

Performance of four European hemp cultivars cultivated under different agronomic conditions in the Eastern Cape Province, South Africa

Antibacterial cotton fibre

Availability, production, marketing and potential applications of natural fibres of Brazil

Newest achievements in curaua processing and applications

Fibre quality of hemp grown on the Swedish Island Gotland

Important plant parasitic nematodes affecting fibre crops, such as cotton and hemp, in South Africa

HEMP SYS: Design, development and up-scaling of a sustainable production system for HEMP textiles: an integrated quality Systems Approach. How to affect hemp fibre quality?

A review on the development of rapid analytical techniques for assessing physical properties of modified linen fabric

Application of osmotic pressure for evaluation of quality and quantity of fibre in flax and hemp

Comparison of cotton yarn strength prediction methods

Cotton fibre quality index

Biodegradable/compostable composites from lignocellulosic fibres

The effect of coarse edge on worsted spinning performance and yarn properties

High performance in sewing guaranteeing seam quality through control of sewing dynamics

Liquid ammonia treatment of linen and cotton/linen fabrics

The designing multifunctional fibrous structures for technical applications

Development of hemp fibre reinforced polypropylene composites

Compatibility of cotton/nylon and cotton/polyester warp-knit terry towelling with industrial laundering procedures

Kinetic Study of Polypropylene Nanocomposite Thermal Degradation

Fibrillation of natural fibres increasing the specific surface for high performance composites

Comparison of the alkaline hydrolysis and dyeing properties of poly(trimethylene terephthalate) and poly(ethylene terephthalate) fibres

Agrobased fibres of Brazil and their composites- An overview

Influence of corona treatment on linen fabric dyed with natural dyestuffs

Development of a new vat dyeing process for cellulose materials pre-treated with Corona

Digital printing on silk fabric

Eco friendly natural fibre textiles for sustainable development

Trends&developments of the world-wide textile industry

Influence of fabric construction, lignin content and other factors on UV blocking

Effect of corona treatment on finishing processes of linen fabrics

Nano-cellulosic fibres, preparation, properties and directions of application

Continuous yarns from electrospun nanofibres -- Recent developments

Nanotechnologies for modification and coating of fibres and textiles

Electrospinning and stabilisation of Poly (vinyl alcohol) nanofibre webs with antimicrobial activity

Cottons Role in Sustainable Textiles

Raw materials based on linseed oils for polyurethane synthesis

Improved profitability through industrial upgrading of bast fibres in South Africa

Flax Canada 2015: Going Beyond the Status Quo
