

I: Presurgical Assessment of the Lower Genitourinary Tract

Contracted Bladder: Aetiology and Criteria for Surgical Treatment

Male Anterior Urethra: Functional and other Properties Relevant to Reconstructive Surgery

Assessment of Erectile and Ejaculatory Function Prior to Surgical Reconstruction

II: Reconstruction of the Bladder and Urinary Diversion

Bladder Auto-augmentation

Augmentation Cystoplasty

Orthotopic Bladder Substitutes

Orthotopic Lower Urinary Tract Reconstruction in the Female

Non-continent Urinary Diversion

Continent Cutaneous Urinary Diversion

Anal-sphincter-controlled Continent Urinary Diversion

III: Reconstruction of the Urethra

Imaging the Urethra in the Adult Male with Stricture Disease

Management of Acute Urethral Trauma

Surgical Treatment of Urethral Meatal Strictures in the Male

The Urolumene

Reconstructive Surgery of Anterior Urethral Stricture Disease

Endoscopic Recanalization of Membranous Urethral Disruption Injuries

The Management of Simple and Complex Membranous Urethral Distraction Injuries

IV: Reconstruction of the Penis and the Male Reproductive Tract

Management of Balanitis Xerotica Obliterans

Surgical Straightening of Penile Curvature in Peyronie's Disease

Peripheral Vascular Disorders as Cause to Erectile Dysfunction-diagnosis and Management

The use of Penile Prosthesis in the Management of Erectile Impotence

Surgical Treatment of the Obstructed Seminal Tract

V: Urogynecological Reconstruction and Fistula Repair

Surgical Treatment of Female Urethral Diverticulum and Female Urethral Reconstruction

Complex Fistulae - from Fistula Closure to Pelvic Reconstruction

VI: Management of Urinary Incontinence by the Aid of Artificial Sphincter Devices

The use of Artificial Devices
