Introduction to Biomarkers and Personalized Medicine
System Biology in the Context of Personalized Medicine
EpiGenetics in the Context of Personalized Medicine
Biomarker Development and Validation: Statistical Considerations
Multiplicity: Overview and Issues in Subgroup Selection
Multiplicity in Pharmacogenomics Studies
Dose Response Model Considerations from a Biomarker Perspective
Designs for Targeted Therapy: Classical Designs
Designs for Targeted Therapy: Adaptive Designs
Evidence-Based Adaptive Statistical Decision and Design Strategies for
Maximizing the Efficiency of Clinical Oncology Development Programs with
Predictive Biomarkers
Outcomes Research in Personalized Medicine
Biomarkers: Some Regulatory Considerations
