An Overview of Nonlinear Identification and Control with Fuzzy Systems
An Overview of Nonlinear Identification and Control with Neural Networks
Multiobjective Evolutionary Computing Solutions for Control and System Identification
Adaptive Local Linear Modelling and Control of Nonlinear Dynamical Systems
Nonlinear System Identification with Local Linear Neuro-Fuzzy Models
Gaussian Process Approaches to Nonlinear Modelling for Control
Neuro Fuzzy Model Construction, Design and Estimation
A Neural Network Approach for nearly Optimal Control of Constrained Nonlinear Systems
Reinforcement Learning for Online Control and Optimisation
Reinforcement Learning and Multiagent Control Within An Internet Environment
Combined Computational Intelligence and Analytical Methods in Fault Diagnosis
Application of Intelligent Control to Autonomous Search of Parking Place and Parking of Vehicles
Applications of Intelligent Control in Medicine
