Numerical simulation of SiC processes: a characterization tool for the design of epitaxial structures in electronics

Substrate heater design investigation for uniform temperature in a cold-wall low pressure reactor

Elaboration on the automatic modelling system for reaction mechanism using a novel calculation method

Toward a systematic methodology for modelling vapor deposition processes

Expanding thermal plasma CVD: experimental studies of the plasma-surface interaction

RTLPCVD modelling: steady-state simulations

The effect of ozone on the growth rate of tin oxide from monobutyltin trichloride

A critical evaluation of surface reaction models based on reactive sticking coefficients

Multiple experimental investigation for understanding CVD mechanism: example of laminar pyrocarbon deposition

Gas phase association reactions in 13–15 CVD: annoying obstacle or rewarding advantage?

A multiscale study of the MOCVD of GaN

The decomposition mechanism of a gallium azide single molecule precursor derived from accurate theoretical calculations

Multiscale modelling of silicon-based materials LPCVD in deep submicronic trenches: a continuum feature scale model

Design investigation for three dimensional uniformity of the mass transport field

Molecular dynamic approach of SiC layers growth in CVD and PECVD reactors

The QM/MM design of precursors for CVD and ALD processes

An efficient methodology for integrated computer-aided design of CVD reactors: an application in tungsten/carbon codeposition

Numerical assessment of new precursor in MOVPE process

Kinetic analysis of the chemical vapor deposition of Si from SiCl4–H2 for the production of biomorphic Si3N4 ceramics

Comparative theoretical study of [beta]-ketoiminates and [beta]-diketonates as precursors to aluminum oxide thin films

Theoretical determination of accurate entropy contributions by a Monte Carlo calculation of the partition function: application to the decomposition of a single molecule precursor

Study on the possibilities of modeling the physical processes involved in spray CVD

Deposition process of amorphous boron carbide from CH[subscript 4]/BCl[subscript 3]H[subscript 2] precursor

Heat and mass transfer during producing large-area layers of zinc selenide

Selective atomic layer deposition of titanium oxide on silicon and gold with patterned self-assembled monolayers

Structure control of thin films via droplet charge in aerosol assisted vapor deposition process
Application of plasma-enhanced CVD to nitride synthesis
Plasma enhanced MOCVD of transition metal oxide thin films with a thickness between some hundred and less than one nanometer for optical applications
Emission spectroscopy, mass spectrometry, and kinetics in CH[subscript 4]-CO[subscript 2] plasmas used for diamond deposition
Synthesis of molybdenum nitrides by plasma enhanced chemical vapor deposition
Deposition and characterization of PECVD phosphorus doped silicon oxyxnitride layers for integrated optics applications
Thin film transistors fabricated in laser crystallized chemically vapor deposited amorphous silicon films on quartz substrates
Comparative study of [mu]PCVD and PECVD phosphosilicate glass films after rapid thermal annealing
Generation and characterization of composite Pd/SiO[subscript 2] catalysts by CVS/CVD in a continuous gas-phase/aerosol process
Generation of titania nanoparticles by liquid flame spray for photocatalytic applications
MOCVD challenge to the synthesis of oxide nanotube arrays
Advances in synthetic strategies for metal oxide nanosystems : a non-conventional hybrid CVD/sol-gel approach
Bi[subscript 2]O[subscript 3] rods deposited under atmospheric pressure by means of halide CVD on C-sapphire
LPCVD synthesis of silicon nanodots from silane and for flash memory devices
Growth of one-dimensional IrO[subscript 2] nanocrystals via metal-organic chemical vapour deposition
Chemical vapor synthesis of zinc oxide nanoparticles using a volatile organometallic precursor
Atomic layer deposition of metal thin films
In-situ RHEED of atomic layer deposition
Atomic layer deposition of tungsten carbonitride thin films from a new metalorganic precursor
The effect of precursors to the structure and conductivity of atomic layer deposited TiO[subscript 2] films
ALD processes for the preparation of noble-metal-free monolithic catalysts
In-situ quartz crystal microbalance investigation of atomic layer deposition of Cu[subscript 3]N
Precursor combinations for ALD of rare earth oxides and silicates-a quantum chemical and x-ray study
Aminalkoxide groups as monovalent bidentate ligands for the precursors to various metals and metal oxides and the applications of the precursors in MOCVD and ALD
Precursor chemistries for electronics and opto-electronics
Thin films of iron from Fe(CO)[subscript 5] under atmospheric pressure
Growth of iron thin films by AP-MOCVD starting from ferrocene and H\(_2\)O
Deposition of undoped and in-situ doped amorphous and polycrystalline silicon with LPCVD
Chemical vapor deposition of nickel thin films on glass using nickel acetylacetonate
Synthesis and properties of volatile Cu(II) complexes with beta-diimimates derived from acetylacetone-new precursors for MOCVD processes
Systematic investigations of new Pd(II) precursors for MOCVD processes
Preparation of silver thin films from vinyltriethylsilane (hexafluoroacetylacetonato)silver(I) using liquid-delivery metalorganic chemical vapor deposition
Growth and characterisation of free-standing hydride vapor phase epitaxy GaN on two-step epitaxial lateral overgrown GaN template
Silicon carbide nanoheteropolytypic structures grown by UHV-CVD on Si(III)
Stress manipulation in CVD grown SiC on Si by mono- and submonolayer Ge precoverages
Nanocrystalline Pt films by MOCVD in the presence of water vapor electrode use
\([(\text{Arene})(\text{diene})]\) Ru(0)-complexes as precursors for ruthenium MOCVD
A single source approach for the deposition of GaSb films
Synthesis of tailor-made single source precursors for the deposition of binary group-13 antimonide thin films
Evaluation of cyclic gallium amides as precursors for gallium nitride thin films
Singularity in growth of Pt and Ir films obtained by metalorganic chemical vapor deposition
MOCVD of conductive cubic HfN thin films from Hf(NR\(_2\))\(_4\) and N, N-dimethylhydrazine
New metastable phases in the aluminumoxide-hydrido-halogenido-system
Photocatalytic properties of TiO\(_2\) : (Fe, S) thin films prepared from complex precursors by CVD
Atmospheric pressure CVD growth of photocatalytic titanium dioxide thin films on tin oxide
Novel molecular precursors for the MOCVD of Ba\(_{1-x}\)Sr\(_x\)TiO\(_3\) thin films
Technology and characterization of CVD-grown mixed Mo/W oxide films and electrochromic devices made on their basis
Chemical vapor deposition of Zn\(_x\)Co\(_{3-x}\)O\(_4\) thin films and their characterization
Preparation of trivalent metal doped ZnO thin films by liquid-delivery MOCVD
Preparation of (RE)NiO thin films as an electrode by liquid-delivery MOCVD
Hafnium (IV) [beta]-diketonates as precursors for MOCVD of HfO\(_2\) films
Reel-to-reel MOCVD process of coated conductors on biaxially textured nickel alloy tapes
