

Preface

Acknowledgments

Materials Research Society Symposium Proceedings

High-Level Waste Glass Compendium; What It Tells Us Concerning the Durability of Borosilicate Waste Glass	p. 3
High Level Radioactive Waste Glass Production and Product Description	p. 15
Laboratory Testing of Waste Glass Aqueous Corrosion; Effects of Experimental Parameters	p. 27
Waste Glass Weathering	p. 41
Surface Layer Effects on Waste Glass Corrosion	p. 55
Waste Glass Corrosion Modeling: Comparison with Experimental Results	p. 69
Radionuclide Decay Effects on Waste Glass Corrosion	p. 83
Perspectives on Performance Assessment and High-Level Waste Glass in a Geologic Repository	p. 99
Waste Glass Alteration Processes, Surface Layer Evolution and Rate Limiting Steps	p. 107
Laboratory Testing of the Corrosion of Waste Glasses in Aqueous Environments - Effects of Experimental Parameters	p. 123
In Situ Testing of Waste Glass in Clay	p. 133
Applications of Hydration Thermodynamics to In-Situ Test Results	p. 145
The Role of Natural Glasses as Analogues in Projecting the Long-Term Alteration of High-Level Nuclear Waste Glasses: Part 1	p. 159
Remaining Uncertainties in Predicting Long-Term Performance of Nuclear Waste Glass from Experiments	p. 167
Science and Licensing: Let's Get Off the Collision Course	p. 183
The Lack of Technical Basis for Requiring a Ten Thousand Year Prediction for Nuclear Waste Management	p. 193
Demonstration of Safety for Geologic Disposal	p. 199
Objectives and Limitations of Scientific Studies with Reference to the Swedish RDandD Programme 1992 for Handling and Final Disposal of Nuclear Waste	p. 209
Radiation Defects and Energy Storage in Natural Poly-Crystalline Rock Salt. Results of an In-Situ Test in the Permian Rock Salt of the Asse	p. 219
Radiation Stability of Ceramic Waste Forms Determined by In Situ Electron Microscopy and He Ion Irradiation	p. 227
Generation of Volatile Organic Compounds by Alpha Particle Degradation of WIPP Plastic and Rubber Material	p. 233
Development of a Gas-Generation Model for the Waste Isolation Pilot Plant	p. 241
Room Closure Response to Gas Generation and Mechanical Strength of Different Waste Forms in a Bedded Salt Repository	p. 247
Non-Invasive Determination of Waste Drum Pressurization by Acoustic Resonance Spectroscopy	p. 253
Effects of Radiation Exposure on SRL 131 Composition Glass in a Steam Environment	p. 259
Basic Radiation Damage Processes in Ionic Solids: The Role of Collisional Electron Capture	p. 269

Densification of Salt-Occluded Zeolite a Powders to a Leach-Resistant Monolith	p. 277
Immobilization in Ceramic Waste Forms of the Residues from Treatment of Mixed Wastes	p. 285
Zirconolite-Rich Titanate Ceramics for High-Level Actinide Wastes	p. 293
Rietveld Analysis of Ceramic Nuclear Waste Forms	p. 299
Production of Synroc Ceramics from Titanate Gel Microspheres	p. 305
Performance of Cementitious Systems in the Repository	p. 315
Cement Minerals at Elevated Temperature: Thermodynamic and Structural Characteristics	p. 327
Ancient Analogues Concerning Stability and Durability of Cementitious Wasteform	p. 335
Accelerated Ageing of Blended OPC Cements	p. 341
Development of Methodology to Evaluate Microbially Influenced Degradation of Cement-Solidified Low-Level Radioactive Waste Forms	p. 349
Electrochemical Characterization of Grouted Radioactive Waste	p. 357
Expansion of Cementitious Materials Exposed to Sulfate Solutions	p. 363
Retention Capability of Cement Barriers Applied in Nuclear Field	p. 369
Mortar-Radwaste Mixture Form Characterization Due to [¹³⁷ Cs] Leach-Rate Using Accelerated Ageing Processes	p. 377
A Study of Fission Product Migration and Selective Leaching by Means of a Power-Bump Test	p. 385
Initial Results from Dissolution Testing of Various Air-Oxidized Spent Fuels	p. 391
Elements Present in Leach Solutions from Unsaturated Spent Fuel Tests	p. 399
Modeling of UO ₂ Aqueous Dissolution Over a Wide Range of Conditions	p. 409
Chemical Durability of High Burnup LWR-Spent Fuel in Concentrated Salt Solutions	p. 417
Comparison of the Dissolution Behaviour of Various UO ₂ Samples in Saline Solution at 100°C under Reducing Conditions	p. 425
Photothermal Deflection Spectroscopy Investigations of Uranium Electrochemistry-II	p. 431
Distribution of Uranium-Bearing Phases in Soils from Fernald	p. 437
The Effect of Fuel Burnup and Dispersed Water Intrusion on the Criticality of Spent High-Level Nuclear Fuel in a Geologic Repository	p. 445
Characterization of High-Level Nuclear Waste Glass Using Magnetic Measurements	p. 455
Nuclear Waste Analytical Round Robins 1-6 Summary Report	p. 461
Effect of Fluoride on Crystallization in High Calcium and Magnesium Glasses	p. 473
Liquid-Liquid Phase Separation and Phase Diagrams of Simulated Fernald Waste Glasses	p. 481
Continuous-Melter Vitrification of Fernald Mixed Wastes: Distribution of Contaminants Between Glass, Scrubber Solutions and Off-Gases	p. 487
Reaction Sequences in Simulated Neutralized Current Acid Waste Slurry During Processing with Formic Acid	p. 495

Constraints on the Affinity Term for Modeling Long-Term Glass Dissolution Rates	p. 507
Hydrotalcite Formed by Alteration of R7T7 Nuclear Waste Glass and Basaltic Glass in Salt Brine at 190[degree]C	p. 513
Dissolution Mechanism of Soda-Lime Silicate Glass and of PNL 76-68 in the Presence of Dissolved Mg	p. 519
A Comparative Study of the Natural and Experimental Corrosion of Poorly Durable Potash-Lime-Silica Glasses	p. 525
Surface Chemistry and Durability of Borosilicate Glass	p. 533
Effect of Surface Layers on the Dissolution of Nuclear Waste Glasses	p. 541
Non-Linearity in Glass Composition Dependence of Dissolution Rates: Effect of Solution pH	p. 549
Effects of Container Material on PCT Leach Test Results for High-Level Nuclear Waste Glasses	p. 557
Experimental Investigation of Aqueous Corrosion of R7T7 Nuclear Glass at 90[degree]C in the Presence of Humic Acids: A Kinetic Approach	p. 565
Dissolution Behavior of Waste Glass Under Reducing Condition	p. 573
RBS and PIXE Analysis of Alteration Layers on Waste Glass in a Leaching Test Under Reducing Condition	p. 579
Analytical Electron Microscopy Examination of Solid Reaction Products in Long-Term Tests of SRL 200 Waste Glasses	p. 585
Thermodynamic and Structural Models Compared with the Initial Dissolution Rates of "Son" Glass Samples	p. 595
Volcanic Glass as a Natural Analog for Borosilicate Waste Glass	p. 605
Field-Based Tests of Geochemical Modeling Codes: New Zealand Hydrothermal Systems	p. 617
Formation, Oxidation and Alteration of lanthanite	p. 625
XPS and XRD Studies of Samples from the Natural Fission Reactors in the Oklo Uranium Deposits	p. 631
Use of the Quasi-Stationary State Approximation to Determine the Migration of Mineral Alteration Zones at a Natural Analogue for the Disturbed Zone of a Cementitious Radioactive Waste Repository	p. 639
Significance of the Effect of Mineral Alteration on Nuclide Migration	p. 645
Formation of Secondary Uranium Minerals in the Koongarra Deposit, Australia	p. 653
The Effects of Bacteria on Crystalline Rock	p. 663
Results from Simulated Contact-Handled Transuranic Waste Experiments at the Waste Isolation Pilot Plant	p. 681
Case Studies of Corrosion of Mixed Waste and Transuranic Waste Drums	p. 687
The Influence of Borehole Flushing on the Concentration of Microbes in Granitic Groundwaters	p. 693
Formation of Vivianite During Microbiologically Influenced Corrosion of Steels	p. 699
The Degradation of Cellulose in the Near Field of a Radioactive Waste Repository	p. 705
Effects of Recrystallization on Time Variant Sorption of Radionuclides Onto Steel Corrosion Products	p. 713

The Sorption of Niobium, Tin, Iodine and Chlorine Onto Nirex Reference Vault Backfill	p. 719
Sorption Mechanism of Pu, Am and Se on Sodium-Bentonite	p. 725
Thermodynamics of Ion-Exchange Between Na ⁺ /Sr ²⁺ Solutions and the Zeolite Mineral Clinoptilolite	p. 731
Effects of Nonequilibrium Adsorption on Nuclide Transport in a Porous Rock	p. 739
Influence of Microbiological Activity on the Mobility of Redoxsensitive Radionuclides in Sediments	p. 745
Preliminary Analysis of Potential Chemical Environments Inside Failed Waste Containers at the Proposed Yucca Mountain Repository	p. 755
Preliminary Results for the Experimental Evaluation of a Radwaste Repository Near-Field Model	p. 761
Comparison of International Source-Term Codes	p. 769
Technical Workshop on Near-Field Performance Assessment of High-Level Waste Disposal	p. 775
Introduced Materials and Colloid Formation: A Report on the Current State of Knowledge	p. 783
Three-Dimensional Coupled Ground Water Flow, Thermal Transport and/or Migration of Nuclides Analysis by Boundary Element Method	p. 791
A Preliminary Investigation of the Applicability of Surface Complexation Modeling to the Understanding of Transportation Cask Weeping	p. 797
Testing Long-Term Predictions from Hydrogeochemical Models	p. 805
Intrusion of Seawater Into a Porous Fracture Zone - a Coupled Geohydrochemical Modelling Exercise	p. 811
Further Development and Studies of Gas Methods in Matrix Diffusion	p. 821
Diffusive Transport of Carbon Dioxide Through USW-G4 Topopah Spring Tuffs	p. 827
Chemical Implications for the Presence of Introduced Materials in the Post-Emplacement Environment	p. 835
Experimental Investigation of Hydrous Pyrolysis of Diesel Fuel and the Effect of Pyrolysis Products on Performance of the Candidate Nuclear Waste Repository at Yucca Mountain	p. 841
Probabilistic Calculations of Groundwater Travel Time in Heterogeneous Three-Dimensional Porous Media	p. 849
The Modification and Application of the Geochemical Modelling Code Cheqmate to Simulate Transport and Chemical Processes within Fractured Media	p. 855
An Approach to Analysis of High Level Waste Container Performance in an Unsaturated Repository Environment	p. 863
Performance Assessment Modeling of a Multi-Purpose Container	p. 869
An Accelerated Electrochemical MIC Test for Stainless Alloys	p. 881
Development of Modelling Criteria for Predicting Lifetimes of Titanium Nuclear Waste Containers	p. 893
Modelling the Effects of Evolving Redox Conditions on the Corrosion of Copper Containers	p. 901
The Advantages of a Salt/Bentonite Backfill for Waste Isolation Pilot Plant Disposal Rooms	p. 911

Water-Compacted Na-Bentonite Interaction in Simulated Nuclear Fuel Disposal Conditions: The Role of Accessory Minerals	p. 919
Moisture Movement in a Clay Based Buffer Material Under Isothermal Conditions	p. 925
An Experimental Study of Granitic Water-Saponitic Bentonite Interaction Under Hydrothermal Conditions	p. 933
Diffusion of Uranium in Compacted Bentonite in the Presence of Carbon Steel	p. 939
Reactions of High-Feo Olivine Rock with Groundwater and Redox-Sensitive Elements Studied by Surface-Analytical Methods and Autoradiography	p. 947
Equilibria in Saturated Bentonite	p. 955
Estimation of Static Fatigue Behavior of Ceramic Materials as Candidate Overpack Materials	p. 961
Corrosion of Synthesized Glasses and Glazes as Analogs for Nuclear Waste Glass Degradation	p. 969
Author Index	p. 983
Subject Index	p. 987
