Special Article

Julian Theodore (Buz) Hoff 1936-2007

Hoff Fellowships

Experimental intracerebral hemorrhage - iron, hemoglobin and free radicals

Deferoxamine therapy for intracerebral hemorrhage

Bilirubin oxidation products, oxidative stress, and intracerebral hemorrhage

Deferoxamine reduces brain swelling in a rat model of hippocampal intracerebral hemorrhage

The antioxidant effects of melatonin after intracerebral hemorrhage in rats

Poly(ADP-ribose) polymerase activation and brain edema formation by hemoglobin after intracerebral hemorrhage in rats

Induction of autophagy in rat hippocampus and cultured neurons by iron

Effects of superoxide dismutase and catalase derivates on intracerebral hemorrhage-induced brain injury in rats

Metallothionein and brain injury after intracerebral hemorrhage

Experimental intracerebral hemorrhage - inflammation and thrombin

Intracerebral hemorrhage injury mechanisms: glutamate neurotoxicity, thrombin, and Src

Increase of brain thrombin activity after experimental intracerebral hemorrhage

Microglial activation and intracerebral hemorrhage

Concomitant intracerebral infusion of tissue plasminogen activator and thrombin leads to brain injury

Microglial activation and brain injury after intracerebral hemorrhage

Effects of aging on complement activation and neutrophil infiltration after intracerebral hemorrhage

Experimental intracerebral hemorrhage - other mechanisms

Blood-brain barrier function in intracerebral hemorrhage

Treatment of stroke and intracerebral hemorrhage with cellular and pharmacological restorative therapies

Deficiency of CD18 gene reduces brain edema in experimental intracerebral hemorrhage in mice

Tissue inhibitor of matrix metalloproteinase-3 (TIMP-3) lacks involvement in bacterial collagenase-induced intracerebral hemorrhage in mouse

Radial glia marker expression following experimental intracerebral hemorrhage

Long-term effects of melatonin after intracerebral hemorrhage in rats

Management of delayed edema formation after fibrinolytic therapy for intracerebral hematomas: preliminary experimental data

Erythropoietin attenuates intracerebral hemorrhage by diminishing matrix metalloproteinases and maintaining blood-brain barrier integrity in mice

Hyperbaric oxygen for experimental intracerebral hemorrhage

Effect of amantadine sulphate on intracerebral hemorrhage-induced brain injury in rats
Experimental intracerebral hemorrhage - model development and characterization

Long-term behavioral characterization of a rat model of intracerebral hemorrhage p. 125

Neurological deficits and brain edema after intracerebral hemorrhage in Mongolian gerbils p. 127

Rat model of intracerebellar hemorrhage p. 131

A rat model of pontine hemorrhage p. 135

Human intracerebral hemorrhage

The optimal time-window for surgical treatment of spontaneous intracerebral hemorrhage: result of prospective randomized controlled trial of 500 cases p. 141

Preliminary findings of the minimally-invasive surgery plus rtPA for intracerebral hemorrhage evacuation (MISTIE) clinical trial p. 147

Pediatric cerebrovascular diseases: report of 204 cases p. 153

Xenon-CT study of regional cerebral blood flow around hematoma in patients with basal ganglia hemorrhage p. 161

Preliminary application of pyramidal tractography in evaluating prognosis of patients with hypertensive intracerebral hemorrhage p. 165

Experimental intracranial hemorrhage (non-intracerebral hemorrhage)

Mechanisms and markers for hemorrhagic transformation after stroke p. 173

The clinical significance of acute brain injury in subarachnoid hemorrhage and opportunity for intervention p. 179

Development of a cerebral microvascular dysplasia model in rodents p. 185

Hyperbaric oxygen preconditioning protects against traumatic brain injury at high altitude p. 191

Human intracranial hemorrhage (non-intracerebral hemorrhage)

Genetic considerations relevant to intracranial hemorrhage and brain arteriovenous malformations p. 199

Vasospasm after aneurysmal subarachnoid hemorrhage: need for further study p. 207

Regional cerebral blood flow and oxygen metabolism in aneurysmal subarachnoid hemorrhage: positron emission tomography evaluation of clipping versus coiling p. 211

Preliminary report of the clot lysis evaluating accelerated resolution of intraventricular hemorrhage (CLEAR-IVH) clinical trial p. 217

Leptin plays a role in ruptured human brain arteriovenous malformations p. 221

Novel treatments for cerebral vasospasm following aneurysmal subarachnoid hemorrhage p. 225

Relationship between serum sodium level and brain ventricle size after aneurysmal subarachnoid hemorrhage p. 229

Lack of association between apolipoprotein E promoters in ε4 carriers and worsening on computed tomography in early stage of traumatic brain injury p. 233

Author index p. 237

Index of keywords p. 239
