

Preface	p. xiii
Introduction	p. 1
Large Rivers	p. 1
A Book on Large Rivers	p. 3
References	p. 6
Geological Framework of Large Rivers	p. 7
Introduction	p. 7
The Geological Framework: Elevated Land and a Large Catchment	p. 8
Smaller Tectonic Movements	p. 9
The Subsurface Alluvial Fill of Large Rivers	p. 10
Geological History of Large Rivers	p. 12
Conclusion	p. 14
Questions	p. 14
References	p. 14
Water and Sediment in Large Rivers	p. 17
Introduction	p. 17
Discharge of large Rivers	p. 17
Global Pattern of Precipitation	p. 18
Large River Discharge: Annual Pattern and Long-Term Variability	p. 21
Sediment in Large Rivers	p. 26
Conclusion	p. 32
Questions	p. 32
References	p. 33
Morphology of Large Rivers	p. 35
Introduction	p. 35
Large Rivers from Source to Sink	p. 35
The Amazon River	p. 38
The Setting	p. 39
Hydrology	p. 39
Sediment Load	p. 39
Morphology	p. 42
The Ganga River	p. 44
The Setting	p. 44
Hydrology	p. 46
Sediment Load	p. 46
Morphology	p. 47
Morphology of Large Rivers: Commonality and Variations	p. 48
Conclusion	p. 52
Questions	p. 52
References	p. 52

Large Rivers and their Floodplains: Structures, Functions, Evolutionary Traits and Management with Special Reference to the Brazilian Rivers	p. 55
Introduction	p. 55
Origin and Age of Rivers and Floodplains	p. 57
Scientific Concepts and their Implications for Rivers and Floodplains	p. 59
Water Chemistry and Hydrology of Major Brazilian Rivers and their Floodplains	p. 60
Ecological Characterisation of Floodplains and their Macrohabitats	p. 62
Ecological Responses of Organisms to Flood-Pulsing Conditions	p. 64
Trees	p. 65
Herbaceous Plants	p. 66
Invertebrates	p. 66
Fish	p. 67
Other Vertebrates	p. 68
Biodiversity	p. 68
Higher Vegetation	p. 69
Animal Biodiversity	p. 71
The Role of Rivers and their Floodplains for Speciation and Species Distribution of Trees	p. 71
Biogeochemical Cycles in Floodplains	p. 73
Biomass and Net Primary Production	p. 73
Algae	p. 73
Herbaceous Plants	p. 74
Trees of the Flooded Forest	p. 75
Decomposition	p. 76
The Nitrogen Cycle	p. 77
A Nutrient Transfer Between the Terrestrial and Aquatic Phases	p. 78
Food Webs	p. 79
Management of Amazonian River Floodplains	p. 80
Amazonian River Floodplains	p. 80
Savanna Floodplains	p. 82
Policies in Brazilian Wetlands	p. 82
Discussion and Conclusion	p. 84
Acknowledgements	p. 89
References	p. 89
Large River Deltas	p. 103
Introduction	p. 103
Large River Deltas: The Distribution	p. 104
Formation of Deltas	p. 104
Delta Morphology and Sediment	p. 110
The Ganga-Brahmaputra Delta: An Example of a Major Deltaic Accumulation	p. 112
The Background	p. 112

Morphology of the Delta	p. 113
Late Glacial and Holocene Evolution of the Delta	p. 114
Conclusion	p. 115
Questions	p. 115
References	p. 116
Geological History of Large River Systems	p. 119
The Age of Large Rivers	p. 119
Rivers in the Quaternary	p. 121
The Time Period	p. 121
The Nature of Geomorphic Changes	p. 123
The Pleistocene and Large Rivers	p. 124
The Glacial Stage	p. 124
The Transition	p. 125
The Interglacial Stage	p. 127
Changes During the Holocene	p. 127
Evolution and Development of the Mississippi River	p. 128
The Ganga-Brahmaputra System	p. 133
Evolution of the Current Amazon	p. 137
Evolutionary Adjustment of Large Rivers	p. 141
Questions	p. 142
References	p. 142
Anthropogenic Alterations of Large Rivers and Drainage Basins	p. 147
Introduction	p. 147
Early History of Anthropogenic Alterations	p. 148
The Mississippi River: Modifications before Big Dams	p. 149
The Arrival of Large Dams	p. 151
Evaluating the Impact of Anthropogenic Changes	p. 156
Land Use and Land Cover Changes	p. 157
Channel Impoundments	p. 159
Effect of Impoundments on Alluvial Rivers	p. 161
Effect of Impoundments on Rivers in Rock	p. 163
Large-scale Transfer of River Water	p. 166
Conclusion	p. 167
Questions	p. 168
References	p. 169
Management of Large Rivers	p. 173
Introduction	p. 173
Biophysical Management	p. 177
Social and Political Management	p. 178
Values and Objectives in River Management	p. 179
International Basin Arrangements	p. 180

The Importance of the Channel, Floodplain, and Drainage Basin	p. 180
Integrated Water Resources Management	p. 182
Techniques for Managing Large River Basins	p. 183
Administering the Nile	p. 184
Conclusion	p. 188
Questions	p. 189
References	p. 190
The Mekong: A Case Study on Morphology and Management	p. 193
Introduction	p. 193
Physical Characteristics of the Mekong Basin	p. 194
Geology and Landforms	p. 194
Hydrology	p. 196
Land Use	p. 197
The Mekong: Source to Sea	p. 199
The Upper Mekong in China	p. 199
The Lower Mekong South of China	p. 199
Erosion, Sediment Storage and Sediment Transfer in the Mekong	p. 202
Management of the Mekong and its Basin	p. 204
Impoundments on the Mekong	p. 204
Anthropogenic Modification of Erosion and Sedimentation on Slopes	p. 206
Degradation of the Aquatic Life	p. 207
Conclusion	p. 208
Questions	p. 208
References	p. 209
Large Arctic Rivers	p. 211
Introduction	p. 211
The Five Largest Arctic River Basins	p. 213
Climate Change in the Five Large Arctic Basins	p. 213
River Basin Zones	p. 214
Physiography and Quaternary Legacy	p. 216
Physiographic Regions	p. 216
Active Mountain Belts and Major Mountain Belts with Accreted Terranes (Zone 1)	p. 216
Interior Plains, Lowlands, and Plateaux (Zone 2)	p. 217
Arctic Lowlands (Zone 3)	p. 218
Ice Sheets and Their Influence on Drainage Rearrangement	p. 218
Intense Mass Movement on Glacially Over-steepened Slopes	p. 218
Hydroclimate and Biomes	p. 220
Climate Regions	p. 220
Biomes	p. 220
Wetlands	p. 224
Permafrost	p. 224

Permafrost Distribution	p. 224
Permafrost and Surficial Materials	p. 226
Contemporary Warming	p. 226
Anthropogenic Effects	p. 228
Development and Population	p. 228
Agriculture and Extractive Industry	p. 228
Urbanisation: The Case of Siberia	p. 228
Discharge of Large Arctic Rivers	p. 229
Problems in Discharge Measurement	p. 229
Water Fluxes	p. 229
Water Budget	p. 231
Nival River Regime	p. 232
Lakes and Glaciers	p. 234
River Ice: Freeze and Break Up	p. 236
Scale Effects	p. 237
Effects of River Regulation	p. 238
Historical Changes	p. 238
Sediment Fluxes	p. 239
Complications in Determining Sediment Fluxes Both Within Arctic Basins and to the Arctic Ocean	p. 239
Flux of Suspended Sediment and Dissolved Solids	p. 240
Historical Changes in Water and Sediment Discharge in the Siberian Rivers	p. 240
Suspended Sediment Sources and Sinks in the Mackenzie Basin	p. 242
Sediment Yield in the Mackenzie Basin	p. 242
West Bank Tributary Sources	p. 243
Bed and Bank Sources	p. 245
Nutrients and Contaminants	p. 249
Supply of Nutrients	p. 249
Transport of Contaminants	p. 250
Mackenzie, Yukon and Lena Deltas	p. 253
Mackenzie Delta	p. 253
Lena Delta	p. 253
Yukon-Kuskokwim Delta	p. 256
Significance of Large Arctic Rivers	p. 256
Acknowledgment	p. 258
Questions	p. 259
References	p. 259
Climate Change and Large Rivers	p. 265
Introduction	p. 265
Global Warming: Basic Concept	p. 266
A Summary of Future Changes in Climate	p. 270

Impact of Climate Change on Large Rivers	p. 271
Climate Change and a Typical Large River of the Future	p. 273
Conclusion	p. 277
Questions	p. 277
References	p. 278
Index	p. 281
