

Stone nomenclature and history of instrumentation for urinary stone disease	p. 3
Epidemiology and incidence of stone disease	p. 27
The genetics of stone disease	p. 35
Theories of stone formation	p. 55
Structure and compositional analysis of kidney stones	p. 69
Calcium physiology	p. 85
Management of patients with hyperoxaluria	p. 103
Renal acid-base balance and renal tubular acidosis	p. 121
Urinary stone inhibitors : citrate and magnesium	p. 157
Modulators of crystallization of stone salts	p. 175
Hormonal influences on nephrolithiasis	p. 221
Associated systemic disease : bowel and bones	p. 237
Medical evaluation of stone disease	p. 259
Pharmacologic prophylaxis of calcium stones	p. 269
Diet and urolithiasis	p. 285
Uric acid urolithiasis	p. 299
Struvite stones	p. 309
Cystine stone disease	p. 327
Urinary stones of unusual etiology	p. 345
Imaging of urinary stone disease	p. 371
Physician safety	p. 403
Treatment of acute renal colic	p. 415
Anatomical considerations in urinary stone disease	p. 433
Conservative management of ureteral calculi	p. 457
Ureteral stents	p. 465
Anesthetic considerations for extracorporeal shockwave lithotripsy, percutaneous nephrolithotomy, and laser lithotripsy	p. 495
Complications of urinary stone surgery	p. 511
Extracorporeal shockwave lithotripsy : patient selection and outcomes	p. 555
Indications and outcomes of ureteroscopy for urinary stones	p. 571
Ureteroscopy : technical aspects	p. 589
Percutaneous nephrolithotomy : indications and outcomes	p. 609
Percutaneous nephrolithotomy : technical aspects	p. 621
Open stone surgery	p. 639
Laparoscopic approach to urinary stone disease	p. 651
Stones of the urethra, prostate, seminal vesicle, bladder, and encrusted foreign bodies	p. 661
