Preface

Introduction p. 1

Solid-state image sensor: technologies and applications p. 3

The invention of the CCD p. 14

Bucket-brigade electronics - new possibilities for delay, time-axis conversion, and scanning p. 19

Free charge transfer in charge-coupled devices p. 25

Charge-injection imaging: operating techniques and performances characteristics p. 36

High speed multiplexed pipelined optoelectronic devices: CCDs and EBCCDs p. 44

MOS area sensor: Part I - design consideration and performance of an n-p-n structure 484 x 384 element color MOS imager p. 48

A random access photodiode array for intelligent image capture p. 54

CMOS image sensors: electronic camera-on-a-chip p. 63

CMOS active pixel image sensors p. 73

CMOS sensor systems p. 80

Avalanche photodiode image sensor in standard silicon BiCMOS technology p. 87

Introduction p. 95

Noise sources in charge-coupled devices p. 101

The quantitative effects of interface states on the performance of charge-coupled devices p. 110

Noise reduction techniques for CCD image sensors p. 121

Dynamic suppression of interface-state dark current in buried-channel CCD's p. 130

CCD on-chip amplifiers: noise performance versus MOS transistor dimensions p. 136

Compensation for readout noise in CCD images p. 147

Photon-noise-limited operation of intensified CCD cameras p. 159

Sub-Poisson statistics observed in an electronically shuttered and back-illuminated CCD pixel p. 169

Offset-free black restoration and simplified correlated double sampling for linear CCDs p. 174

Noise analysis of a fully integrated CMOS image sensor p. 176

Characterisation of the signal and noise transfer of CCD cameras for electron detection p. 184

Design of an APS CMOS image sensor for low light level applications using standard CMOS technology p. 196

An automatic light spectrum compensation method for CCD white balance measurement p. 209

A fast calculation algorithm for the charge transfer loss in CCDs p. 214

Sensitivity improvement in progressive-scan FT-CCDs for digital still camera applications p. 221

Optical characterization method for solid-state image sensors p. 225

High dynamic range imaging: spatially varying pixel exposures p. 235

High sensitivity high dynamic, digital CMOS imager p. 243
A high-sensitivity CCD image sensor using source follower circuit with actively controlled gain characteristics p. 250
A new device architecture suitable for high-resolution and high-performance image sensors p. 257
A 1920(H) x 1035(V) pixel high-definition CCD image sensor p. 264
A 1/3-in 270 000 pixel CCD image sensor p. 271
A 2-million-pixel CCD image sensor overlaid with an amorphous silicon photoconversion layer p. 276
Multiresolution image sensor p. 283
Characterization of CMOS image sensors with Nyquist rate pixel level ADC p. 292
Novel subpixel imaging system with linear CCD sensors p. 303
A method for processing CCD images to remove cosmic rays and other randomly positioned spurious events - theory and experiment p. 313
Photoresponse nonlinearity of solid-state image sensors with antiblooming protection p. 317
A 1-megapixel, progressive-scan image sensor with antiblooming control and lag-free operation p. 321
Novel deblurring algorithms for images captured with CCD cameras p. 329
Smear correction for frame transfer charge-coupled-device cameras p. 339
Restoration and frequency analysis of smeared CCD images p. 342
Color imaging system using a single CCD area array p. 349
Color reproduction of a single chip color camera with a frame transfer CCD p. 355
2/3-inch format MOS single-chip color imager p. 358
Color filter arrays based on mutually exclusive blue noise patterns p. 364
Edge-adaptive color interpolation algorithm for progressive scan charge-coupled device image sensors p. 387
Introduction p. 399
CMOS active pixel sensor star tracker with regional electronic shutter p. 403
Developments in X-ray and astronomical CCD imagers p. 407
Developments in MOS CCDs for X-ray astronomy p. 415
Recent progress on CCDs for astronomical imaging p. 422
Back-illuminated, fully-depleted CCD image sensors for use in optical and near-IR astronomy p. 434
CCD detectors for the advanced camera for surveys p. 441
Whole-sky patrol with 7kx4k-CCD chips p. 447
MTF evaluation of a phosphor-coated CCD for x-ray imaging p. 451
A CMOS APS for dental X-ray imaging using scintillating sensors p. 459
A CCD-based optical CT scanner for high-resolution 3D imaging of radiation dose distributions: equipment specifications, optical simulations and preliminary results p. 466
A comparison of the imaging properties of CCD-based devices used for small field digital mammography p. 489
Evaluation of intraoral CCD camera for dental examination in forensic inspection p. 508
