Preface

Nutrients and the Nervous System

Diet and the Sympathetic Nervous System p. 3

Transport Mechanisms into the Drain: Physiological Relevance to Dietary Amino Acids p. 13

Amino Acid Supply, Free Amino Acid Pools, and the Regulation of Monoamine Synthesis during Early Brain Development p. 19

Dietary Choline and Acetylcholine Synthesis in the Brain p. 29

Cyclic Dipeptides and Neuronal Function p. 47

Short Presentations

Temporary Recovery of Brain Function Following Ischemia Without Supply of Glucose p. 61

Urinary Quinolinic Acid Excretions in Healthy Volunteers Following Single and Repeated Oral Administration of L-tryptophan p. 67

Effects of Precursors on Monoamine Metabolism in Rat Brain Measured by Differential Pulse Voltammetry p. 71

The Origin of Elevated Plasma Melatonin after Tryptophan Administration p. 77

Control of Food Intake

Regulation and Dysregulation in the Appetite Control System p. 87

Effects of Dietary Carbohydrates and Proteins on the Brain: Impact for Selective Control of Macronutrient Intake p. 97

Serotonergic Control of Food Intake in Man p. 107

Gastrointestinal Peptides and Amino Acids In Anorexia and Bulimia Nervosa p. 119

The Satietin Family of Endogenous Anorectics p. 125

Short Presentations

Further Characterization of the Feeding Responses to Interleukin-1 and Tumor Necrosis Factor p. 135

Feeding Behavior and the Endocrine Response in Adult Guinea Pigs Subjected to New Housing Conditions p. 143

Patterns of Periodicity in Eating Behavior during the Menstrual Cycle in Healthy Women and their Relations to Hormones and Behavior p. 151

Consumption of Food, Emotional States, and Reproductive Hormones during the Menstrual Cycle in Disturbed and Non-Disturbed Eaters p. 161

New Experimental Results on Nutrient Selection of Laying Hens p. 167

Diet, Hormones, and Brain Function

Amino Acid Control of Brain Catecholamine Synthesis and Release and Anterior Pituitary Functions p. 175

Amino Acids, Free Fatty Acids, and Impaired Growth Hormone Secretion in Human Obesity p. 191

Brain Metabolism of Glucose and Amino Acids in Insulin-Dependent Diabetes Mellitus p. 201

Insulin and Insulin Receptors in the Brain in Relation to Food Intake and Body Weight p. 209

Adrenergic Control of Secretion of the Adrenocorticotrophic Hormone: Physiological and Clinical Significance p. 223
The Influence of Corticotropin Releasing Hormone and Corticosterone on Neuronal Activity

Short Presentations

Direct In Vitro and In Vivo Effects of Steroids on Central Nervous GABAA Receptors

Gut-Brain Interactions in Humans

Failure to Obtain Classically Conditioned Hypoglycemia in Man

Evidence for an Impaired Central Control of Nonshivering Thermogenesis in Hypothyroid Rats

Impairment of Visual Evoked Potentials in Patients with Diabetes Mellitus

Effects of Short-Term Energy Deprivation on Stress Reactions in Humans

Effects of Systemic Human and Ovine Corticotropin-Releasing Hormone on Cardiovascular and Respiratory Functions

The Level of Protein in Diet Modulates the Behavioral Effects of Amphetamine

Diet-Related Impairment of Brain Function in Adult Patients with Phenylketonuria Treated Early

Insulin Receptors and Phosphotyrosine in the Brain: Regional Distribution and Ultrastructural Localization

Control of Sleep Behavior

Pharmacological Control of Narcolepsy and REM Sleep

Endocrine and Sleep-Inducing Properties of L-Tryptophan in Men

Serotonin, Sleep, and Waking - Effects of Serotonin Uptake Inhibitors

Muramyl Peptides and Interleukin-1 in Sleep Regulation

Short Presentations

Effect of Sleep-Inducing Substances on Serotonin Release in the Nucleus Raphe Dorsalis of the Rot

Selective D2 Receptor Antagonism by Amisulpride: Effects on EEG Sleep Parameters and Nocturnal Hormonal Secretion in Healthy Male Volunteers

Behavior and Affective Disorders

Regulation of Circadian Rhythms and Treatment of their Disorders

Social Constraints on the Behavioral Effects of Tryptophan and Tyrosine

Rhythmicity of Serotonergic Functions in Rat Brain and the Effect of Antidepressant Treatment

Effects of Decreased Tryptophan Availability on Human Mood, Aggression, Food Intake, and Pain Perception

Effects of Different Exercise Programs on Endocrine and Immune Functions

Short Presentations

Can Tyrosine Prevent Poststress Disturbances?

Evidence of Hypersensitive Postsynaptic Serotonin Receptors in an Animal Model of Depression

Are the Plasma Levels of Tryptophan and/or Kynurenic Indicators of Some Common Behavioral Aspects?

Control of Reproductive Function

The Central Control of Luteinizing Hormone Release: A Provisional Model
