motor Activity  p. 194
"Nonspecific" Motor Abnormalities
Motor Abnormalities Characteristic of Metabolic Coma
Differential Diagnosis  p. 197
Distinction Between Metabolic and Psychogenic Unresponsiveness
Distinction Between Coma of Metabolic and Structural Origin
Aspects of Cerebral Metabolism Pertinent to Coma  p. 198
Cerebral Blood Flow  p. 198
Glucose Metabolism  p. 202
Hyperglycemia
Hypoglycemia
Anesthesia  p. 205
Mechanisms of Irreversible Anoxic-Ischemic Brain Damage  p. 206
Global Ischemia
Focal Ischemia
Hypoxia
Evaluation of Neurotransmitter Changes in Metabolic Coma  p. 208
Acetylcholine
Dopamine
Gamma-Aminobutyric Acid
Serotonin
Histamine
Glutamate
Norepinephrine
Specific Causes of Metabolic Coma  p. 210
Ischemia and Hypoxia  p. 210
Acute, Diffuse (or Global) Hypoxia or Ischemia
Intermittent or Sustained Hypoxia
Sequelae of Hypoxia  p. 220
Disorders of Glucose or Cofactor Availability
Hypoglycemia
Hyperglycemia
Cofactor Deficiency
Diseases of Organ Systems Other than Brain  p. 224
Liver Disease
Renal Disease
Pulmonary Disease
Pancreatic Encephalopathy
Diabetes Mellitus
Adrenal Disorders
Thyroid Disorders
Pituitary Disorders
Cancer
Exogenous Intoxications  p. 240
Sedative and Psychotropic Drugs
Intoxication With Other Common Medications
Ethanol Intoxication
Intoxication With Drugs of Abuse
Intoxication With Drugs Causing Metabolic Acidosis
Abnormalities of Ionic or Acid-Base Environment of the Central Nervous System  p. 251
Hypo-osmolar States
Hyperosmolar States
Calcium
Other Electrolytes
Disorders of Systemic Acid-Base Balance
Disorders of Thermoregulation  p. 259
Hypothermia
Hyperthermia
Infectious Disorders of the Central Nervous System: Bacterial  p. 262
Acute Bacterial Leptomeningitis
Chronic Bacterial Meningitis
Infectious Disorders of the Central Nervous System: Viral  p. 266
Overview of Viral Encephalitis
Acute Viral Encephalitis
Acute Toxic Encephalopathy During Viral Encephalitis
Parainfectious Encephalitis (Acute Disseminated Encephalomyelitis)
Cerebral Biopsy for Diagnosis of Encephalitis
Cerebral Vasculitis and Other Vasculopathies  p. 273
Granulomatous Central Nervous System Angiitis
Systemic Lupus Erythematosus
Subacute Diencephalic Angioencephalopathy
Varicella-Zoster Vasculitis
Behcet’s Syndrome
Cerebral Autosomal Dominant Arteriopathy With Subcortical Infarcts and Leukoencephalopathy
Miscellaneous Neuronal and Glial Disorders
Prion Diseases
Adrenoleukodystrophy (Schilder's Disease)
Marchiafava-Bignami Disease
Gliomatosis Cerebri
Progressive Multifocal Leukoencephalopathy
Epilepsy
Mixed Metabolic Encephalopathy
Acute Delirious States
Drug Withdrawal Delirium (Delirium Tremens)
Postoperative Delirium
Intensive Care Unit Delirium
Drug-Induced Delirium
Psychogenic Unresponsiveness
Conversion Reactions
Catatonia
Psychogenic Seizures
Cerebellar Cognitive Affective Syndrome
"Amytal Interview"
Approach to Management of the Unconscious Patient
A Clinical Regimen for Diagnosis and Management
Principles of Emergency Management
Ensure Oxygenation, Airway, and Ventilation
Maintain the Circulation
Measure the Glucose
Lower the Intracranial Pressure
Stop Seizures
Treat Infection
Restore Acid-Base Balance
Adjust Body Temperature
Administer Specific Antidotes
Control Agitation
Protect the Eyes
Examination of the Patient
Verbal Responses
Respiratory Pattern
Eye Opening
Pupillary Reactions
Spontaneous Eye Movement
Oculocephalic Responses
Caloric Vestibulo-Ocular Responses
Corneal Responses
Motor Responses
Tendon Reflexes
Skeletal Muscle Tone
Guides to Specific Management p. 320
Supratentorial Mass Lesions
Infratentorial Mass Lesions
Metabolic Encephalopathy
Psychogenic Unresponsiveness
A Final Word p. 327
Brain Death p. 331
Determination of Brain Death p. 331
Clinical Signs of Brain Death p. 333
Brainstem Function
Confirmatory Laboratory Tests and Diagnosis
Diagnosis of Brain Death in Profound Anesthesia or Coma of Undetermined Etiology
Pitfalls in the Diagnosis of Brain Death
Prognosis in Coma and Related Disorders of Consciousness, Mechanisms p. 341
Underlying Outcomes, and Ethical Considerations
Introduction p. 342
Prognosis in Coma p. 343
Prognosis by Disease State p. 344
Traumatic Brain Injury
Nontraumatic Coma
Vascular Disease
Central Nervous System Infection
Acute Disseminated Encephalomyelitis
Hepatic Coma
Depressant Drug Poisoning
Vegetative State p. 357
Clinical, Imaging, and Electrodiagnostic Correlates of Prognosis in the Vegetative State
Minimally Conscious State p. 360
