## Foreword

- Preface
- Program Overview
- Conference Committee
- Operations Committee
- Standing Committee
- Program Committee
- Program Vice Chairs
- Committee Members

### The Information Industry Development in Taiwan
- p. 1

### Customizable Software Requirements Languages
- p. 5

### Modeling and Parallel Evaluation of Non-Functional Requirements Using FRORL Requirements Language
- p. 11

### Development of the TUG Specification Language to Support Specification Reuse
- p. 17

### The Object-Oriented Paradigm for Software Evolution
- p. 23

### A New Approach to Module-Oriented Design of OO Software
- p. 29

### Balancing in Reverse Engineering and in Object-Oriented Systems Engineering to Improve Reusability and Maintainability
- p. 35

### Computer Applications for Small Business
- p. 43

### A Software Project Management System Supporting the Cooperation between Managers and Workers - Design and Implementation
- p. 44

### Integration of Uncertainty Management Systems with Object-Oriented Expert System Building Tools
- p. 51

### SPMNet: A Formal Methodology for Software Management
- p. 57

### Toward an Object-Oriented Modeling Approach with Representation of Temporal Knowledge
- p. 58

### Providing Orthogonal Persistence to C++ Using Forced Inheritance
- p. 64

### Software Engineering Education: The Shift to Object Oriented Programming
- p. 71

### New Trend in Computer Integrated Manufacturing
- p. 77

### A Flexible Control Mechanism for Managing Interrelated/Interdependent Tasks Successively
- p. 78

### A Framework Approach to the Development of AI Applications
- p. 84

### Multiware Platform: An Open Distributed Environment for Multimedia Cooperative Applications
- p. 90

### An Approach to Object-Oriented Requirements Verification in Software Development for Distributed Computing Systems
- p. 96

### Towards Automating Object-Oriented Analysis
- p. 103

### A Knowledge-Based Approach to Support Object-Oriented Analysis
- p. 104

### Program Extraction by Type Erasing
- p. 105

### DOMINO: A System for Maintaining the Consistency of Software Objects
- p. 111

### Simulation Based Software Development
- p. 121

### Practical Use of Client/Server Systems in Business Process Re-Engineering
- p. 126
National Information Infrastructure p. 132
ADA Concurrent Complexity Metrics based on Rendezvous Relations p. 133
Measuring Program Structure with Inter-Module Metrics p. 139
RiskExpert: An Expert STEP Metrics Analyzer p. 145
GUI-SIDER: A Scenario-Based Interaction Design Environment for GUI Dialogue p. 151
Object View Derivation and Object Query Transformation p. 157
A Development Strategy of User Navigation Systems and GUI Applications p. 163
Test Sequence Generation Methods for Protocol Conformance Testing p. 169
A Development Environment for Telecommunications Management Network p. 175
An FSM-Based Program Generator for Communication Protocol Software p. 181
An Effective Network Management Architecture for Distributed Multimedia Systems p. 188
Simulation Based Metrics Prediction in Software Engineering p. 189
Extension of the SEI Software Capability Maturity Model to Systems p. 195
Analysis of Metrics for Object-Oriented Program Complexity p. 201
Experiences of Collecting and Using Software Metrics in Industry p. 208
Issues in Database Management of Multimedia Information p. 209
A Client-Server Database Environment for Supporting Multimedia Applications p. 215
Design and Implementation of Conference Scheduling and Voting Facilities for a Multi-Media Conferencing System p. 221
On Object State Testing p. 222
Constructing an Automated Testing Oracle: An Effort to Produce Reliable Software p. 228
A Structural Testing Method for C++ Programs p. 234
Continuing Evolution of Programming Languages in the Real-Time Application World p. 235
Polynomial Programming Using Groebner Bases p. 236
Hierarchic Shape Description via Singularity and Multiscaling p. 242
The Integration and Adaptation of Reusable Components through Semantic Interface Analysis p. 252
Reverse Engineering Tools Supporting LDBR Model for Logical Database Design p. 258
Performance Analysis of an Object-Oriented Approach to Parallel Query Evaluation p. 264
Interoperability in a Heterogeneous Environment for Engineering Design p. 270
Text Retrieval - A Trendy Cocktail to Address the Dataworld p. 276
Systematic Design of Static Program Analyzers p. 281
A Predictive Model for Identifying Inspections with Escaped Defects p. 287
Behavior-Based Acceptance Testing of Software Systems: A Formal Scenario Approach p. 293
Future Trends in Information Technology and Industry p. 299
Software Process Modeling and Practices p. 300
