All-optical synchronization of a Q-switched 100ps microchip laser to a femtosecond laser reference source
Instantaneous measurement of M2 beam propagation ratio in real-time
Q-switched lasing on a weak transition: new approach
Design and performance of a high-repetition-rate single-frequency Yb:YAG microlaser
3-dimensional simulation of the solid state lasers
Injection seeded Nd:YAG ring laser generating 200 mJ Q-switched pulses
Stabilization technique for injection seeding Nd:YAG lasers using microwave range mode beating
Very high-efficiency frequency-tripled Nd:YAG MOPA for spaceborne lidar
The lunar orbiter laser altimeter (LOLA) laser transmitter
Recent progress on single frequency lasers for space and high altitude aircraft applications
Frequency stabilization of nanosecond deep-ultraviolet coherent light source with injection seeding
Laser technology developments in support of ESA’s earth observation missions
Advanced pulsed thin disk laser sources
Industrial application of high power disk lasers
Scaling of thin disk pulse amplifiers
Current status and development trends of disk laser technology
Mode dynamics and thermal lens effects of thin-disk lasers
Concepts, features, and developments of slab laser oscillators and amplifiers
Circular output from a high power Nd:YLF slab laser
High-power slab-based Tm:YLF laser for in-band pumping of Ho:YAG
Pulsed passively mode locked operation of diode pumped Nd:GdVO4 and Nd:YVO4 in a bounce geometry
Power scaling of fiber-based amplifiers seeded with microchip lasers
Hybrid fiber MOPA-bulk amplifier system for frequency conversion
Impact of energy-transfer-upconversion on the performance of hybrid Er:YAG lasers
High-power laser with Nd:YAG single-crystal fiber grown by micro-pulling down technique
Hybrid bulk/fibre MOPA system based on Yb:KYW laser
High-performance optically pumped GaSb-based semiconductor disk lasers for the 2.0?m wavelength range
VECSEL subcavity design and optimization for targeted wavelengths
Interfacial misfit dislocation array based growth of III-Sb active regions on GaAs/AlGaAs DBRs for high-power 2 ?m VECSELs
Single-frequency tunable VECSEL around the cesium D2 line
Quantum design of active semiconductor materials for targeted wavelengths: a predictive design tool for edge emitters and OPSLs
Comparison of thermal management techniques for semiconductor disk lasers

Ultrashort pulse Ti:sapphire oscillators pumped by optically pumped semiconductor (OPS) pump lasers

Green laser modules to fit laser projection out of your pocket

1 W 488 nm cw air-cooled optically pumped semiconductor laser

Highly strained InGaAs/GaAs vertical-external-cavity surface-emitting laser for the generation of coherent yellow-orange light

1-W red light generation by intracavity doubling in a 1240 nm GaInNAs semiconductor disk laser

80 W ultrafast CPA-free disk laser

Ultrafast Yb:KYW regenerative amplifier with combined gain spectra of the optical axes Nm and Np

High average power Nd:YVO based pico-second regenerative amplifier

The synthesis and properties of rare earth doped yttria and scandia for eye-safe single crystal and ceramic lasers

Design of transverse Nd doping profiles in transparent YAG ceramics for edge-pumped laser geometries

1 W of 261 nm cw generation in a Pr3+:LiYF4 laser pumped by an optically pumped semiconductor laser at 479 nm

Fiber amplified and frequency doubled diode lasers as a highly flexible pulse source at 532 nm

Continuous wave single longitudinal mode SHG with two stages of intra-cavity power enhancement at fundamental frequency

High-power gain-enhanced internally frequency-converted Q-switched Nd:YAG lasers

Intracavity pumped Yb:SFAP crystal emitting at 985 nm and second harmonic generation

Diode pumping of Nd:ASL and its frequency doubling for blue emission around 450 nm

Narrow linewidth ring laser with frequency doubling for titanium:sapphire and dye operation

Mid-infrared tunable laser based on the Cr:ZnSe active crystal

Tunable lasers based on diode pumped Tm-doped vanadates Tm:YVO4, Tm:GdVO4, and Tm:LuVO4

High-power tunable external cavity quantum cascade laser in the 5-11 micron regime

High-speed micromachining with high-power picosecond ultraviolet lasers

Picosecond laser micromachining of advanced semiconductor logic devices

High power UV q-switched and mode-locked laser comparisons for industrial processing applications

Glass processing using q-switched ns INNOSLAB lasers

Nonlinear excitation fluorescence microscopy: source considerations for biological applications

Solid state laser applications in photovoltaics manufacturing

Tandem photonic amplifier employing a pulsed master oscillator fiber power amplifier with programmable temporal pulse shape capability
Optics performance at high-power levels
Advances in fiber delivery of ultrashort pulses at 800 nm
Solid state saturable absorbers for Q-switching at 1 and 1.3?m: investigation and modeling
Big solar furnace as pumping source for high power lasers
Power scaling and optimum crystal orientation in continuous-wave diode-pumped Yb:KLu(WO4)2 lasers
Ceramic Nd3+:Cr3+:YAG laser pumped by high power concentrated solar flux
Long-term frequency stabilisation of a CW single-frequency laser using a high-precision wavelength meter
Output characteristics of a passively Q-switched diode-laser pumped ceramic Nd:YAG laser
High-peak-power diode-pumped actively Q-switched Nd:YAG intracavity Raman laser with an undoped YVO4 crystal
AlGalnAs quantum-well 1.3-?m laser by a diode-pumped actively Q-switched Nd:GdVO4 laser
High-power Kerr-lens mode-locked ytterbium lasers
High-peak-power flashlamp-pumped passively Q-switched Nd:YAG laser with AlGalnAs quantum wells as a saturable absorber
Diode pumped Tm:YAP laser for eye microsurgery
Ultrashort lasers: identifying the "perfect" pulse
Tunable pulsed forsterite laser operating at room temperature
A new compact laser source for portable LIBS applications
Room-temperature mid-infrared Cr2+:ZnSe and Cr2+:ZnS random powder lasers
Q-switched laser operation of Yb-doped NaGd(WO4)2 and NaY(WO4)2 crystals
Iron doped CdMn1-xTe crystals: new gain media for mid-IR room temperature lasers
Two-stage concentrating systems for pumping of solar lasers
Generalized phase synchronization in unidirectionally coupled LD pumped Nd:YAG lasers
