

Preface	p. xv
Acknowledgments	p. xix
Selected Symbols	p. xxi
Selected Acronyms	p. xxix
Introduction to Radar Systems and Signal Processing	p. 1
History and Applications of Radar	p. 1
Basic Radar Functions	p. 2
Elements of a Radar	p. 5
Radar Frequencies	p. 7
Radar Waveforms and Transmitters	p. 8
Antennas	p. 10
Virtual Elements and Virtual Arrays	p. 16
Receivers	p. 17
Common Threads in Radar Signal Processing	p. 22
Signal-to-Interference Ratio	p. 22
Resolution and Region of Support	p. 23
Integration and Phase History Modeling	p. 28
A Preview of Basic Radar Signal Processing	p. 30
Radar Time Scales	p. 30
Phenomenology	p. 32
Signal Conditioning and Interference Suppression	p. 32
Detection	p. 35
Measurements and Track Filtering	p. 37
Imaging	p. 38
Radar Literature	p. 40
Introductions to Radar Systems and Applications	p. 40
Basic Radar Signal Processing	p. 40
Advanced Radar Signal Processing	p. 41
Radar Applications	p. 41
Current Radar Research	p. 42
References	p. 42
Problems	p. 43
Signal Models	p. 47
Components of a Radar Signal	p. 47
Modeling Amplitude	p. 48
Simple Point Target Radar Range Equation	p. 48
Distributed Target Forms of the Range Equation	p. 51
Radar Cross Section	p. 57
Radar Cross Section for Meteorological Targets	p. 58
Statistical Description of Radar Cross Section	p. 60

Target Fluctuation Models	p. 76
Swerling Models	p. 79
Effect of Target Fluctuations on Doppler Spectrum	p. 80
Modeling Clutter	p. 81
Behavior of ζ^0	p. 82
Signal-to-Clutter Ratio	p. 84
Temporal and Spatial Correlation of Clutter	p. 85
Compound Models of Radar Cross Section	p. 87
Noise Model and Signal-to-Noise Ratio	p. 89
Jamming	p. 92
Electromagnetic Interference	p. 92
Frequency Models: The Doppler Shift	p. 93
Doppler Shift	p. 93
The Stop-and-Hop Approximation and Phase History	p. 95
Measuring Doppler Shift: Spatial Doppler	p. 97
Spatial Models	p. 99
Coherent Scattering	p. 99
Variation with Angle	p. 101
Variation with Range	p. 104
Noncoherent Scattering	p. 105
Projections	p. 106
Multipath	p. 106
Spectral Model	p. 108
Summary	p. 109
References	p. 110
Problems	p. 112
Radar Data Acquisition and Organization	p. 117
A Signal Processor's Radar Architecture Model	p. 118
Measuring a Range Profile	p. 119
Pulsed Radar Range Profile: One Pulse in Fast Time	p. 119
FMCW Radar Range Profile: One Sweep in Fast Time	p. 125
Multiple Range Profiles: Slow Time and the CPI	p. 131
Multiple Channels: The Datacube	p. 138
Dwells	p. 140
Sampling the Doppler Spectrum	p. 141
The Nyquist Rate in Doppler	p. 141
Straddle Loss	p. 143
Sampling in the Spatial and Angle Dimensions	p. 148
Spatial Array Sampling	p. 148
Sampling in Angle	p. 149

I/Q Imbalance and Digital I/Q	p. 151
I/Q Imbalance and Offset	p. 152
Correcting I/Q Errors	p. 154
Digital I/Q	p. 157
Summary	p. 161
References	p. 162
Problems	p. 163
Radar Waveforms	p. 167
Introduction	p. 167
The Waveform Matched Filter	p. 169
The Matched Filter	p. 169
Matched Filter for the Simple Pulse	p. 171
All-Range Coherent Matched Filtering	p. 173
Straddle Loss	p. 174
Range Resolution of the Matched Filter	p. 174
Matched Filtering of Moving Targets	p. 175
The Ambiguity Function	p. 177
Definition and Properties of the Ambiguity Function	p. 177
Ambiguity Function of the Simple Pulse	p. 181
The Pulse Burst Waveform	p. 184
Matched Filter for the Pulse Burst Waveform	p. 184
Pulse-by-Pulse Processing	p. 186
Range Ambiguity	p. 187
Doppler Response of the Pulse Burst Waveform	p. 190
Ambiguity Function for the Pulse Burst Waveform	p. 191
The Slow-Time Spectrum and the Periodic Ambiguity Function	p. 195
Frequency-Modulated Pulse Compression Waveforms	p. 196
Linear Frequency Modulation	p. 197
The Principle of Stationary Phase	p. 200
Ambiguity Function of the LFM Waveform	p. 202
Range-Doppler Coupling	p. 204
Stretch Processing	p. 205
Range Sidelobe Control for FM Waveforms	p. 210
Matched Filter Frequency Response Shaping	p. 210
Matched Filter Impulse Response Shaping	p. 213
Waveform Spectrum Shaping	p. 213
Frequency-Coded Waveforms	p. 216
The Stepped Frequency Waveform	p. 216
The Stepped Chirp Waveform	p. 220
Costas Frequency Codes	p. 221

Phase-Modulated Pulse Compression Waveforms	p. 223
Biphase Codes	p. 225
Polyphase Codes	p. 230
Mismatched Phase Code Filters	p. 234
Continuous Wave Radar	p. 235
Single-Frequency CW	p. 236
Periodically Modulated CW	p. 237
Linear Frequency-Modulated CW	p. 238
"Fast Chirp" Linear Frequency-Modulated CW	p. 240
Sidelobe Control in Linear FMCW	p. 242
Other CW Waveforms	p. 242
Frequency-Modulated versus Phase-Modulated Waveforms	p. 242
Summary	p. 243
References	p. 244
Problems	p. 245
Doppler Processing	p. 251
Introduction	p. 251
Moving Platform Effects on the Doppler Spectrum	p. 253
Moving Target Indication	p. 256
Pulse Cancellers	p. 259
Vector Formulation of the Matched Filter	p. 262
Matched Filters for Clutter Suppression	p. 263
Blind Speeds and Staggered PRFs	p. 266
MTI Figures of Merit	p. 273
Limitations to MTI Performance	p. 278
Pulse Doppler Processing	p. 280
The Discrete-Time Fourier Transform of a Moving Target	p. 281
Sampling the DTFT: The Discrete Fourier Transform	p. 283
The DFT of Noise	p. 285
Pulse Doppler Processing Gain	p. 286
Matched Filter and Filterbank Interpretations of Pulse Doppler Processing with the DFT	p. 286
Fine Doppler Estimation	p. 288
Modern Spectral Estimation in Pulse Doppler Processing	p. 294
CPI-to-CPI Stagger and Blind Zone Maps	p. 295
Pulse Pair Processing	p. 300
Additional Doppler Processing Issues	p. 305
Range Migration and the Keystone Transform	p. 305
Combined MTI and Pulse Doppler Processing	p. 309
Transient Effects	p. 310
PRF Regimes	p. 311

PRF Selection	p. 314
Ambiguity Resolution	p. 317
Clutter Mapping	p. 321
The Moving Target Detector	p. 322
MTI for Moving Platforms: Ground Moving Target Indication	p. 323
Simplified GMTI Clutter and Target Models	p. 324
DPCA and ATI	p. 326
Clutter Suppression Interferometry	p. 330
Analysis of Adaptive DPCA	p. 331
Summary	p. 334
References	p. 335
Problems	p. 337
Detection Fundamentals	p. 343
Introduction	p. 343
Radar Detection as Hypothesis Testing	p. 344
The Neyman-Pearson Detection Rule	p. 345
The Likelihood Ratio Test	p. 345
Threshold Detection in Coherent Systems	p. 354
The Gaussian Case for Coherent Receivers	p. 355
Unknown Parameters and Threshold Detection	p. 358
Linear and Square Law Detectors	p. 364
Other Unknown Parameters	p. 365
Threshold Detection of Radar Signals	p. 366
Coherent, Noncoherent, and Binary Integration	p. 366
Nonfluctuating Targets	p. 368
Albersheim's Equation	p. 373
Fluctuating Targets	p. 375
Simplified Equations for P_D for Some Swerling Cases	p. 378
Shnidman's Equation	p. 381
Detection in Clutter	p. 383
Binary Integration	p. 385
Integration Summary	p. 389
Constant False Alarm Rate Detection	p. 390
The Effect of Unknown Interference Power on False Alarm Probability	p. 390
Cell-Averaging CFAR	p. 392
Analysis of Cell-Averaging CFAR	p. 394
CA CFAR Limitations	p. 398
Extensions to Cell-Averaging CFAR	p. 404
Order Statistic CFAR	p. 408
Adaptive CFAR	p. 412

CFAR for Two-Parameter PDFs	p. 413
Temporal CFAR	p. 414
Distribution-Free CFAR	p. 417
System-Level Control of False Alarms	p. 418
Summary	p. 419
References	p. 420
Problems	p. 422
Measurements and Introduction to Tracking	p. 425
Estimators	p. 426
Estimator Properties	p. 426
The Cramèr-Rao Lower Bound	p. 429
The CRLB and Signal-to-Noise Ratio	p. 431
Maximum Likelihood Estimators	p. 432
Range, Doppler, and Angle Estimators	p. 434
Range Estimators	p. 434
Doppler Signal Estimators	p. 446
Angle Estimators	p. 455
Introduction to Tracking	p. 469
Optimal Combination of Two Noisy Measurements	p. 470
Sequential Least Squares Estimation	p. 471
The χ - β Filter	p. 475
The Kalman Filter	p. 480
The Tracking Cycle	p. 487
Summary	p. 492
References	p. 493
Problems	p. 495
Introduction to Synthetic Aperture Imaging	p. 499
Fundamental SAR Concepts and Relations	p. 503
Cross-Range Resolution in Radar	p. 503
The Synthetic Aperture Viewpoint	p. 505
Doppler Viewpoint	p. 512
SAR Coverage and Sampling	p. 514
Stripmap SAR Data Characteristics	p. 518
Stripmap SAR Geometry	p. 518
Stripmap SAR Data Set	p. 521
Stripmap SAR Image Formation Algorithms	p. 524
Doppler Beam Sharpening	p. 525
Quadratic Phase Error Effects	p. 528
Range-Doppler Algorithms	p. 533
Depth of Focus	p. 539

Range Migration Algorithm	p. 540
Spotlight SAR Data Characteristics	p. 544
The Polar Format Image Formation Algorithm for Spotlight SAR	p. 550
Backprojection	p. 552
Interferometric SAR	p. 556
The Effect of Height on a SAR Image	p. 556
IFSAR Processing Steps	p. 559
Other Considerations	p. 564
Motion Compensation	p. 564
Autofocus	p. 567
Speckle Reduction	p. 574
Moving Targets	p. 575
Summary	p. 580
References	p. 581
Problems	p. 583
Introduction to Array Processing	p. 587
Virtual Arrays	p. 587
Beamforming and Beam Steering	p. 591
Time Delay Steering	p. 592
Phase Steering	p. 593
Narrowband Phase Beamforming	p. 595
Adaptive Beamforming	p. 598
Adaptive Beamforming with Preprocessing	p. 603
Space-Time Signal Environment	p. 606
Space-Time Signal Modeling	p. 609
Processing the Space-Time Signal	p. 613
Optimum Matched Filtering	p. 613
STAP Metrics	p. 613
Relation to Displaced Phase Center Antenna Processing	p. 617
Adaptive Matched Filtering	p. 619
Reduced-Dimension STAP	p. 622
Advanced STAP Algorithms and Analysis	p. 623
Limitations to STAP	p. 625
Summary	p. 626
References	p. 626
Problems	p. 628
Selected Topics in Probability and Random Processes	p. 631
Probability Density Functions and Likelihood Functions	p. 631
Common Probability Distributions in Radar	p. 632
Power Distributions	p. 633

Amplitude Distributions	p. 641
The Unfortunate Tendency in Radar to Call Power Distributions by the Name of the Amplitude Distribution	p. 644
Phase Distributions	p. 644
Estimators and the Cramèr-Rao Lower Bound	p. 645
The Cramèr-Rao Lower Bound on Estimator Variance	p. 646
The CRLB for Transformed Parameters	p. 648
Signals in Additive White Gaussian Noise	p. 648
Signals with Multiple Parameters in AWGN	p. 649
Complex Signals and Parameters in AWGN	p. 650
Finding Minimum Variance Estimators	p. 651
Random Signals in Linear Systems	p. 652
Correlation Functions	p. 652
Correlation and Linear Estimation	p. 653
Power Spectrum	p. 654
White Noise	p. 655
The Effect of LSI Systems on Random Signals	p. 655
References	p. 658
Selected Topics in Digital Signal Processing	p. 659
Fourier Transforms	p. 659
Windowing	p. 664
Sampling, Quantization, and A/D Converters	p. 668
Sampling	p. 668
Quantization	p. 672
A/D Conversion Technology	p. 675
Spatial Frequency	p. 676
Correlation	p. 678
Vector-Matrix Representations and Eigenanalysis	p. 680
Basic Definitions and Operations	p. 680
Basic Eigenanalysis	p. 682
Eigenstructure of Sinusoids in White Noise	p. 683
Instantaneous Frequency	p. 685
Decibels	p. 685
References	p. 687
Problems	p. 687
Index	p. 689
