

Preface	p. ix
Geological Background of the Mineral Resources Exploitation	p. 1
Geological Origin as the Basis for the Systematica of Deposits	p. 3
Geological Conditions Determining the Type of Mining Activity	p. 15
Hydrological and Hydrochemical Conditions for the Reclamation of Anthropogenic Water Bodies and Wetlands in Opencast Mines	p. 23
Impact of Coal Mining Heaps on the Water Environment	p. 37
Geological Basis of Changes in Water Conditions and Methods of Their Determination	p. 47
Novel Ecosystems - the image of Anthropocene Epoch Environmental Conditions	p. 55
Post-mineral Excavation Sites as Novel Ecosystems and Examples of Socio-environmental Resilience	p. 57
Returning Collieries Back to Nature in England, UK	p. 69
Brownfield Sites as Hot Spots of Plant Diversity	p. 87
Returning Coal Mine Sedimentation Pools to Nature: Technical Versus Natural Processes in Population, Vegetation and Landscape Contexts	p. 103
Post-industrial Habitats as Centres of Biodiversity - a Case Study on a Sample of Sedimentation Pools	p. 115
Mineral Soil Substrate Seed Banks: Understanding Their Role in Primary Succession and Enhancement of Habitat Recovery	p. 131
Bryoflora of Post-industrial Areas in Poland	p. 147
Modern Methods Approach to Novel Ecosystem Studies	p. 161
Immunochemistry of Cell Wall - a Tool for Evaluation of the Response of Plants to Changed Habitat	p. 163
Soil Enzymes - a Tool to Monitor Soil-forming Processes in Coal Mine Spoil Heaps	p. 181
Functional Diversity of Bacteria as an Important Element of Post-mining Ecosystem Functioning - the Use of the BIOLOG® Method in Environmental Research	p. 195
Novel Ecosystems Establishment in Environmental Management with Geoinformatics Tools: Remote Sensing and Machine Learning Application	p. 201
Natural Capital as the Basis for Ecosystem Services	p. 211
"Natural Capital" Concept - a New Approach to Environmental Management and Post-industrial Landscapes	p. 213
Changing the Management of Post-mining Synanthropic Sites	p. 227
Role of Post-industrial Sites in Maintaining Species Diversity of Rare, Endangered and Protected Vascular Plant Species on the Example of the Urban-Industrial Landscapes	p. 245
Ecosystem Services and Post-industrial Areas	p. 265
Plant Responses to Harsh Conditions of Post-industrial Habitats	p. 274
Educational and Social Aspects of Post-mineral Exploitation Habitats	p. 301
Environmental Knowledge and Understanding: an Important and Necessary Aspect of Corporate Social Responsibility	p. 303
Activities of Mining Enterprises for Repair of the Natural Environment in the Light of Applicable Legal Regulations	p. 313

Values of Post-industrial Novel Ecosystems for Enhancement of Ecosystem Services in the Anthropocene Epoch	p. 327
Educational Activities in the Areas Created as a Result of Mining Operations in the Silesian Province	p. 335
Current Reclamation Practices and Their Successfulness	p. 364
Author Index	p. 373
