

Contributors	p. xv
Preface	p. xvii
About the Editors	p. xix
Functional Foods, Nutraceuticals, and Disease Prevention: A Window to the Future of Health Promotion	p. 3
Chronic Degenerative Diseases in Modern Society: Implications on Life Quality, Productivity, Economic Burden	p. 3
Diet and lifestyle changes: the missing foods	p. 3
Social and economic burden of chronic degenerative diseases	p. 4
Health Regulatory Properties of Foods: "Prevention Is Better Than Cure"	p. 5
Fruit and vegetable consumption and disease prevention	p. 6
Functional Foods and Nutraceuticals	p. 11
Introduction	p. 11
Definition of Functional Foods and Nutraceuticals	p. 12
Effects of functional foods and nutraceuticals on major chronic diseases	p. 16
Sources and Biological Effects of Functional Foods and Nutraceuticals in Nature	p. 19
Flaxseed ( <i>Linum usitatissimum</i> )	p. 20
Phytoestrogens	p. 21
Tomatoes	p. 21
Garlic ( <i>Allium sativum</i> )	p. 21
Cruciferous vegetables	p. 22
Citrus fruits	p. 22
Cranberry	p. 23
Tea	p. 23
Wine and grapes	p. 24
Chocolate	p. 24
Fish	p. 25
Dairy products	p. 25
Carbohydrates	p. 26
Meat	p. 26
Vitamins	p. 26
Minerals	p. 27
Functional Foods and Nutraceuticals: Health Claims and Benefits	p. 27
Oats	p. 27
Psyllium	p. 27
Soybeans	p. 28
Phytosterols	p. 29
Fiber	p. 29
D-Tagatose	p. 29
Qualified Health Claims	p. 29
Selenium and cancer	p. 29
Antioxidant vitamins and cancer	p. 30

Nuts (e.g., walnuts) and heart disease	p. 30
Omega-3 fatty acids and CHD	p. 30
Phosphatidylserine/Phosphatidylcholine and cognitive dysfunction and dementia	p. 30
Folic acid and neural tube birth defects	p. 30
Functional Foods and Nutraceuticals: Safety Issues	p. 30
Echinacea	p. 31
Ephedra (also called ôma huang, herbal ecstasy, or mahuanggenö)	p. 31
Feverfew	p. 31
Garlic	p. 31
Ginger	p. 32
Gingko biloba	p. 32
Ginseng	p. 32
Kava kava products	p. 32
St. JohnÆs Wort	p. 32
Genomic impact of diet	p. 55
Carbohydrates and gene interactions	p. 55
Cholesterol and gene interactions	p. 56
FAs, lipids, and gene interactions	p. 58
Lipids and APOE	p. 59
Diet and APOE	p. 60
Lipids and hepatic lipase (HL)	p. 60
Diet and LIPC	p. 61
Interaction between APOE and HL	p. 61
Dual roles of vitamin A	p. 62
Vitamin E and atherosclerosis	p. 62
Vitamin E and cholesterol biosynthesis	p. 63
Vitamin D and breast cancer	p. 63
Vitamin D and FAs	p. 64
Phytoestrogens and breast cancer	p. 64
Phytoestrogens and lipid, glucose metabolism	p. 64
Phytosterols and cholesterol metabolism	p. 65
Phytosterols and cancer	p. 65
Polyphenols and CVD	p. 65
Polyphenols and cancer	p. 66
Polyphenols and cardiovascular diseases	p. 135
Polyphenols and cancer	p. 136
Head and neck squamous cancer	p. 159
Ovarian cancer	p. 159
Skin cancer	p. 160
Catechins coupled with NPs	p. 272
NPs targeted with ApoE containing curcumin	p. 273

Resveratrol-loaded NPs protect against A $\beta$ -induced toxicity

p. 275
