

Preface	p. xi
Introduction and Text Organization	p. xiii
Reviewers	p. xv
Acknowledgments	p. xvii
The Human Brain-Neuroscience Overview and Update	p. 1
Introductory Neurodevelopmental and Acquired Neuro cognitive Case Studies	p. 1
How We Got Here-The Historical Perspective	p. 1
Introduction	p. 1
Early Studies of Brain and Language	p. 4
Brain Science Localization Merges With Connectionism	p. 8
The Technology Era Broadens the Scientific Landscape	p. 11
Network Theory Advances Through Enhanced Imaging Techniques	p. 12
Summary	p. 17
Network Neuroscience-An Introduction	p. 17
Size, Scope, and Clinical Relevance	p. 18
Network Organization	p. 18
Summary and Proposed Clinical Applications	p. 21
Oral, Gestural, and Written Language Networks	p. 23
Overview of Neuro anatomical Structure: The Triune Brain	p. 23
Lower Triune Brain Levels: Automatic Biological Functions and the "Emotional Brain"	p. 23
The Highest Triune Brain Level: The Neocortex	p. 25
Clinical Applications of the Triune Brain Model	p. 26
Network Neuroscience of Language and Communication	p. 28
Top-Down and Bottom-up Language Network Components	p. 28
Ventral and Dorsal Stream	p. 31
Phonology	p. 34
Syntax	p. 39
Semantics	p. 44
Prosody	p. 45
Gestural Communication	p. 46
Pragmatics	p. 46
Written Language	p. 49
Summary	p. 50
Cognitive Neuroscience and Connectomics Applications to Neurological Disorders	p. 51
Network Neuroscience of Cognitive Functions	p. 51
Overview of Cognitive Functions	p. 51
Network Neuroscience of Memory	p. 53
Network Neuroscience of Executive Functions	p. 55

Human Connectomics: Tying Architecture and Biological Mechanisms to Brain Disorders	p. 58
Connectomics-Detailed Wiring Diagrams of Brain and Biological Mechanisms	p. 58
Connectomic Features Relevant to Neurological Disorders: Hubs, Edges, Directionality, Weight, and Network Segregation/Integration	p. 60
Chemistry: Brain Modulation	p. 61
Summary	p. 66
How the Human Brain Changes: Neurogenetics, Neuroplasticity in Maturation, Recovery, and Environment	p. 67
Introduction	p. 67
Neurogenetics	p. 68
Introduction	p. 68
DNA and RNA Basics	p. 68
Genetic Variation and Human Brain Differences	p. 68
Epigenetics	p. 71
Genetic Variations and Disorders of Speech, Language, and Cognition	p. 73
Summary	p. 78
Neuromaturation and Neuroplasticity	p. 79
Fetal Brain Development	p. 79
Neonatal Brain Development-Birth to 5 Years-Brain Volume Measures	p. 81
Neonatal Brain Development-Birth to 5 Years-White Matter Measures	p. 83
The Adolescent Brain-A Second Sensitive Period	p. 85
Variability in Development	p. 89
Personalized Medicine Adaptations	p. 91
Neuroplasticity	p. 92
Interactional Synchrony: Brain-to-Brain Functions	p. 94
Environmental Factors in Brain Maturation of Language and Cognitive Functions	p. 97
Introduction	p. 97
Socioeconomic Status	p. 98
Introduction	p. 98
Socioeconomic Status Effects on Brain Maturation: Structure and Function	p. 99
Socioeconomic Status Effects Associated With Malnutrition	p. 103
Interaction of Socioeconomic Status and Genetics	p. 103
Socioeconomic Status Effects on Language, Working Memory, and Processing Speed	p. 104
Socioeconomic Status Differences in Parent Language and Other Parent-Child Interactions	p. 106
Other Executive Functions: Attention and Self-Regulation	p. 108
Individual Differences	p. 110
Socioeconomic Status Reading	p. 111
Socioeconomic Status and Academic Outcomes	p. 113

Stress	p. 113
Introduction	p. 113
From Positive to Adverse Effects of Stress	p. 114
Educational Implications	p. 115
Effects on Cognitive Development	p. 116
Adverse Childhood Experiences and Toxic Substance Exposure	p. 117
Adverse Childhood Experiences	p. 117
Toxic Substance Exposures	p. 118
Summary	p. 121
Summary and Clinical/Educational Applications	p. 121
Connectomics and Genetics of Neurodevelopmental Cognitive and Communication Disorders	p. 123
Introduction	p. 123
Autism Spectrum Disorders	p. 125
Introduction	p. 125
Genetics	p. 126
Underlying Brain Mechanisms	p. 130
Environmental Factors	p. 135
Developmental Language Disorders	p. 137
Introduction	p. 137
Phonological Deficit Hypothesis	p. 139
Cognitive Systems: Learning and Memory	p. 140
Statistical Learning	p. 144
Developmental Dyslexia	p. 146
Introduction	p. 146
Genetics	p. 147
Underlying Brain Mechanisms	p. 148
Perceptual and Cognitive Factors	p. 149
Environmental Factors	p. 150
Childhood Apraxia of Speech (Developmental Dyspraxia Affecting Speech)	p. 151
Connectomics and Genetics of Acquired Cognitive and Communication Disorders	p. 153
Introduction	p. 153
Concussion and Traumatic Brain Injury-Mechanisms and Clinical Features	p. 155
Introduction	p. 155
Brain Mechanisms and Related Symptomatology	p. 155
Aphasia-Status of Neuroscience Research	p. 161
Introduction	p. 161
Brain Mechanisms and Related Symptomatology	p. 162
Right Hemisphere Disorder-Status of Neuro science Research	p. 168
Introduction	p. 168

Brain Mechanisms and Related Symptomatology	p. 169
Progressive Neurological Diseases (Alzheimer's Disease, Lewy Body Dementia, Other Dementias)	p. 174
Introduction	p. 174
Lewy Body Dementias	p. 174
Alzheimer's Dementia, Mild Cognitive Impairment, and Primary Age-Related Tauopathy	p. 176
Other Dementias	p. 178
Summary	p. 178
How Therapy Changes Brains	p. 181
Introduction and Overview of Effects of Intervention	p. 181
The "What" of Therapy-How to Select Effective Task-Specific Activities	p. 184
Introduction	p. 184
Evidence-Based Practice in Neurodevelopmental Disorders-State of the Science	p. 185
Evidence-Based Practice in Acquired Neurological Disorders-State of the Science	p. 191
The "How" of Therapy	p. 196
Introduction	p. 196
How Therapy Upregulates Excitatory Neuromodulators Associated With Neuroplasticity: Dopamine, Norepinephrine, and Acetylcholine	p. 197
Regulatory Neuromodulator of Serotonin	p. 198
Balancing Top-Down Executive/Regulatory Intervention With Task-Specific Activities	p. 199
Summary	p. 200
The "When" of Therapy	p. 200
Issues Related to Neuroplastic Periods: Early "Sensitive Period"-Birth to Five Years and the Later Sensitive Period, The Adolescent Brain	p. 200
Issues Related to Recovery Periods Following Brain Injury	p. 203
Intensity of Therapy-Recent Research	p. 204
Summary	p. 205
Other Considerations: Maximizing Therapeutic Outcomes	p. 207
Individualizing Therapy to the Unique Needs of Each Client or Patient	p. 207
Maximizing Therapeutic Commitment: Promoting a Safe, Trusting Therapeutic Alliance	p. 208
Teacher, Parent, Family, and Interprofessional Collaboration	p. 209
Teacher Collaboration	p. 209
Parent Collaboration	p. 209
Family Collaboration With Acquired Neurocognitive Disorders	p. 213
Interprofessional Collaboration	p. 214
Summary	p. 214
Behavioral Academic and Vocational Adaptations: Building Goal-Directed Behavior in Adolescents and Adults	p. 214

Technological Adjunctive Approaches That Are Evidence Based to Increase Therapeutic Dosage	p. 217
Summary	p. 220
A Brief Overview of Traditional English Syntax Terminology	p. 221
ICD-11 Language Disorders	p. 225
Dementia Codes from the International Classification of Diseases, 11th Revision	p. 231
Recent Clinical Resources for Task Selection With Strong Evidence Base	p. 237
Evidence-Based Technological Cognitive and Communication Interventions	p. 239
References	p. 243
Index	p. 299
