Introduction
A debate on the relationship between planning and the market
'Futures' in China: theory, policy, and systems
On making China's system of circulation more market-oriented, and on creating institutions to handle the market
The role, responsibility, and destiny of economists
On capital markets
China's reform and opening up, and the establishment of clean government
Going beyond the labor theory of value
Various thoughts on rural employment, rural finance, and rural public healthcare
Financial innovations, financial stability, and financial regulation
China's energy sector: issues of government regulation, and making the sector more market-oriented
On income inequality and being industrious
A look at the stock market from a new perspective
Concepts that underlie market regulation
Incentive mechanisms, moral hazard, and the basis for a market
Xue Muqiao: a great master who experienced the vicissitudes of a century
What exactly do we want to learn?
A letter on income distribution
Why are medical costs so high?
How to pull together medical resources and distribute them in a reasonable way
China's evolving industrial policy
Striking a balance among wages, employment, and efficiency
A new approach to the old problem of 'empty accounts' in pension funds
NDC: a pension-fund reform model that is worth considering
Prudent handling of the three main relationships
On transforming China's mode of economic growth and speeding up economic restructuring
Economic development and environmental protection
Resolving fairness issues must rely on 'reform'
Strategies and goals for a water-conserving society: new conceptual approaches for handling water issues
