

Preface	p. xii
The Authors	p. xiv
Key Features of this Book	p. xvi
Introduction	p. 1
'Why do I have to do this?'	p. 1
The structure of this book and an overview of the chapters	p. 4
How to use this book	p. 8
Discussion/essay questions	p. 11
Research in Psychology: Objectives and Ideals	p. 12
What is psychological research and why do it?	p. 12
How does psychological research progress?	p. 16
Principles of good research	p. 21
Some notes of caution	p. 26
Further reading	p. 28
Objectives and ideals: A checklist for research evaluation and improvement	p. 29
Discussion/essay questions	p. 32
Exercises	p. 33
Research Methods	p. 34
Psychological measurement	p. 34
The experimental method	p. 43
The quasi-experimental method	p. 51
The survey method	p. 53
The case-study method	p. 56
Overview	p. 59
Further reading	p. 60
Research methods: A checklist for research evaluation and improvement	p. 61
Discussion/essay questions	p. 64
Exercises	p. 64
Experimental Design	p. 65
Choosing an independent variable	p. 66
Choosing a dependent variable	p. 70
Choosing an experimental sample	p. 73
Threats to internal validity	p. 77
Threats to external validity	p. 86
Further reading	p. 91
Experimental design: A checklist for research evaluation and improvement	p. 92
Discussion/essay questions	p. 96
Exercise	p. 97
Survey Design	p. 98
The differences between surveys and experiments	p. 99
Setting the question	p. 103

Finding a sample	p. 104
Types of survey	p. 109
Constructing a questionnaire	p. 115
Conducting research online	p. 118
Overview: Designing a survey	p. 120
Further reading	p. 122
Survey design: A checklist for research evaluation and improvement	p. 123
Discussion/essay questions	p. 125
Exercises	p. 125
Descriptive Statistics	p. 127
Different forms of research data	p. 128
Describing a typical score: Measures of central tendency	p. 131
The relationship between measures of central tendency and a response distribution	p. 142
Describing the spread of scores: Measures of dispersion I	p. 144
Observed distributions and theoretical distributions: The difference between samples and populations	p. 149
Further reading	p. 160
Descriptive statistics: A checklist for research evaluation and improvement	p. 160
Discussion/essay questions	p. 162
Exercises	p. 163
Some Principles of Statistical Inference	p. 164
Statistical inference	p. 166
Inferences about individual scores	p. 173
Inferences about means	p. 177
Overview	p. 187
Further reading	p. 189
Statistical inference: A checklist for research evaluation and improvement	p. 189
Discussion/essay questions	p. 192
Exercises	p. 193
Examining Differences between Means: The t-test	p. 194
Student's t-distribution	p. 195
Comparing the results for a single sample with a specific value	p. 199
Within-subjects t-tests	p. 204
Between-subjects t-tests	p. 207
The controversy about what to do with t-values	p. 213
Handling the results of t-tests: The hypothesis-testing approach	p. 215
Other ways of handling the results of t-tests: Probability-level, confidence-interval and effect-size approaches	p. 224
Some notes of caution	p. 231
Overview	p. 237
Further reading	p. 238

t-tests: A checklist for research evaluation and improvement	p. 238
Discussion/essay questions	p. 242
Exercises	p. 242
Examining Relationships between Variables: Correlation	p. 244
Some basic principles of correlation	p. 246
The measurement of correlation	p. 249
Interpreting and making inferences about correlations	p. 254
Some notes of caution	p. 257
Conclusion	p. 265
Further reading	p. 267
Correlations: A checklist for research evaluation and improvement	p. 267
Discussion/essay questions	p. 270
Exercises	p. 270
Comparing Two or More Means by Analysing Variances: ANOVA	p. 273
Analysing variances	p. 274
Comparing multiple means using one-way analysis of variance	p. 277
Another way to explain analysis of variance: Sums of squares and mean squares	p. 285
How big does a difference need to be? Significance testing and effect sizes	p. 289
What does analysis of variance buy us? Some notes on comparing individual means	p. 293
Using F-ratios with and without comparisons planned in advance	p. 294
An introduction to analysis of variance with two independent variables	p. 298
A final word	p. 311
Further reading	p. 312
ANOVA: A checklist for research evaluation and improvement	p. 313
Discussion/essay questions	p. 315
Exercises	p. 316
Analysing Other Forms of Data: Chi-square and Distribution-free Tests	p. 317
Dealing with a single categorical variable that has two levels: The binomial test	p. 321
Dealing with a single categorical variable that has more than two levels: The chi-square test of goodness of fit	p. 324
Examining the relationship between two categorical variables: The chi-square test of independence for 2 x 2 tables	p. 328
Distribution-free tests	p. 334
Examining differences between two groups with relaxed assumptions: The Mann-Whitney test	p. 336
Some options for other cases	p. 342
Overview and checklist	p. 345
Further reading	p. 347
Other forms of data: A checklist for research evaluation and improvement	p. 348
Discussion/essay questions	p. 351
Exercises	p. 351
Classical Qualitative Methods	p. 353

A classical critique of quantitative approaches	p. 355
Classical methods of collecting qualitative data	p. 358
Some general principles for collecting and analyzing qualitative data	p. 361
Examples of classical qualitative research methods	p. 364
Critiques of classical qualitative methods	p. 385
Further reading	p. 387
Classical qualitative methods: A checklist for research evaluation and improvement	p. 387
Discussion/essay questions	p. 389
Exercises	p. 390
Contextual Qualitative Methods	p. 391
A contextual critique of quantitative approaches	p. 392
Examples of contextual qualitative research methods	p. 397
Critiques of contextual qualitative methods	p. 415
Conclusion: The challenge of contextual qualitative methods	p. 416
Further reading	p. 418
Contextual qualitative methods: A checklist for research evaluation and improvement	p. 419
Discussion/essay questions	p. 421
Exercises	p. 421
Research Ethics	p. 424
Science and society	p. 424
Ethical values	p. 428
Ethical risks associated with participation in research	p. 430
Research with animals	p. 439
Final comment	p. 442
Further reading	p. 442
Research ethics: A checklist for research evaluation and improvement	p. 443
Discussion/essay questions	p. 446
Conclusion: Managing Uncertainty in Psychological Research	p. 447
'Where has all this got us?'	p. 447
Managing uncertainty in psychological research	p. 448
Final comment	p. 456
Further reading	p. 457
Discussion/essay questions	p. 458
Writing Research Reports in Psychology	p. 459
Overview	p. 459
Basic structure	p. 459
The sections in detail	p. 461
General stylistic issues	p. 468
Presentational issues	p. 469
Referencing	p. 473

Further reading	p. 474
Sample psychology research report	p. 474
Areas under the Standard Normal Curve	p. 480
Answers to Exercises	p. 484
References	p. 506
Author Index	p. 515
Subject Index	p. 519

Supplementary Online Appendices

Annotated Psychology Research Report
