

Preface to the sixth edition	p. xiii
Acknowledgements	p. xv
Scope and method	p. 1
Brief historical background to cost-benefit analysis	p. 3
What is cost-benefit analysis?	p. 7
Framework to cost-benefit analysis	p. 11
Basic concepts of benefits and costs	p. 15
Measurements of consumer surplus	p. 17
Consumer surplus when several prices change	p. 25
Consumer surplus when other things change	p. 31
Introduction to the compensating variation	p. 36
Measurements of rent	p. 39
Is producer surplus a rent?	p. 45
Shadow prices and transfer payments	p. 49
Introductory remarks	p. 51
Opportunity cost of labour	p. 53
Opportunity cost of unemployed labour	p. 57
The additional benefits of using unemployed labour	p. 60
The opportunity costs of imports	p. 64
Transfer payments and double counting	p. 69
External effects	p. 73
Introduction to external effects	p. 75
Adverse spillovers	p. 81
Internalizing externalities	p. 86
Evaluating spillovers	p. 90
Compensating for environmental damage	p. 97
Investment criteria	p. 105
Introduction to investment criteria	p. 107
Crude investment criteria	p. 111
The discounted present value criterion	p. 115
The internal rate of return	p. 121
The alleged superiority of the discounted present value criterion compared with the internal rate of return criterion and the net benefit ratio	p. 125
Investment criteria in an ideal capital market	p. 132
Calculation of rates of return and of time preference	p. 134
Critique of the discounted present value criterion (I)	p. 137
Critique of the discounted present value criterion (II)	p. 142
The normalized compounded terminal value criterion (I)	p. 146
The normalized compounded terminal value criterion (II)	p. 151
The Pareto criterion and generational time	p. 154
Cost-benefit analysis, weights and normative economics	p. 159

Uncertainty	p. 169
Risk and certainty equivalence	p. 171
Decision rules and heuristics (I)	p. 174
Decision rules and heuristics (II)	p. 178
How practical are decision rules and heuristics?	p. 184
Simple probability in decision making	p. 187
Mixed strategies in decision making	p. 189
Four additional strategies for coping with uncertainty	p. 193
Topics frequently encountered in cost-benefit analysis	p. 201
Valuation issues and methods	p. 203
Benefit transfers	p. 213
Pair-wise comparison	p. 222
Cost-benefit analysis and behavioural economics	p. 228
Cost-benefit analysis in developing countries	p. 241
The value of time	p. 248
Measuring the benefits of recreational areas	p. 251
Travel cost method	p. 256
Cost-benefit analysis and public health	p. 260
The value of statistical life	p. 264
Estimating the economic cost of air pollution on health	p. 273
Economic cost of diseases	p. 287
Cost-benefit analysis and the problem of locating environmentally noxious facilities (NIMBYs): an informal discussion	p. 297
Further notes and advanced materials	p. 309
Cost-benefit analysis and the economist	p. 311
Cost-effectiveness analysis	p. 317
The alleged contradiction of the Kaldor-Hicks criterion	p. 320
The problem of second-best	p. 323
Origins of the Hicksian measures of consumer surplus	p. 327
Marginal curve measures of consumer surplus	p. 332
The concept and measure of rent	p. 338
Marginal curve measures of rent	p. 343
The limited applicability of property rights	p. 347
Deadweight loss or love's labour lost	p. 349
The value of human life	p. 352
The rate of time preference	p. 354
Selecting a set of investment projects for given political objectives	p. 357
Why cost-benefit analysis is useful for regulatory reform	p. 361
Valuing household production	p. 365
Bibliography and further reading	p. 368
Index	p. 382
