Swept source at 1060 nm for Fourier domain optical coherence tomography

Combined confocal/en face optical coherence tomography imaging of the human eye fundus in vivo in the 1050-nm spectral region

Phase-insensitive optical coherence angiography of the choroid by 1-micrometer band swept-source optical coherence tomography

Fourier domain mode-locked (FDML) lasers at 1050 nm and 202,000 sweeps per second for OCT retinal imaging

Ultrahigh-resolution adaptive optics - optical coherence tomography: toward isotropic 3-[mu]m resolution for in vivo retinal imaging

Optical coherence angiography for the human eye

Automatic retinal blood vessel parameters calculation in spectral domain optical coherence tomography

Polarization memory effect in the polarization-sensitive optical coherence tomography system

New approach to cross-polarized optical coherence tomography based on orthogonal arbitrarily polarized modes

One-camera spectral-domain polarization-sensitive optical coherence tomography

Imaging vasculature independent of direction of flow using spectral domain optical coherence tomography

SDOCT Doppler velocimetry for investigating the morphological influences on blood flow in the developing chick embryo heart

Spectral domain optical coherence tomography for in-vivo three-dimensional retinal imaging of small animals

Imaging the human retina and cone mosaic in vivo with PS-OCT

Complex-conjugate-resolved retinal SDOCT using integrating buckets

Cornea curvature measurement using single shot C-scan OCT

Imaging subsurface photodisruption in human sclera with FD-OCT

Endoscopic optical coherence tomography of the retina of 1310 nm using paired-angle-rotating scanning

In-vivo human retinal imaging with pulsed illumination spectral-domain optical coherence tomography

Three-dimensional tracker for spectral domain optical coherence tomography

Linear OCT system with increased measurement depth for biomedical applications

Depth-resolved monitoring of analytes diffusion in ocular tissues

Complex-conjugate-resolved imaging using two-harmonic FD-OCT

Inherent media dispersion compensation by FD-OCT

High-speed Fourier-domain optical coherence tomography using a chirped supercontinuum pulse source

Fourier domain optical coherence tomography using optical frequency comb

Discretely swept optical-frequency domain imaging toward high-resolution, high-speed, high-sensitivity, and long-depth-range

Enhancement of OFDR-OCT sensitivity using semiconductor optical amplifier
Semiconductor optical amplifier based swept wavelength source at 1060 nm using a scanning Fabry-Perot filler and an YDFA-based booster amplifier

Phase-sensitive optical coherence tomography using buffered Fourier domain mode-locked lasers at up to 370,000 scans per second

Real-time ultrahigh-resolution imaging by dual-channel full-field optical coherence tomography

Optimization of line-Held spectral domain optical coherence tomography for in vivo highspeed 3D retinal imaging

Measurement of topographic phase image of living cells by white-light phase-shifting microscope with active stabilization of optical path difference

High-numerical-aperture full-field optical coherence tomography with space-invariant resolution without scanning the focus

Experimental investigation of circular light depolarization using polarization sensitive OCT

Scatter-size-based analysis of optical coherence tomography images

Functional imaging by dynamic speckle in digital holographic optical coherence imaging

Phase-resolved spectral-domain magnetomotive optical coherence tomography

Molecular imaging of hemoglobin using ground state recovery pump-probe optical coherence tomography

Backscattering albedo contrast in OCT using plasmon-resonant gold nanorods

High-resolution frequency domain second harmonic optical coherence tomography

 Ultrahigh-speed axial-lateral parallel time domain optical coherence tomography

Investigation of coherent amplification with a semiconductor optical amplifier employed in a swept source OCT system

Optimum design of spectrometer in FD-OCT

Dispersion compensation in OFDI-OCT by using dispersion shifted fiber

Wavelength tunable broadband source based on Ti : sapphire femtosecond laser applicable to FD-OCT system

High-speed optical-frequency domain imaging by one frame imaging within one single frequency sweep

A method of improving scanning speed and resolution of OFDR-OCT using multiple SSG-DBR lasers simultaneously

Two-dimensional velocity estimation for Doppler optical coherence tomography

Optical delay line using rotating rhombic prisms

10-channel fiber array fabrication technique for a parallel optical coherence tomography system

Visualization of PDD sensitizer's concentration using Fourier domain optical coherence tomography

Reduced coherence and calibration optimization for transillumination interferometry
Birefringence measurement of retinal nerve fiber layer using polarization-sensitive spectral domain optical coherence tomography with Jones-matrix-based analysis

Regional polarization sensitivity of articular cartilage by using polarization sensitive optical coherence tomography

Determination of 3D optic axis orientation in cartilage by polarisation-sensitive optical coherence tomography

Study on diagnosis of micro-biomechanical structure using optical coherence tomography

Dynamic OCT of mentally stress-induced sweating in sweat glands of the human finger tip

Motion-sensitive 3D optical coherence microscope operating at 1300 nm for the visualization of early frog development

Full-field optical coherence tomography image restoration based on Hilbert transformation

From medical to art diagnostics OCT: a novel tool for varnish ablation control

Rapid two-dimensional transversal scanning fiber probe for optical coherence tomography

Spectral-domain optical coherence tomography for endoscopic imaging
